Thread: [Anyone to show me sample of a preview when they ask?](#)

I am confused when I am sending preview to pervs, anyone to share with the sample of a preview you send to pervs which will make them to buy or not to run away?

Somebody said half nude but I am not understanding. Give me a good sample to use must not be your pic you are using but any so I catch the idea of sending the pic to pervs.

Just a pic of boobs or maybe a full nude if there asking for more and I'm like okay w/e do you want to buy now or not?

You can tell them that you can give them only a half-nude live pic, if you have "Fake Camera" installed on ur device :P

EDIT: "half nude" means not fully naked (wearing lingerie) or showing just covered boobies

yeah you need like in underwear. never send nudes before they pay. that has to be rule number 1

He's right, I usually send a sexy selfie or a mirror underwear pic, my best customers don't even ask for a preview ?

If they're asking for a preview, always send them full clothed pics.

Never send them nude previews. Always remember that.

Send them previews of full clothed/bikini (non-nude) pictures.

This will make them tempted to buy nudes off of you.
