Will be willing for a vouch copy, hmu.

Barack Jong-Unbama - November 25, 2015, 12:36 am

KeDDy sent me a copy of this to make a review.

After trying it out I'm pretty impressed, all the things you get for just 2 USD is pretty cool. When buying this, you receive a customizable multithreaded proxy checker with lots of options and more to come! You also receive an easy to use and proxy scraper which is pretty good in my opinion.

I haven't had time to use this product that much, but after testing it out a few times I'm pretty satisfied.

I can recommend this product for anyone looking for a cheap but good proxy checker/scraper. Good luck with collecting proxies!

Advanced Proxy Checker is done and will be published in a few days!

Old and new users of this proxy suite will be able to use both softwares

I instructed you on how to fix it, and you ignored it.

Read the thread and understand why you're not eligible for a refund.

And on top of that, none of the information you were giving me via PM is actually true, and I can show proof that you were lying in your PM's.

Anyway, the problem was with the licensing system and the instructions are still available via PM.
