

Forum:[Hack Forums](#)

Thread: [Slowdown](#)

sqsgkrldwg - November 19, 2015, 3:59 am

Hi,

I'm having a slowdown on the forums.
Everything seems to work but it is very slow.
Every other sites are loading fast (Even the cgi trace) but not the forums here.

I don't know if I am the only one having this.
Maybe this will be fixed smoothly ...

PHP Code

```
<?php
fl=19f19
h=hackforums.net
ip=This is confidential
ts=1447933809.236
visit_scheme=http
uag=Mozilla/5.0 (Windows NT 10.0; WOW64; rv:43.0) Gecko/20100101 Firefox/43.0
colo=CDG
spdy=off
loc=FR
```

Output of the mozilla profiler :

DNS : Cached
Connexion : 37 ms
Send : 0 ms
Wait : 43.485 s
Get : 125 ms

Also all the assets are loading fast.

Thanks.

Core. - November 19, 2015, 4:38 am

Yeah mine is extremely slow aswell

bandors - November 19, 2015, 4:43 am

It's pretty slow here as well.

BTB™ - November 19, 2015, 5:09 am

Yup guys!

It's slow. And things are getting better now.

PrivateDonut - November 19, 2015, 5:11 am

The site is most likely getting ddos, no need to make a thread about it. It'll go back to normal speeds after a little bit.

Riley Reid - November 19, 2015, 5:12 am

Seems to be alot faster now. But yeh mine was pretty slow earlier.

sqsgkrldwg - November 19, 2015, 5:12 am

It seems back to normal for me since Bandors posted.

PrivateDonut - November 19, 2015, 5:13 am

The site is most likely getting ddos, no need to make a thread about it. It'll go back to normal speeds after a little bit.

DuguWudi - November 19, 2015, 6:12 am

You all aren't the only ones getting it, me too especially when I made a post, I was like what?

I click post, click again, click again, nothing happen, I just close the post windows, some minutes later, I saw my post, sometimes double posting too. These all happen recently.
