Updated: 12/9/2015

Changelog:

Spoiler [\(Click to View\)](#)

12/1/2015

Added in # of users to mention (1~5)

10/25/2015

Add in a brand new GUI which gives a extreme simplistic feel to the program.

Added in Follower Scraper

Added in Multi-Threading

Added delay setting - Allows you to set your own delay, I highly suggest 35 seconds to reduce comment bans from occurring.

Added in assigning proxies (This was in the old bot, just not as good as it is currently)

Upgraded scraper to be extremely fast, press the button for a split second and you already have 50 usernames scraped.

Follower Scraper currently under maintenance, will be back up shortly in new version this weekend!

From what I can read, his only scrapes followers of the IG user.

Mine will scrape comments on pictures; giving you a list of real active profiles instead of followers (which can be botted which will result you in getting less traffic due to targeting bots/fake accounts)

I'm going to have a follower scraper built in soon, but I saw no use of it due to it having the high chance of getting faulty profiles mentioned as opposed to real profiles (commenters)

Now, I'm unsure of how his program works; but, my program allows you to go as far as assigning a proxy PER account. Meaning you won't have to worry about having to have the same proxy used on 2/3 other accounts which reduces the risk of comment bans.

If you have anymore questions don't hesitate to private message or post them.

Okay, the only issue with that is that proxies are expensive if you are looking for high quality ones. I usually run a few thousand accounts which is why this wouldnt seem practical for me. I like how I can assign a proxy to a few accounts rather than just one. Would you show me a picture of the GUI as well

Excuse me, if you don't know how my bot works, then how can you assume my bot doesn't assign unique proxies to every account? If you knew anything, my bot also assigns unique useragents/proxies to every account. Not meaning to sales trash. Also, you don't need to pay a penny for HQ http proxies, and i highly doubt you have private software to scrape them/check if they're valid and working on IG. Lol. It looks to me as if you copied my idea and lowered the price as an attempt to steal all my sales. Anyways, have fun lol.

You can assign a proxy to any amount of accounts, I only suggest one per account as it reduces the risk of comment bans.

You're free to put them all under the same proxy, it's built for that and does allow it.

(Nov 21, 2015 01:58 AM)Trilogy Wrote: [\[CITE\]](#) ahaha i remember you telling me your bot uses like 5 or more accounts per ip so

Yeah, an old version actually never did that, it had logout functions if you knew anything. Now my bot uses cookies/cache instead of logging out. Heard of updates?? I bet you suckers are still paying for proxies or using shitty public ones. There's more to this "Mention" game than you know bud, and you'll never find out dealing with this bozo copy cat.

(Nov 21, 2015 01:59 AM)Roses Wrote: [\[CITE\]](#) Also have 3 or 4 of his customers who PMed me saying his bot doesn't do what he says.

Proooooooooof? Where is it. If they didn't post a vouch on my thread they aren't a customer. Just goes to show how much shit you talk but can't back up. I can talk shit too. Let's just say a "friend" of mine told me your bot was absolutely garbage and you didn't even have a GUI the other day. Is it multi threaded? Do you use mobile user agents instead of a browser? Better yet, does the developer you hired on hackforums even know how to make the bot use different user agents EVERYTIME a comments posted? Oh man. You crack me up. Just stick to e-whoring. I see nothing but friends you ASKED to vouch for you on this thread, not 1 actual person saying they purchased it/ it worked good. Non of my business though.

[img]http://www.cbc.ca/books/harper-coffee-584.jpg[/img]

Now here's exposing time!

Who Soup: Biggest skid known to man. He knew my friend Storm and didn't even know how to fucking code. Practically begged him to code him a comment scraper so he could sell it for \$1 on HF.

Ryan Reynolds: I hooked this kid up with an actual developer named Joe to get his "mention bot" developed. Without me, he'd have no bot and would still be buying those mentions off a website, which i won't mention here. Still paying \$200 a week Ryan? lmaooo

The other vouches, pretty obvious they're your friends or they would've left you rep as soon as they bought it.

Now, next time you talk shit, make sure you can back it up, because i can. Enjoy your shitty sales, and keep my name off this thread.

Unless you want this happening to your precious skype(s).

HIGH PAID FELLA - December 1, 2015, 4:03 am

Does the account list follow the same picking route as the proxies because that's important.
Also does it support socks5?

Thanks.

Edit: also any success rate of mentioning:following/like?

Nope, but that's why you're allowed to use the assigned account/proxy feature where you can assign the proxies to an account.

As for the Sock5, no.

Mind your own business, I don't use garbage scraped "http" proxies because they are garbage.
Noticed I wrote it twice?

Socks5 are for all kind of traffic so it doesn't matter but a retard like you doesn't know that obviously, I use socks5 for existing accounts so shut the fuck up before you even try to spit out

Yeah so I have to use my own accounts? Suppose that's fine but say I wanted to mention 10,000 people across 10 images (10 x 1000) how many accounts would you use for this? I imagine 2 accounts tagging 10k people in like 200 comments will get them banned and in turn probably get me banned haha.

Spamming mentions across a small quantity of accounts is going to get them banned really quickly. With the accounts I use I get around 200 comments in each but most of the time they're comment banned/2nd waved for PVA after 150.

That being said, you'd need roughly 50-100 of decent quality accounts.

Liscence always locked .. My username on NetSeal : dimi33

And I have some idea for your bot tell if it seems interesting!

Can you add in your bot "Random users mentionned " I mean user choose between 1 and 3 user mentionned and it choose between these and a features : "Random text with mentions" you choose a list of comments and it comment a text with mentionned people!

And randomized time between 2 times exemple between 36 and 50 seconds!

Look if you're interested or searching through threads related to mention bots this is the one for you! Grevious's mention bot is outstanding, there's no other words to describe what he has to offer here, at such a price it's a steal! Not to mention what the software is capable of doing, the possibilities are endless.

How could it benefit it you though? Think about it, what does a mention bot do?

It scraps HUNDREDS of usernames of whatever post/account you wish that relates to your account in seconds! Then every single one of those accounts scrapped is then tagged on your photos then simply watch all the interested likers/followers come rolling in! The possibilities of this program are endless. Want to start a company? Want to get an account to the top? 50\$ is literally jack shit for the amount of profit you could partentially make of the outcome of this.

So if you aspire to at the top, make some money, show off, have some fun with your overally populated instagram this is the one for you!

I gathered some funds and took a risk on this product, all thanks to Grevious constantly updating his software to fit instagram and most importantly your needs I am not disappointed, it has helped improve my instagram account by 110% It could help you too :)

Thank you once again!
