Any vouch copies?

That video is pretty funny, those girls talking about terms they don't know :)

If you're giving away a vouch copy. I'd be happy in exchange to write out a nice detailed vouch review! I can assure you it'd be worth it :)

- if you're on edge about it, check my recent posts on the eBook section for my reviews.

What can I say.

Absolutely outstanding, astonishing.

There's no other words to describe this eBook! And I'll tell you this, I choose very carefully when writing reviews if I get given the chance what words are appropriate for what I'm reviewing. 2 words to describe this eBook outstanding and astonishing.

Why? 40 PAGES OF INFORMATION! I'm not sure if you've realised I'll give you a recap here but 40 pages of information on how to dox is hitting the jackpot, because it goes into depth with every single method possible for doing so! Compare this to them 2\$, 5\$ doxing methods out there that are titled as "simple" bla bla! Simple!? Simple is basically, use a Skype tool to find an ip then yeah. Now that you realised how bad a "simple" eBook for doxing is, you should've come to the right thread and spent your money on something well worth it.

I can assure you, I can promise you. This eBook is worth every bit of your money! why bother waste your precious money on a doxing service? Or a 2,5\$ method.

You sir have come to the right place visiting this thread because this eBook is the best it gets when it comes to a tutorial, you could learn it ALL

Honestly, I have being trying to find a reasonable doxing eBook, what I have come across is 2,5\$ ebooks. Who are made out to be "simple" I wasn't looking for that, I wanted something to improve my knowledge on the subject and coming across this thread was the jackpot.

IT COULD BE YOURS TOO! Get your jackpot for 10\$:)

- thank you for the vouch copy and a huge vouch towards this eBook GLWS sir!
