I am active customer from AB Hosting months ago best faster servers you can buy and 24/7 support.

Slachter - November 26, 2015, 10:33 am

I can vouch for this, I purchased AB-Hosting a while ago to get things done. I purchased the second package which is really cheap compared to other VPS hosting who offer 500 MB and 1 Core for like \$15.00 . This is cheap and amazing support it has too, good job.

HostDime - November 26, 2015, 6:43 pm

thanks guys! Appreciate It!

We used to be AB-Hosting.com which was started in 2005, and we sold it several years later, and then registered ab-hosting.net in 2014. I've been doing this since 2005 basically:)

Done, you can now choose every php version almost. When you host with us, each user can use the PHP version they choose to use, and change it anytime via Cpanel.

This was added after many requests.

According to your website here:

http://ab-hosting.net/index/?page_id=108

You started in 2014.

Also the picture of the so called infrastructure is all over Google apparently Interservers, Digital Eagles and many other companies are using the EXACT same image.

You can tell when they started by doing a simple who.is lookup.

macgyver - March 10, 2017, 5:38 am

I wonder. Why are they banned from the forum? Does anyone know?
