Method coming soon

I strongly recommend you order one of the sims from the list below NOW and when my entirely fresh one arrives from vodafone yours will be at your house too (UK) and you can follow my guide when it comes out. The sims are 100% free. Just pop it into your iPad or iPhone or Android and then follow my guide once it's live.

So just order one, and when my guide one eWhoring from a phone comes out you'll be all set. They're all 100% free. If you're not in the UK feel free to search on google (in the US etc.)

"free sim us pay as you go"

idk how americans work with mobile data stuff
