FRANKIE - November 16, 2015, 3:15 am

Scratches head

Where the mother fuck should I start..

Going to be straight out and open with everyone that is not familiar (so as to give a bit of background info on why my feedback goes far back), I am not a new member here on the forum. Spoiler ([Click to View](#)) (Not something I am proud of or happy about) I have been here for quite some time and have definitely got a lot to comment on. With that in mind, let me start with the beginning.

How I found HF

I shit you not, it was raining one day and I got on the computer looking for a way to beat bloons tower defense on addicting games. First thing I did?

It's not there anymore but HF was the first result that came up back then.

Registered, peeked around a bit and never really found what I was looking for but immediately was taken in by the community / content that was on here. Made friends with black shadow (before he went to jail) & a few others. Probably the funnest nights gaming / chilling / conversating I have had ever.

Moving on, I started learning how to code vb.net and at the time, I was getting the hang of it. Pretty easy as I remember (don't have the time now) and java. I must have made 6-7 minecraft clients in my day. I know I have over 4k posts in the griefing section alone throughout my whole time here (back when it was fucking coolio) Coding was awesome but it was not paying bills so to speak, also was too young to have bills.

Started partnering up with people, one dude called snakehacker i think was his skype, we made fucking phishing websites / keyloggers / a rat / a few browser stealers and a bunch of other shit. That was my mate but I can't find him anymore. Miss you if you are reading this.

From there I started learning about paypal / and other shit and was just really getting into the swing of things on HF (learning the markets / OG neobux & adfly methods and clickbank stuff) shit was awesome.

So we broke up a bit because I got sent off to a school...

That basically killed my online life all together however it gave me a few tools that I use today.

Once back online, I learned anti-forensic stuff (used to offer a service for windows users) and basic info-sec things (footprint removal / trace removing / ect) and still do most of it to this day. But the main thing I do is work with instagram accounts and I literally pay my bills with this money BUT it's all thanks to HF.

MOVING ON

Site Feedback

HF love / HF Life

On some real shit. I have spent most of my life on HF and take that how you want but it's a fucking great community. Sure some hq peeps have come and gone but dammit it's still fun as ever to troll / sell / and post on. People that say the site is going downhill are a bit off. If anything it's picking up although I do agree (some new members are garbage swine) but it can be overlooked with a funny trisomy21 thread or something. It is still a great place to sell products & still a great place to meet people that share similar interests as you. It's like the ultimate collective of nerds all in one place.

Group Feedback

These are all of the groups I was in.

Staff Feedback

I BLAME THE BRONYS - Best usertitle ever.

All I know about you is that you like R.E.M and that you are very leaniant with me. A good portion of my life has revolved around HF and I am in debted to you for letting me stay. Can not thank you enough.

Spooky, but we have spoken before and you have some witty one word responses mister.

Thanks for red lions, *sheds tear

You enforce the laws around the marketplace. Hard.

(Never talked to sam winchester but I'm sure he is nice)

Shoutouts

vinnie

Showed me a lot of shit, had many a top kek with this boy

panik

All I can say is, panik gang or fucking die. Also, wizardsquad must make a comeback

dex

The man, the myth, the liberal, dex himself. I have near pissed myself reading your posts.

Thanks for reading m7+2's

Love you HF
