? Compilation Of Free Services And Exclusive Mega Threads ?

#HF Database# by Eolithic.

Hi, HackForums. This is my second mega thread and it will be compilation of all free services and some important and hot mega threads placed on HF. I hope that I'll succeed in gathering them all and in presenting them to you guys, members of this forum. I'll be honored if this compilation is going to help beginners and not just to them, but to all standard members and elders of this forum, although they don't need free services so much as beginners need. ?

At the first attempt I didn't know where to put this thread, so I've contacted Vorfin and he told me to place it here, so it's probably right place, although it doesn't have so much with hacking.

Compilation will have a lot of parts, such as free services in monetizing techniques, in hacking abilities, graphic services, etc..

I hope that you'll enjoy, so let's start..

Part 1 - Free services at online monetizing.

Tonight I'm gonna add section for mega threads, too. I will list some of the most important mega threads on HF.

Goodbye for now.

Credits goes to the makers of this services, and to me who gathered all these threads. Peace out.

Helping lazy and dumb people who can't use the search function is a good job, I guess. But not really necessary or recommended. But I see you have done some effort with this, so thank you.

@SSk - No problem.

@gavgav3 - I hope you'll get. :)
