Write a letter to the future you!

Write something here to the future.. you!

I'll close this thread in ~1 week and open it again in 1 year.

I'll also send the people that posted something a PM with their post.

For example: A screenshot of your current profile. (You can see the change in a year)

What you wanna change. (Look if you did it the next year)

What your favorite music is atm.

etc.

Go ahead! :)

Dear future Romania, did you end up leaving for college? Are you still with your girlfriend of 14 months? You still driving your '08 beamer? How many more kids have scammed you? How is BTC looking now? Did you find anything profitable to invest in? How is double majoring in business and economics doing?

Currently sitting in no groups, and 335 reputation. I have exchanged around \$25,000 worth of BTC, and hope to keep that number growing. So, future me; keep up the good work. Hopefully you aren't homeless.

Kek hopefully you'll still be around to read this shit.
