Thread: [Anonymous Releases Newbie "How-to" Hacking ISIS Guide](#)

TheModel - November 18, 2015, 4:45 am

Hello all,

So I came across this:

www.thehackernews.com/2015/11/anonymous-hacker-isis.html

But all 3 of the ghostpins links are down, does anyone have a copy of the ghostbin tutorials they released.

If so it would be much appreciated if somebody could share them here with me.

Thanks in advance.

ghostbin.com/paste/jrr89 Works for me. But the webpage seems to be under heavy load.

Just bear in mind how important anonymity is with a topic like this. If you attempt anything, make sure you remember that ISIS are not nice people.

Saw this as well!

Great to know AnonGroup has our back!

Haha, It was the original link. Found it in the link from ts ;)

I will take this as a compliment sir!

Do you do anything but post quotes?

KekSec - November 18, 2015, 2:57 pm

i cant get over the whole hacktivist isis acc stuff. its confusing.

skelly76 - November 18, 2015, 3:19 pm

For all you beginners getting all excited at this. Don't get yourselves in trouble, what Anonymous is

doing is still illegal at least in the U.S.

Also that is just a random tutorial of basic stuff and it doesn't even tell you 'how to attack ISIS'. Most of the cyber operations by Anonymous are confidential and not even the press have a clue what is happening, don't believe everything they say.

Well ultimately you guys can do whatever, but don't be stupid.
