Thread: [How to configure BurpSuite in your Kali Linux-By Spirit](#)

spirited_wolf™ - November 22, 2015, 6:01 am

So hello guys

Welcome back, My name is Spirit and today i am going to show you how you can configure your burpsuite in your kali linux.

Tutorial link::

<https://youtu.be/8fO9pcSL4IM>

Burp Suite is an integrated platform for performing security testing of web applications. Its various tools work seamlessly together to support the entire testing process, from initial mapping and analysis of an application's attack surface, through to finding and exploiting security vulnerabilities.

Burp gives you full control, letting you combine advanced manual techniques with state-of-the-art automation, to make your work faster, more effective, and more fun.

Steps :-

- 1)Open your BurpSuite in your kali linux by typing burpsuite in the terminal.
- 2)Click on Intruder.
- 3)Fill fourm like this

Host:127.0.0.1
Port:8080

- 4)Then open your browser in your kali linux and then click on Prefrences.
- 5)Then Go To last session that is Advanced.
- 6)Then click on Network, then click on connection settings.
- 7)Then fill the fourm like this

Select Manual proxy Configuration

HTTP Proxy:127.0.0.1 || Port: 8080

Then click on ok

- 8)Then in new tab of your browser just type:: http://burp
- 9)Then click on CA Certificates.
- 10)Download it and move it to your desktop.
- 11)Now again go to Prefrences->Advanced-> but this time click on certificates .
- 12)Now click on view certificates.
- 13)Now just click on import and select the certificate file that u have moved to your desktop.
- 14)Select all 3 option's and click ok ,ok, ok , close ->

So, we have Done :D We have sucessfully Configured our burp suit ;)

This is just basic, anyone that doesn't know how to do this will not be able to use Burpsuite and should not think about using it.
