Thread: [\[FREE\] ~ Gmail Hacker ~ | Hack ANY Gmail Account | Trial version ! \[FREE\]](#)

Jack_andrew - November 21, 2015, 11:14 am

Hello!

I have written an awesome, easy-to-use gmail password cracker.

I share the trial version with you:
filetea()me/t1sR3KhZNMNRLi9n6NZGNI7kA

You are only able to use it once, so you can only hack one account.
After that, the software will not work unless you type the product key into the registration tab.
You can buy it for 1BTC here: satoshibox()com/557022421eedwadwdf

Enjoy the hacking!:)

First create a Readme.txt next to your GmailHacker.exe and put your marketing lines into it.
Next compress them together into a zip and upload it to InfoTomb or anonfiles[WARNING POSSIBLY INFECTED].
Finally create ProductKey.txt , filled with a random product key and upload it to Satoshi box.

as far as i know email especially gmail hacking is not possible

that is why its unbelievable

but is something a lot of people want really badly so is perfect canidate for funny stuff

look some of the people responding on this would even try it knowing it had something wrong with it

thats how good of a cover this can be...
beware of things that seem to good to be true
