Thread: [Suggest you to Read/Watch Kingdom.](#)

I have been a bit away from this section due to having barely any free time and when I do I'm busy with my cs go team but I managed to watch and read Kingdom recently and it was soooo damn good. I have no idea why anyone barely talks about it.

The first season has terrible animation with tons of CGI for the first 5-6 episodes but gets progressively better, season 2 has no CGI. The story is amazing and love the wars and character progression.

Definitely one of my favorite anime and up there next to the othe 10/10's in my manga section, right next to TG and Berserk

I'll definitely check it out. Honestly I was curious about it back when it was still airing, pretty sure I've watched a random episode where an old politician gets killed.

Thanks for the recommendation ?

Not sure which episode that is but endure the first 5-6 eps and it becomes awesome

Yep that's the one, it's amazing, especially the storyline and character development

Honestly found it interesting whenever an anime gets deep into other cultures. I love that type of anime.

How is the art in the manga?
I prefer manga with decent art.

Ciraze - December 1, 2015, 1:55 am

Yes I had to get over that CGI hurdle but it's such a great Anime honestly.

I think I'm on episode 3 and its bearable but my god the first 3 minutes of the first episode what are they thinking it looked like a potato created the animation.
