SIM-2015410 - November 16, 2015, 11:43 pm

Legends General Recruitment

Do you have what it takes to be a Legend?
Apply within!

"Others toil their entire lives to make a name for themselves, some are just born LEGENDS."

Legends is a diverse group not fixed on a particular agenda. Marketing, programming, hacking, you name it - but only people who make the cut will be accepted. We strive to contribute, teach and learn as individuals. We do not consider prestige or reputation to increase any chances of getting in Legends. We expect high quality members willing to contribute to our group as well as the community - we always welcome such members wholeheartedly.

APPLICATION

There is no set format for applications, just impress us. We do not consider rep, awards, prestige or status to be a deciding factor. You must be willing to be an active member of the group and participate in group activities & contributions. We expect applicants to be truthful in their applications. Do not contact the leaders or the group owner regarding the status of your application. Applying via userCP instantly gets you into the groups' blacklist. Good luck to everyone who intends to apply!

Tyranus. - November 17, 2015, 12:06 am

Shadow's Legends Application

Who Am I?
Name: Shadow
Skype: vile.bg

About Me

My name is Shadow. I am 17 years old, and I live in Los Angeles, California. I currently attend high school (11th grade) where I'm the president of my school's community service program, tech academy, and the Vice President of the performing arts program. I'm currently also a registered Eagle Scout, with about 750 cumulative hours of community service (this can be proven).

Sometimes I like to joke around a lot, but I'm actually a very responsible and determined person, not to mention a leader. One of my biggest and favorite hobbies is starting different fundraisers/service events and other ways to help and benefit the community. My other hobbies include tutoring in math and physics, programming (C#, F#, Haskell, Python, Node, Ruby), producing music, and playing water polo. One thing I forgot to mention earlier is that I am the team captain of my school's varsity water polo team, where we currently rank #8 in our division. The reason why I want to join legends is because I feel the group has a lot to offer in terms of contributions and well-roundedness, and it's something that I want to be a part of, especially if it means working alongside great leaders such as Mesh and Raymond.

I am a Passionate Programmer Known Languages:

HTML
CSS
PHP
MYSQL
Javascript/JQuery
Node.JS
Ruby
Ruby on Rails
Python
Haskell
C++
C#
F#
Swift
Swift 2
Objective C
Java
GoLang

Process of Learning:

C
Rust
CoffeeScript
Lua
Pascal

My Accomplishments:

<http://chatango.com>: I am not the owner nor the founder of chatango, however I have been a head developer there for 3 years now. All of the tag servers are written by me in GoLang.

PyBB: I am a part of the PyBB team. PyBB is a forum software written in Python (Django framework).

App Dev: I am an iOS and Android application developer. I will not list my current apps in the store due to my identity possibly being revealed, however one application that I was in charge of developing is the Chatango app which is currently available on Android devices only. I currently develop with swift for iOS and Java for android.

NullCTF: a global online "capture-the-flag" hacking, websec, & coding competition with amazing prizes for the top hacker. This event will go live in 2016 and I am the head developer.

DBHacks: Last year, I co-hosted one of the biggest "hackathons" in Southern California, and this year (2016) i'm taking initiative to completely take over. This event will bring together over 1,000 people from around California to an event center for a 24 hour competition where they will build and

compete.

Project Nexus: Previously known as myBot, Nexus is a project that I started when I was younger, but it's something that i've been working on for quite a while now. Nexus is a full fledged moderation bot & AI that supports many platforms such as IRC, Chatango, Facebook Groups & Chat, Skype, and other features available on Twitter DMs & XMPP.

My Certifications:

I currently have my Sysadmin certification, which I received almost a year ago.

Thank you for reading, I will stay active and I will contribute a lot, you can expect great things from me :)

FRANKIE - November 17, 2015, 12:09 am

I am Frankie and I used to be in the group, the only reason I was kicked is because of an in activity check that I missed. If I am accepted back I will definitely be willing to hold myself accountable to not miss it again and keep up and up with whatever the group has going on and participate and contribute whenever needed.

Incendiary. - November 17, 2015, 12:12 am

Legends is an incredible group to be in. Put some effort in to your application! It is worth it.

Velocity™ - November 17, 2015, 12:13 am

Goodluck to all of those who get in, indeed an incredible group to be in. =]

SIM-1472133 - November 17, 2015, 12:31 am

Good luck to all applying, Legends is a very nice group.

Aliien - November 17, 2015, 12:40 am

This application is damn good. You should get accepted.

Vector.A+ - November 17, 2015, 3:42 am

The name is steel , max steel and I am a hobbyist developer from Greece,My main target is Windows os and system oriented stuff ,some malware stuff too , I would say I am white hat as I dont do illegal things , only testing on my own pc.My skills are some decent C# knowledge and now I am learning C++ but I have also been working with : Python/C/VB.I love coding and I would love to

interact with awesome coders and awesome mebers in general, I try to help the community with some simple tuts and compilations, I think the group will give me an opportunity to do more. The problem is I dont got much time , but, I will try to be as active as possible. I think that we will be able to help each other and the community in the group and we are going to have a great time, I would love to be accepted, Since it is one of the best groups to be in.

Greets

DaFreak - November 17, 2015, 7:55 am

Would love to see more faces within the group. We're a tight-knitted group full of talented individuals except a few Indian fagg0ts which you can just ignore. ?

NoHax - November 17, 2015, 8:01 am

Really guys, the only thing i can recommend you is to take your time.

Text formatting and general grammar gives a generally better impression.

When i made mine i made it over two-three days, and listened to some music and constantly edited it in draft.

Really recommended group, we may be underestimated.

@NEGRO - November 17, 2015, 8:24 am

actions speak louder than words.

can't possibly think of spending that much time on school essays i don't know why i would for a group with no potential benefits. I remember some groups claiming they were "this and that" and it ended up being an elitist group essentially.

NoHax - November 17, 2015, 8:28 am

I actually didn't spend that much time, i was just thinking about it.

When i had more ideas i added it to the thread.

Legends really does bring new friends and good possibility to e.g make some money and such (It brings more things).

Raymond Reddington - November 17, 2015, 8:28 am

PS :- Also I find your post irrelevant on the thread. Post only if you have to apply. No BS please.

I didn't mean to come off as condescending I just was commenting on the fact that you might give some users the wrong impression that they need a lengthy, verbose, app which is filled with circumlocution when really just showing your products/expertise in action is much more effective.

Raymond Reddington - November 17, 2015, 8:45 am

(Nov 17, 2015 09:41 AM)N??EGRO Wrote: [\[CITE\]](#) I didn't mean to come off as condescending I just was commenting on the fact that you might give some users the wrong impression that they need a lengthy, verbose, app which is filled with circumlocution when really just showing your products/expertise in action is much more effective.

Here's the thing.

You get into a group on some terms. One of the most basics is you helping and contributing in group's cause. We expect dedication from you in the first place, and if you do not show that in application, I feel its not worth giving you a spot.

I don't know what groups you refer to by your statement, I speak for Legends and Specialists only.

Good luck. ?

-zERaiT - November 17, 2015, 9:31 am

how did your hacking section worked out? i was really hoping to see something good comming out, but haven't seen a thing.

Raymond Reddington - November 17, 2015, 9:39 am

The member who volunteered for it went on vacation at first and then quit looking after that thread.

He isn't in legends now.

nique ta mere - November 17, 2015, 9:53 am

hello I would like to join the group because I am true Legend

Stixio - November 17, 2015, 10:07 am

Who are you?

RainObeyyy

What are your skills?:

Gaming

Money Making

Spreading

What do you like to do?

Play games, for example CS:GO, that one of the PC games that i play (Mostly). Get new friends on HF. Love helping, Used to be support for a rat on hf, and did it all for free, Help=care

What can you contribute?:

Spreading methods, Giveaways (Award's e.g) tutorial and alot of cool stuff!

@NEGRO - November 17, 2015, 1:07 pm

(Nov 17, 2015 09:45 AM)Raymond Reddington Wrote: [\[CITE\]](#) Here's the thing.

?Cyber - November 17, 2015, 4:06 pm

Name: Ryan

Alias: Cyber

Past project experiences:

[\[\\$15\] >> Cyber Crypter << | FUD | C++ | .NET & Native | USG | Persistent | Startup](#)

[\[ONLY \\$60\] >EntryHTTP< ||C++ - 32KB||Ring3 Rootkit||Stable||FUD||High Exec Rate](#)

Current Products:

[>CYBER DROPPER || SCANTIME & RUNTIME FUD | 3Kb | NATIVE | CHEAP | PP/BTC/LTC< -](#)

Partnered with Incendiary in this.

Why I'm applying:

I feel like joining legends would be a great benefit for me, as well as the group. I hope to build strong relationships, whether they be personal or business with other group members. As well as bringing many different skills, and a positive attitude to the group.

What I can bring to the group:

- Marketing experience, as well as some knowledge about it
- Coding experience, I'm able to help some beginner coders learn C++
- Positive attitude, people often underestimate how important it is to have a positive attitude towards anything, it's most important in learning.

Sections I'm active in:

- Primary/Secondary sellers - always looking for ways to make profit
- Lounge - sometimes I need to lay back and read some of the shit posting, never fails to entertain me.
- C++ coding section, always nice to learn some things, and help others whenever I can.

About Me:

I'm a funny and laid back guy, I don't really have any problems with people in general. I'm a friendly person and fairly relaxed most of the time, and I'm always willing to help people whenever they need it. My Skills and hobbies include: Programming and Marketing. I was born and raised in the United States of America, my parents are both from India. I understand that if you want results you have to work hard. I'm more than capable of helping others out in various aspects of school, or even general life advice.

Good luck to other applicants!

The last time I took you in myself, I didn't see what I expected from you. I see no reason why I give you a second chance unless exceptional.

Hanks - November 17, 2015, 9:20 pm

Hello. I'm Hanks and I live in New York. My name is taken from the actor, Tom Hanks. He is my favorite actor and I aspire to follow in his footsteps of success, but also his way of maintaining his humbleness. I am a big fan of movies and my main goal is to get some sort of job in the movie industry, whether that is being an actor, a set builder, a cameraman, or even the guy who sets up the food table for all of the workers on the film. I just want to be involved somehow in the process of making movies. If that isn't a possibility, my backup plan is to become a police officer. I am currently going to a community college in my area to get my associates degree in Criminal Justice. A little fun fact about myself is that I am big fan of the television show Jeopardy. I actually took the online test

and was called to come to one of their auditions to be on the show in New York, but I didn't end up doing it because I never expected to even be called. I regret not taking the opportunity and I am going to take the test again this upcoming January, and if I get called again for an audition, I plan on actually going this time. In becoming a member of this website, my intention was to buy and sell stuff, because a friend of mine from a separate forum said this site has a large active market. I tend to buy and sell a lot of video game currency, so that was the main reason I joined. After being on here for only a few days, I noticed there is a lot more than just the market and I posted in other sections such as the lounge and the education section. I actually posted a video on YouTube teaching a member how to solve a math equation he was having trouble with. That's about it. I don't know if I am what you're looking for in your group, but I thought I would just post an application and give it a shot. I hope there wasn't any specific format I was supposed to follow, because that is what I read on the introduction page, and also because I didn't see one. Thanks!

hello im legend put me in

Optimization - November 17, 2015, 10:45 pm

Hello I would first like to congratulate you on your new group!

My biggest priorities right now is CPA marketing(cpagrip/crakrevenue) and running a forum(royalforums), I also dedicate a small amount of my time playing a few video games(Heroes of newerth, Mount & Blade).

I would love to become part of your group as I see space for a person with my skills, not only do I know a hole lot about IT in general, but I also did a lot of hacking/cracking in the past and everything has always worked out well for me because I always took the time to do my research and work hard to achieve the goals I set for myself, I believe any goal I may set or the group may set for its members I can fulfill, I will be contributing not only time but also money(if I can spare some) and energy trying to help out as much as possible bringing this group to life and getting it well known as the "Legendary" group it one day will become and already is in some aspects.

Thank you for reading my application and good luck to all others!

Maxi - November 19, 2015, 5:44 am

Legends Application

Introduction

Hello and thanks for reading my application. My name is Max and I go by the name Maxi

on Hackforums. I've been on Hackforums since early 2013 and I've been on and off ever since, there is something that keeps me coming back and I would like to do the best with my time here. I am currently studying graphic communications in Sweden. Sweden is also where I live, if you notice any flaws in my text, that's probably why. If my application is long it is because I need to write off my fingers as I do not have any homework I do not write a lot more than on Hackforums. In my application you will find all the information about me that I can think of while writing this.

Contributions

So far my contributions are not that many but I have done a few ones and I am looking to do more in the name of Legends if I get accepted into the group. The only thing I am a little specialized in is graphics.

Down below are the things I've done so far, nothing special really.

<https://hackforums.net/showthread.php?tid=4887270> - Signature Service
<https://hackforums.net/showthread.php?tid=4672856> - Graphics Service
<https://hackforums.net/showthread.php?tid=4175450> - E-Whoring Pictures v3
<https://hackforums.net/showthread.php?tid=4346770> - E-Whoring Pictures v2
<https://hackforums.net/showthread.php?tid=4346782> - E-Whoring Pictures v1
<https://hackforums.net/showthread.php?tid=3769220> - Mario Deface Layout

My skills

Well, I am not the best at anything, I am not the best hacker and neither am I the best graphical designer but I am always doing my best. As I live in Sweden and English is not Sweden's mother tongue I think I am above average at English in Sweden. This is just a thought but if someone wants a guide written and designed I can do both the writing and graphical design for it. Also in my graphics class I study a lot of fonts and what the reader thinks is the most satisfying font to read, I can always try and make it as simple as possible for the reader to read. Most of all I am looking to learn and have fun, I think there are many high skilled individuals in the group Legends and I think I can learn a lot of things if I get accepted.

Why choose me?

I think you should choose me because I am nice and active and looking to learn and contribute. For example if someone needs help with something I will try my best to help them as much as I can with everything and anything. I think I would benefit a lot from Legends and I would really like to get that chance, to become a smarter individual. As you can see my long and well-formatted application I show dedication and that's the reason why you should choose me. I as a person is not like everyone else either, in-fact I've taken some WISC-tests and I got very nice results. For the ones that not know about WISC it is a test where psychologists make you do a lot of stuff and after that they determine your IQ. I got the score of 139. I am not the best at using my potential and if I get into Legends I hope I can use my brain at its full capacity. By the way, please do not dox me, there are only 0,5% in the world with the IQ of mine or better. Just do not think that I am some kind of superhuman, because I am a "normal" human. I hope to have a lot of fun with you guys.

Also, for the one who want's it the most in the group I can giveaway a free drawing.

<https://hackforums.net/showthread.php?tid=4798579>

Please let me know if there are anything more you would like to know about me.

Thanks a lot for this chance, with the best regards, Max.

Prince™ - November 19, 2015, 6:38 am

Hi I'm Prince. Been a member of the forum for 4 years.

I'd like to join your group and be an active member of the group. I may not be a very popular guy but I've been around this forum for a lot of time. I believe I do know decent knowledge about HF. I'm also a gamer. Currently playing League of Legends, Cs:Go.

?

Delirium™ - November 19, 2015, 9:19 am

Delirium™'s Application for Legends

Who am I?

My name is Nikolas and I am 21 years old. People know me as Delirium, Del or Nick. I've got no preference over the previous names, I accept any of these. I come from Greece. This probably means that my application is more full than my wallet but it doesn't matter! I am a self-aware person, who has a passion for programming and developing. I am a dedicated person to whatever I do and I believe I can share my knowledge and my company with the Legends! Some of my personality traits are tolerance, patience, dedication and a good sense of humor.

Why I decided to apply?

I decided to apply the moment I realized that the group consists of high quality members with a proven past work and prestige. To be honest, I admire the work of MeshCollider and his entire contribution to the forum. However, this is not the only reason. I believe that I finally found something where I could learn from and give back. I've been in numerous groups but they were either dead, not as high-quality as I assumed or not active at all. I believe that this is my chance to find what I need. As I believe in mutuality, I always give back something whenever I receive and vice-versa.

What is my skillset?

As for programming skills, I am mainly a C# programmer but I can also write in Visual Basic. As you can probably tell from a search, I am active in the .NET Section, either helping people around or releasing stuff. That's not all of it though, I am an intermediate C++ programmer but I have not been active in the associated section a lot. Apart from a couple of releases, I am mainly visiting the C++ section to gain information or help anyone to the best of my abilities. But this is where my C++ knowledge ends. I am still learning however, which means that I also get to practise a lot. As for website development, I am an above-intermediate PHP programmer and I have knowledge in the Laravel framework as well. Although I prefer vanilla PHP, sometimes I work on a framework to provide a better service with less work. As some wise person said; work smart, not hard. Except for PHP, I can also code in Javascript and of course, I know HTML. I suck at CSS to be honest.

What are my contributions to the forum?

I have helped many people in the .NET section and I have released a few things that provided useful information to a large amount of beginners. My prime example is the C# example crypter source I released a year ago:

[\[C#\] Example Crypter - A crypter example source code](#)

[Aeonhack's Tab Control recreation - Converted to C#](#)

[ProgressBar control with text / percentage!](#)

[CoreFTP Password Stealer \(With password decryption\)](#)

[Adding resources to a compiled binary with Mono.Cecil](#)

[Upload to Pastebin class](#)

[Asynchronous Wininet client wrapper \(C++\)](#)

[QtLuaPad - An application I've written for editing LUA files! \[Using Qt Framework\]](#)

-

Apart from those, I've been added numerous times on Skype from random people around here, asking me to help them over various matters. I helped all of them, patiently and friendly.

Any final comments?

I am planning to help Legends to the best of my abilities with anything that I can do and I believe that the group will help me back, by teaching me things. I believe I will be a useful asset to the group and I won't let you guys down as I haven't let anyone down in the past! Thank you for this chance.

Deany - November 19, 2015, 9:21 am

I'd like to join because I am a fairly active, and a respectful member. I'm fun to be around, not a toxic individual. Would love to join the group. Thanks.

Disparity - November 19, 2015, 4:42 pm

Hello there. I'm Disparity. As you can see, I'm an unupgraded user with little to no rep. I'm going to hope you don't really care about that.

I originally came to the forum to improve my hacking skillset. To be totally honest, there hasn't been much of that. I haven't really made any friends on here, and I haven't seen the HQ content I was after when I found HF. Hell, I even won a fake contest, so that sort of sucked. However, I did discover I love teaching others what I know.

Though I've had inactive bursts, I try to stay as active as I can. Being a student it's hard to spend much time on here. However, when I can get on I am most active in the Website Hacking section. Not learning, because unfortunately there isn't much there to learn, but helping others learn as much as I possibly can. I also frequently find myself flaming there due to all the selfish and immoral skids with kali that frequent there.

I got myself into Elusive a while back too. However, due to school I couldn't be on very much, and understandably that was over quickly. I did learn quite a lot in there and I have continued my learning using the resources provided there, and I am very glad I was in it regardless of how short the time I was in there for.

Now for my skillset. I'm a what I would call a beginner, though I'm probably more skilled than a lot of the self-proclaimed 'skilled hackers' on here. Regardless, I spend a decent chunk of my free time studying and programming with PHP. So far I've programmed multiple sites in the name of learning, plus it's just nice to know for web hacking, especially as it allows me to understand threatening code for a lot of the big vulnerabilities, which helps me understand not only how to protect against but to understand the big vulnerabilities. I am also decent with Graphics, but I mainly focus on hacking and programming.

As I said earlier, I haven't been able to learn much and I haven't really made friends on here. I guess that and another opportunity to help teach and instruct is the reason I want to join Legends. It seems like a fantastic opportunity which I think could be mutually beneficial.

Anyway, that's all I have to say for the time being. Below you can find the guides I've contributed to the hacking sections so far.

[\[TuT\] Setting up DVWA w/ XAMPP \[w/ Pictures\]](#)
[>>> \[Mega-Guide\] How To Become a Skilled Hacker \[Must-Read\]](#)

"more socks" - boxxy

The wind blows,
reminding the sock,
it's all alone.

Abandoned,
by itself,
poor,
dark,
sadness..

but then,
what's this?
another sock, in the mist?
it's getting closer,
and closer!
and
oh wait socks can't move...

alone again,
but from afar..
the socks,
were left,
apart </3

Boilable's Application
Name/Country:
Steve, the Netherlands

Why do you want to join Legends? Cause I've seen pretty high quality members in the group which seem to have alot of the same interest as I do, that makes me want to be in the group. I've never been in a group and thought that this would be a great oppurtunity.

Skills:
Graphics
E-whoring
Gaming

I may not be the best in these skills but I've been doing alot with these recently. I can provide alot of high quality tutorials. I'm currently learning alot on other things such as hacking. I'm down to learn alot of things, hope that people in this group can help me towards my journey. I'm a fast learner and I have alot of patience, doesn't care if it will take alot of time.

Why did you join Hackforums? I had to do it on my own 2 years ago and I really wanted to make money and this forum pop'd up when I searched it up on Google. I tried the forums and saw that it was pretty active, I never left since then, I've been inactive but cause of personal reasons. Guess what, Hackforums actually helped me making money. I've been digging in the money section and tried out all of the methods, I added a twist to some and it seemed to work, so big shoutout to the people who share these methods cause they can actually make you money.

What can we expect from you? I can provide alot of high quality tutorials towards the group and the forum itself, I've made alot of methods which I was going to sell but nobody seemed to be intrested so I can give these away. I can also do mentor classes within the peopel of the group for free since I'm having alot of free times in my hand, I'll be a great member, that's for sure.

Thanks for reading my application, hope you have a good read. Good luck to all the other applications.

KekSec - November 20, 2015, 10:14 am

May check this group out sometimes, good luck to anyone applying!

Walt Disney™ - November 20, 2015, 10:25 am

I don't feel like spending 30 minutes to make an unnecessary fancy application. I'll keep this short and sweet.

I basically would consider myself a Marketer. Money is literally to be made everywhere you are, and with anything. I've been milking on HF for awhile now, and have made quite a bit of money.

I have a few skills, but won't go into huge detail. Feel free to let me know if you need info. I've been doing small time SEO work for myself, and a few people I know. I can rank anything on google, and do it way cheaper than competitors. I do it for free to those I like (Anyone in Royalty gets my services). I have many paid tools.

Another skill is finding money makers. Since anything can be milked, it's hard to find what makes the most profit. Of course saturation will, or could be happening. I started exchanging BTC here before everyone realized how easy it was, and how little of an investment you really need. I was buying \$100+ BTC a day at 1:1 and selling it at 15%. Making an incredible buck. I should have started selling on Local Bitcoin. I could have probably had a full time job selling BTC. Once saturation came to exchanging I was profiting around \$5,000. I of course blew a ton of the money on my computer, and to fix my car.

I have more, but extremely tired at the moment. I might come around to this again.

sp3ctrum - November 20, 2015, 12:48 pm

About Me:

Hello, my name is sp3ctrum. Just to keep it short and sweet, I'm really just a simple guy who has a love for technology and computer security. I started programming when I was 15 and just took it from there. One thing hasn't changed after all this time though, I'm still with my roots HF. I'm located in the United States of MERICA, currently working in an industrial plant managing industrial control systems. I have my bachelors in computer science and and two certificates (COMPTIA A+, Dell

CSSA). Hopefully will be able to get more once I have the money and time!

Why I want to join Legends?

From what I've heard Legends seems to be a pretty cool and chill group to join! Currently looking to get into a group where I can discuss topics of interest with others who enjoy learning the things I do. I believe I can really help Legends out by teaching other members, and hopefully learning some new things along the way for myself. I would just really appreciate being in the group and will be 100% active. Thank you for reading my application!

Regards,
sp3ctrum

x0n - November 21, 2015, 2:52 pm

Hello I go by the name One_Freed0m ?

Well since everyone are making fancy posts.. I'll just make mine simple.

Why choose me? well I love to help the community in anyways that I can, Im pretty active here on HF and I visit all the forum parts ^^,

Any questions feel free to PM!

- Your Friend One_Freed0m ?

SIM-2263652 - November 21, 2015, 3:51 pm

I am a legend, because I choose so. My world is the perception what my brains makes it. If I choose to be a legend, then I am.

I will not make a fancy application, because that shouldn't matter. Strong mind is what I have. Not going to write a long list about myself. That is not important. What is important, is my mind. Nothing else. Sounds arrogant, but that also is just an illusion. Nobody is humble nor arrogant.

Thank you.

PS: I don't seriously believe that I am going to be accepted.

NoMercy - November 21, 2015, 3:57 pm

NoMercy's Legends Application

Who Am I?

Name: I go by NoMercy or for short, just Mercy.

Who am I and why should you care?

I'm a young computer enthusiast that has worked in many areas such as RATs, Spreading and low level shit like that to marketing, CPA, web exploitation marketing and just generally making money. I'm soon to be purchasing Linux VPS so that I can learn new forms of hacking and have a good environment to do it in. Why do you care about all this though? As a knowledgeable member of hack forums I would be an asset to your team. I am fast thinking with my own initiative that makes doing projects with me quick and effectively done. I have been successful with many of my own projects and I'm even running two successful projects as I write this. What could I help with? I could help with a lot of areas from anything tech related to marketing and advertisement to even manpower and managing the people on a project.

What sets me apart from other HF member?

The answer is simple, I can handle my shit perfectly. If I can't do a project I will tell you but 90% of the time I can be juggling about 3 project while they are working well. I normally strive to make things autopilot to help with activities so I have more time to think about how to improve each project I am running, obviously some bits won't be autopilot but I can work through the grind and get to my end goal easily.

Thanks for reading this, hope to hear back from you and if not:

Meh I'll edit my application and add more stuff to it in a bit

Timrspk - November 21, 2015, 10:12 pm

Tim application:

My name is Tim, I'm 15 years old, I'm really motivated to learn about hacking, coding and marketing.

I had multiple plan such as selling ewhore packs, offering services like powerleveling in runescape. My problem is that I never finish a project, I always find a way to give up. My next goal would be to become a profesionnal photoshopper.

I live in Canada, in the frenchzone. However, as I'm in a private high school in grade 10, ildont have alot of time because of all those minister exam coming and all.

English isn't my first language, but I'm trying to be as HQ as I can.

I learnt alot of thing since I joind hf couple months ago, such as alot of basic knowledge as ratting, ewhoring, alot of tricks, photoshop (got the app only), make thread design and i'm really grateful about it.

But my goal now, would be able to start programming things, to be able to make software, to be able to code in c++, php. I probably dont know anyone in Legends expect trh4ck probably, since he is french. :'). Hopefully, this isnt a turn off. How would i contribute to legends? I'll be sociable, be pasionnate in the programming sections, by helping others the best I can, and requestion for help also!

Right now, i only learnt html5... :(I'm a really sociable person, I love to talk, give my opinions and feel to be apart of something.

If I had a chance in Legends, I'd be really thankful to all the members of the squad.

Please give me a feedback on my application as it is my first one. I've been a skid, just like everyone, i joind hf to make money, but i found myself into a great community which you can develop your knowledge and skills.(I will give my skype via pm, if I get accepted). Wish the best of luck to everyone! ?

Xepher The Cat - November 21, 2015, 10:44 pm

Hi, I don't really include much in my application except about myself. I'm Xepher and I'm 16 years old. I'm very motivated about school and I'm a dedicated worker. I like playing League of Legends on my free time. I enjoy doing collaboration projects. I don't have much experience but in SST and little bit in hosting, but I hope you'd consider me.

admin for their group is very immature

it's as if they feel threatened by those with better english speaking/typing capabilities

i do not set a good example of this

Timrspk - November 22, 2015, 6:25 am

In case you guys didnt see my review, mind giving it a look? :D thank you!

.Cynical. - November 22, 2015, 8:05 am

I'm Cynical, The main reason I wanna get in the group is to get to know everyone I, I have seen the AMAZING stuff this group has done and I for one am VERY impressed.

For my skills I mainly am good with SE in any area rather it be e whoring or selling stuff I'm your man ?

Really there isn't much else for u to know about me I mean I learn quick and follow orders if that counts.

I know I'm not getting in but at least I can say I tried ;)

Anonymous• - November 22, 2015, 8:26 am

I am Anonymous, I am a Legend which needs a usergroup, so invite me.

Thanks.

BTB™ - November 22, 2015, 10:14 am

Introduction

Joining HackForums was a fluke! Actually a Google search landed me here. But, it was love at first sight. You see, you can very well identify a well moderated forum in a short time span.

Now a bit about me, I have done Bachelor of Engineering in Computer Science and have around 15 years of experience in technical support regarding networking and general software related issues. Have also worked for SBC YAHOO! ISP support for modems and routers. Including email software testing.

The favourite thing I like about LEGENDS is the flood of knowledge that flows here that gives an opportunity to LEARN & EARN.

I would like to add that I have been contributing to the HF community from the very beginning of my tenure. It can be in the IT section, suggestions for improving HF, Giveaways, In lounge chatting with my friends, Gaming and last but not the least in the Monetizing section with some unique earning methods.

I earned L33T, UB3R & 3PIC by winning competitions only! I can easily say; HF is my second home now!

Final Words

It would be an awesome experience, if I get a chance to join this esteemed group LEGENDS! A dream come true!

I guarantee -

- I would be a super active user.
- Devoting long and productive online hours.
- Full dedication towards the given assignment.
- Quick learner.
- Efficient and quality work guaranteed.
- Would deliver the work in desired TAT.

Hoping for a positive revert from your side. ?

Fish - November 22, 2015, 10:49 am

Fish's Application for Legends

Who Am I?

My name is Fish and i am 16 years old, i'm from north america and to be more precise, i'm from Canada. You might think that i'm too young to join this group, but id like to counter that. I act like i'm much older and you wont be able to tell that i'm 16, you'll think i'm 20, i'm pretty responsible, and organized so i don't lose anything. I like playing video games, and once i start something, i need to finish it. so if i take on a project, il stay up in till 2 in the morning every day to get it done.

About Me

My name is Fish. Im 16 years old. Im a full time student at high school. Im that one nice guy that everyone would like to talk to, honest, respectful, and a caring person. i pretty much work with everyone, never had really any big problems with any people before and i am always willing to help someone if they ever need me. ive worked in many teams before so i could start up some projects in the things in the group and id know how to run them/how everything would work. again the group has high quality members and it would be a honour to work with them (or even be in the same group

as them).

Why I Want To Join

I want to join the group because i feel like the group has a lot of things to offer. i think that its something that i would want to be apart of. the leaders are pretty chill and id like to talk to them more and get to know them better. another reason why i want to join is that i think it would benefit me, id make some new friends, build up some relationships, and i can bring some skills to the group as well. the owners both have done some pretty cool things for the forum (suck as Mesh for doing OMC), all of the groups that ive been in were low quality, not active, or had over 200 people in it. it would love to join this group since its not like any of those other groups that have a lot of people in it, lq, not active, etc. i think this would be the right group for me to join.

Forum Contributions

These are just some of my contributions to HF, ive done some small things to people when they pm'ed me, or when someone posted on a thread i helped them. or even being a middle man for some people.

Did you really bump your application? LMAO

Corrode - November 22, 2015, 4:36 pm

Who am I? I'm Rogue, a teenager from the United States. I enjoy being on Forums such as this one, meeting people and making friends is the best part about it. I'm currently in a trade school taking an IT course, and going into the Military once I graduate. I've recently started using HF again and will be as active as I possibly can. I have a bit of knowledge in everything, I may not be the greatest "coder" but I'm willing to take my time and learn as much as I possibly can. I feel like me being in the group could benefit me and hopefully the group. I would help any members of the group and on HF if needed. Thanks in advance for reading my application I wish you all the best of luck!

Matt Bomer™ - November 24, 2015, 12:41 am

Good luck to everyone. A great group to be part of.

James Burnham - November 24, 2015, 3:33 am

Darth Burnham's Application

General info:

I am 26 years old and I live in Greece. I stumbled upon hackforums.net while in search of an exit from unemployment. In order to prevent any future doxing of me I would be more at ease if I could provide any more information, you may want, privately.

Contributions:

[E-Whoring Intermediate Guide & Helpdesk](#)
[20+ HQ, E-whore Picture Packs](#)
[E-whore Skype Group](#)

Goals:

I see myself extending my existing threads and giving mentorships based on moral criteria while at the same time investing in my knowledge around tech, hacking and monetizing and hopefully writing threads about these topics too!
In truth every day in hackforums I learn new things and I get new ideas on a constant basis. So I can't say for sure what I will do in the next 6 months, but I can say for sure that I will do lots of stuff!

Joining the Legends:

The Legends is surely a resourceful group with a good work ethic. I think that joining the Legends would be a way for me to get more educated, on the one hand, and more motivated, on the other hand. I notice that when you belong to an exceptional group like Legends you feel a pressure to improve both your work ethics and your knowledge and I think that this is crucial to one's improvement.

Should you pick me?

You should pick the members that you feel that can represent the Legends in the best way possible. The Legends is one of the groups that provided the forums with some quality material. If you think that I can provide quality material as well then allow me to join you. If not, a piece of advice on how to provide better material would be nice too! Thank you!

I would love to join this group of HQ individuals to add to my collection of groups. I can contribute my nudity to the group, let me know!

PurpleIsAColor - November 26, 2015, 4:33 am

Why am I applying??
I'm applying to the Legends group, because it feels like a nice group.

Contributions to the members of the site is extremely important, at least to me. Not only financially, but also by giving deep and important advices, which can help users with their future.

I wanna be a part of something special, where I'm able to connect closer with members on the forum, than I've previously done.

I feel like I am ready to take the next step, and start to take HackForums in general more serious.

Contributions I've made to HF[\[#1 Purple giveaway\] LET IT RAIN WITH GIFT AWARDS!](#)
[\[#2 Purple giveaway\] LET IT RAIN WITH GIFT AWARDS!](#)
[\[POP3 Dictionary Attack - Miniguide with Ncrack/Medusa/Hydra\]](#)

What can you expect from me?
I'm young blood, but I still have a lot of experience. I can help people with so many things in life, while I still am a HQ person.

I grew up in the ghetto in Denmark, and managed to change my life in less than a year. Going from working at McDonalds, to running my own company and continue to increase every day there's going, is something special to me, and something I personally feels, is making me stand up from the others.

My life has never been a dance on roses before I started my company, to be honest, my life was shitty. But I gained a lot of experience, everything from how to pack cocaine, and hide it from the police, to appreciate every penny you have, and love without money.

All those experiences combined, makes me very special. At least in my opinion.

Why should we pick you over the other applicants?

As I mentioned above, I stand out from the others because I haven't been at one place my whole life.

I've moved around, and had friends come and go. It's not until a few months ago that I finally managed to cool down, and get my life back on track.

I guess you can say it's going pretty well for me at the moment, and I think that too.

I still wake up every day with thoughts flying around my head, and I'm still paranoid as fuck. I've always feared for my life, since I grew up where I did.

Sure, it may have made me stronger, but that's mainly because I'm raised to don't care. If someone points a gun at my face, I'll just say shoot, because that's how I'm raised.

Not sure how and why I should be better than others though, we all live on the same earth, on the same forum, and all of us have a different set of skills.

Anything else?

I would like to end my application by saying thanks.

Thanks for letting me apply.

Thanks for letting me write down some feelings I have.

Thanks for letting me have time to express myself.

And last, thanks for everything you've done for HackForums.

AnonymousBuffalo - November 26, 2015, 10:12 pm

Hi,

My names Buffalo. For a while now I have been looking for a group to teach and learn and hangout I have heard a lot about Legends and I feel like joining. I can not guarantee that I am worth it though I can tell you that I am a fun loving guy do not like bullshit and like HQ stuff I have created my own ebook which I shared to the public <https://hackforums.net/showthread.php?tid=5071583>. Truly I can't guarantee anything unless you talk to me upfront.

Sincerely Buffalo

DaFreak - November 27, 2015, 12:57 am

PM me with ur application for direct entry.

stackoverflowin - November 27, 2015, 2:49 pm

Username: Stack or StackOverlowin

Spoken languages: English

What are you best at?: I'm best at coding and exploitation. I run a successful coding service here: <https://hackforums.net/showthread.php?tid=4699095>

Experienced in: Coding, pentesting, server administration & marketing.

Programming languages (optional): PHP, C#, Python, C++, Node, HTML5, CSS3, mySQL, Bash, JavaScript/jQuery

I am more than willing to add contributions to the group, I contribute a lot to the PHP community here. I own a rather large Skype help-group which can be found here -

<https://hackforums.net/showthread.php?tid=4678305>. I love to help people and contribute towards the community. In my opinion, coding = power. It's such a valuable skill set to obtain in this day and age, everyone should learn how to code - I do my best to help people as much as possible when it comes to coding.

I'm 19 years old and currently living in the United Kingdom. In my spare time I like to help others to learn to code, it's a passion of mine. I take a deep interest in security; I read security blogs daily - it's terribly interesting. I'm currently studying computer security and forensics at University, I've only just started though. I know several programming languages which have aided me in all aspects of life in general - it really helps you think logically & methodically. It's helped me out so much in life that I recommend everyone to code.

Raymond Reddington - November 27, 2015, 10:37 pm

Added a new recruitment procedure. Now we are a little flexible over choosing applications. The chosen ones will be under a trial for 2 weeks and actively watched/monitored on multiple bases. We verify whether or not you correspond your on forum behaviour with what you mentioned in your application.

If you deserve, you get an entry.

TwistedTechnologies - November 27, 2015, 11:15 pm

Have applied some days back! However, have not got any revert on the status.

Hope, I get in to this esteemed group!

Hoping, no revert does not mean rejection!

StevesTrolls - November 29, 2015, 8:36 am

StevesTrolls' Legends Application

Who Am I?

Name: Kieron

Age: 16

About Me

My name is Kieron, and I am a 16 year old British Computing student. Some of my many hobbies are computing based, with them generally being programming based projects. I have recently started using my Systems Administrations in professional situations involving hosts I have worked with, which I owe to the influence and help provided to me in my early days on HF, and other information outlets online. I am currently studying towards a Computer Science, Business and Maths AS level qualification. I want to become a part of Legends to help provide my knowledge, and services back to those who are willing to learn. If accepted into Legends I will make regular informative posts, and will be happy to answer questions regarding my specialised skills and provide assistance.

BTB™ - November 30, 2015, 6:41 am

Wanted to suggest a new tag line to the group -

Hero's come and go, but LEGENDS are forever!

-zERaIT - November 30, 2015, 10:49 am

i'd like to remind everyone that voice applications will be instantly accepted.

PinkiePie_ - November 30, 2015, 6:56 pm

Great group! Goodluck with applications

Tyranus. - November 30, 2015, 7:35 pm

I have updated my application with information that I deem necessary. You may find it [here](#).

Wires - December 1, 2015, 5:30 pm

Hi there, firstly I would like to introduce myself. I'm Wires and my real name is Andre. I'm located in the United Kingdom but I come from the Caribbean. I have a devotion to coding. I am a versatile and open minded person, with a slight eagerness to communicate and work with others. I try to be the best at whatever I do, and I believe my positive traits can shed off on other members of Legends. I'm not the average applicant, but a tolerant, conversant and humble member of Hack Forums.

"Others toil their entire lives to make a name for themselves, some are just born LEGENDS."
- My interpretation of this quote wasn't as simple as I thought it would be. However, I thought it would be good to share my thoughts within my application to get a preview of my mindset. In my opinion, the quote expresses how the difference between people who just try-hard to be legends (relentless to say the least), and others are just naturally born into it. I also think it emphasizes on the point of it being a natural trait rather than a title. Anyhow, it does not stop people from pursuing this trait and/or title.

What do I hope to accomplish from Legends?

Simple. A broader diversity of other fields which others possess. I attempt to have at least a little knowledge in each field, I do hope others would be eager to teach (in a sense) and learn from their peers. I also wish to communicate with others members of the group as it's always nice to reach out to members. I also hope to establish myself in the group.

- I want to join this group as it just isn't the additional userbar. The group is well led by MeshCollidar. His dedication is shown through his contributions. I'm eager to see how the group operate and what goes on behind closed doors. It's not often I apply to be in groups, but the few groups I am in all have a great responsibility within the community. I always like to give back

whether it's within a group contribution or my own.

What is my skillsket?

My strongest skill is my ability to design MyBB themes, which requires for me to know HTML coding mainly, but I also know PHP and CSS. Although I mentioned that I try to have at least a little knowledge in at least every field. I have also had experience in the Remote Administration Tool's section, along with being among some great White hat helpers which I managed to learn a lot off of. I also have knowledge in the hosting and stresser field.

What are my previous contributions? [Hack Forums News](#) - I actively participate in helping to write, edit and proofread the news.

[Numerous MyBB help desks](#) - My latest can be found by clicking the left to the left.

[Another MyBB help desk](#) - My first help desk. This one being successful, I decided to go ahead and make the one you can view above.

[Another designing related tutorial](#) - Again, my passion is theme designing. Basic, but I released a columned footer style for MyBB.

[Reviews](#) - I attempted to aid forum administrators and website creators by providing feedback and constructive criticism.

I will now bring my application to an end as I wouldn't like to bore you. Whether I get into the group or not, it is one fascinating group. I quite enjoyed writing this application. Thanks.

hackersallin - December 7, 2015, 11:44 am

Hello! People call me Sallin and i am from India. I am in the hosting buisness but more then this "buisness", i like to help out people with my knowledge and i like to help them learn new things and in turn i also brush up my skills.

Why do i want to join Legends?

Legends is a highly reputable group on HF for their skill set. I just want to be a good utility to the group. I want to help members in whatever way possible and hopefully learn a lot through my stay.

What are my skills?

My strongest skill currently is towards website and vps hosting. What i currently do is not hard, but my future ambitions to expand and to register my company under my own is still underway. I have knowledge in HTML(and css) and C++. I have through knowledge about Botnets, Rats, SQLi, XSS, etc as well.

What are my Contributions? I have had 2 Bulletproof Hosting company and 1 Legal Hosting Company. I have helped tons of HF Newbies to start hacking. I help anyone who PM's me regarding anything or try my best to. I have wrote a Basic SQL Guide long time back for beginners (13 pages). I have made free Graphics for more then 20 HF users (including Signature, Thread Design, Avatar)(Thread Design for DataProtector v2 and others).

I might not have written as much as the other applicants, but what can I say, I am just a friendly guy who just loves to help and learn till the end.

Thanks.

iMinotaur - December 8, 2015, 4:07 am

Name

iMinotaur, tho I strongly believe that names don't matter.

What am I doing on HF?

Generally, I came to HF to sell stuff and chill with some members with similar interests. When I saw that these things called groups existed I thought that it must be great to have a shiny new UB under your name. As nooby as that sounds, personally I find the Legends UB to be AWESOME. Overall, I would give 5/5 legendary stars to the designer. I'm currently quite active in the marketplace as well as the lounge and the group section. I'm currently applying for only Axiom and Legends.

What makes me different than any other applicant?

I can't say that I'm REALLY overpowered over any other applicant but I am truly the type of person that likes to get things done. I like to get 100% out of any situation and am aspired to do EVERYTHING the best I can. I like to put in as much time as possible into any project that I make or anything that I do. I'm quite supporting and love HF. I like to help any other member that needs help (only if I actually am knowledgeable in the subject).

Skills

My skills are:

- Java
- Python
- C
- VB.NET
- JavaScript

- Graphic design
- Animation
- UB design

- Web design

Some of the other stuff you should know (IRL skills): Swimming, football, basketball, piano, guitar,

violin, math, English and physics.

About me

I am currently 20 years old. I dropped out of my 1st year of college when I realized how easy it was. I knew everything that the professor had to say before he even said it. I was the smartest in our class and got straight A's on EVERYTHING. I was studying maths and physics mainly which is why I stated those things above as my "skills". I like to get things done in general. I work fast and am helpful. I answer very quickly and I'm very friendly. I don't troll and am serious in things that I feel like I need to be serious in. Don't think of me as an all serious asshole (like the people in Cambridge for example) as I do like to joke around and be friends with everyone. I'm a funny and generous guy. I don't like seeing people in trouble and that's why I always help. EVEN if I need to give money to someone, if he/she is my friend or has been nice to me, I'll always (and I mean always) help them. Coding is my passion as well as design. I hope to get some good things out of HF and Legends.

My contributions to HF

I'm pretty new to HF so don't mind this small amount of contributions

- [Free building for any member](#)

- [Free programming](#)

What I will bring to Legends

Only the best of me. ONLY the BEST of ME. I think that's enough to say.

In the end

I think Legends is amazing and I really do hope that I'll get accepted. Thank you for reading this LONG application. It took time and effort so I hope it pays off. ?

McDolands - December 8, 2015, 12:06 pm

I won't be making any fancy post or any of that crap cause im a lazy fuck, but I am generally a very active member who has a few general skills, I consider my self to be quite good at cracking, manual sqli and finding vulnerable sites, I am decent at doxing and web de tracing. I am active as fuck, I pretty much talk at all times besides when I sleep. I can help out in whatever is needed and is happening inside the group. I also know basic java but I wouldn't consider that a skill at all really.

illuminati? - December 8, 2015, 2:50 pm

Name:

Jimmy

Username:

[illuminati?](#)

About me/How I joined Hack Forums:

Easiest way to start this off is; I'm Jimmy a/k/a illuminati, I'm 20 years old. I'm a Dutch-Canadian, I currently reside in Canada. Umm, a little bit about how I joined the forum; I joined the forum back in 2010 when a good friend of mine "Soulessfury," was talking about the website and recommended it to me :). After talking to him about it, I decided might as well give it a try, and sure enough I enjoyed it. I've been pretty active since I joined, I haven't really had a good reason to want to leave the forum, so yeah. Umm, some of my hobbies are; Listening to music, skateboarding, snowboarding, browsing Hack Forums, Playing video games (duh), and much more. If you'd like to know more, just send me a private message.

Contributions:

I'll list all the ones I still have (ended up deleting threads from back in the day on a drunken rampage, so my list might not be as big as everyone else's).

<https://hackforums.net/showthread.php?tid=5070122>

<https://hackforums.net/showthread.php?tid=2822119>

<https://hackforums.net/showthread.php?tid=1698438>

Skills/Knowledgable in:

I have a bit of knowledge in coding, but it's not enough to make a full on program, or anything like that. I am very knowledgeable when it comes to VPNs, as I'm helping another member here on hackforums with his VPN. I'm extremely knowledgeable when it comes to video games & consoles, and I think there's quite a few members here on Hack Forums that can vouch for that, (I can fix a majority of issues that a console may come across, I know how to modify games/game saves whether it be using a tool or Hex editing), I have a good amount of knowledge when it comes to "Stressers/Stress testing" the user known as [Red Sox](#) can vouch for that as I've helped him with some projects. I'm knowledgeable with programs like; "Logic," "Fruity Loops," etc.

Why I should be accepted:

I could be like the rest of Hack Forums, and make up a bunch of bullshit about why I deserve to be accepted. But, I'm not a fucking liar so I don't see why I would lie about why I deserve to be accepted... I mean you're either going to accepted me or deny me, all I can do is hope y'all accept my ass. XD

SIM-1230922 - December 8, 2015, 5:08 pm

I believe the ultimate factor when accepting someone and what makes a good applicant good is what they're going to provide to the group. I'm going to provide an active member with a big field of knowledge that will be reached. One of my favorite things is to learn, I believe that knowledge is power and authority. I'm currently studying science (mathematics, physics, chemistry) and I can speak three languages. I've been here for four years in Mars and that has also given me a preposterous amount of knowledge. I know everything from how to setup a DNS to RATting to making money, investing or all kinds of things. I like to say that I know a little about a lot hence why I would be a perfect fit for this group. If I was to be asked about what I know the most about is science, training & nutrients and making money. One of my biggest passions are working out.

I love knowledge hence why I love to learn and to teach. I'm going to provide knowledge and help to the group.

I'm also going to provide activity. I really enjoy socializing and getting to know others.

Choosing me over others is the right way to go because I will know a lot more than the average user on here and i'll be more active as well.

KING - December 11, 2015, 4:30 pm

[img]<http://i.ipixls.net/VpQq7W9.png>[/img]

Zombie [?] - December 12, 2015, 9:41 am

Hello Legends !!!! I am Hibernate from India. Well I am in Website Hosting Bussiness from almost 1.5+ Years. Also I was staff member before. I am very familiar with the servers regarding the hosting and how they are being setup, being Exploited and how to secure them from vulnerability.

Why do i want to join Legends?

Well I feel like I have the knowledge using which I can help a lot guys here. I can help starting their own companies. Also I can answer their almost all queries. Regarding Hacking, Anonymity, Android Developer, Website hosting, Server Security, VPS hosting and many more.

What are my skills?

I am very excellent in setting up servers for Website hosting, VPS hosting, Server side Security and other Plugins since I am doing this from a long time. I am good in SQLi and then started Advance SQLi, I dont like XSS but I am aware of that. I am good in RATs and used almost all reputed RATs, I am aware of botnets but I dont want to try such highly illegal thing (I don't like hacking people or so called black hat hacking/gray hat hacking. I am just a security adviser). Other than this I am good with the Android Development and I had developed 2 ROM (Custom OS from source).

What are my Contributions?

I love to help here on HF where? Specially in "Request for hacking section. It is the place where newbies come to HF googling "how to find a hacker". when they post, they get PMs from the ubers here and they ask for upfront payments and bamn. They get scammed for sure. I haven't seen a single successful hacking request complete there other than hacking or you can say it is the place where people get scammed easily. I PM those all guys and ask them to PM me while doing any transaction. I will check their profile and will tell them whether they should do the deal or not and many more like that.

I don't want to write the full pargraphs here. I am a ethical guy who likes to help everyone. I help people learning hacking and other stuffs which I can teach them. and I hope legends is big enough group and talented people than me so I will learn a lot from here too.

Thanks.
