Thread: [My new ride- Octavia VRS](#)

UTRONEX - November 24, 2015, 1:29 am

So some of you may or may not remember my little build thread a while ago:

<https://hackforums.net/showthread.php?tid=4951499>

Anyway the Subaru pretty much flew through its MOT (yearly check on cars for anyone living outside the UK). Only needed brake pipes, got those replaced and put it up for sale. Thought it was time for a change..

Was contacted by someone also selling his car asking for a straight swap, decided to go for it as his car was already pushing nearly 100bhp more than mine was. 320 bhp altogether :)

Modifications so far:

18 inch BBS Motorsport alloys

Updated turbo

Forge dump valve

Mapped to 320bhp

Lowered on bilstein coilovers

Bigger exhaust

Colour coded front grill

Cupra R front splitter

Boost gauge

Up rated clutch and dual mass flywheel

All this was done by the previous owner, haven't decided what to do to it myself yet but I'm happy with the way it looks. Already started pricing up parts to get it to its stage 2. New turbo, manifold, intercooler etc. So that will probably be the next step :)

Vicellus Drum - November 24, 2015, 1:33 am

Brehhhh that fitment on point.

Make it wider, get some fenders, wider wheels, and it'll be perfect.

Some inspiration:

UTRONEX - November 24, 2015, 1:45 am

Those arches look awesome, that car you have a picture of is a member on briskoda (the owners group). His cars gone through some mad changes don't even think it looks like that anymore..

Dicile - November 24, 2015, 1:49 am

Nice car, only thing i dont like is the back of it but the res is nice

UTRONEX - November 24, 2015, 1:53 am

Yeah the back hasn't been touched yet, apart from the fly eye tints on the rear lights. Everything else is standard. Definitely room for improvement on the rear bumper, maybe a splitter to set the exhaust off a little more.

Vicellus Drum - November 24, 2015, 1:57 am

splitter to set the exhaust note off? Lolwhat?

It would go well with a nice catback, carbon fiber splitter, get some fender flares, some nice 305 wheels & slickys,

UTRONEX - November 24, 2015, 2:04 am

Haha no not the set the exhaust note off! Hahaha! To make it look a little better, the exhaust is just hanging there at the moment of it had a splitter to help it sit a little closer to the bumper it would look clean as hell.

Shot Caller - November 24, 2015, 10:15 am

pile of crap boyracer in the UK with a car worth under a grand

Imao

Green crack - November 24, 2015, 11:05 am

Nice ride you have there OP

How much did you pay for her?

UTRONEX - November 24, 2015, 11:31 am

(Nov 24, 2015 12:05 PM)Green crack Wrote: [CITE](#) Nice ride you have there OP

Thanks dude, altogether the car sets me at around £2500. I'll be putting around another £1000/£1500 into it for new parts to get it ready for a stage 2 map then who knows. I'll probably get

bored and swap it for something else haha.

Subpar - November 24, 2015, 11:45 am

Looks nice dude. Definitely roll out those fenders with a roller tool.. they're like 150 bucks. Or you could talk with the local car group and see if they have any.. I've got to roll out my fenders on my S4 still.

ASOC - November 24, 2015, 11:46 am

Man I am so jealous, love the new car. Hope it treats you well.

UTRONEX - November 24, 2015, 2:43 pm

Wouldn't trust myself to do it, I studied bodywork when I was at college but I'd rather pay someone to do a decent job. It's definitely something I'll consider, either that or get the big arch extensions. Would love awesome with a set of nice wide wheels tucked under there ?

Thanks for the comments! ?

keefs - November 24, 2015, 4:07 pm

Awesome ride you have here, I like it a lot.. take good care of it! :)

MonEy - November 24, 2015, 4:28 pm

Nice car man, I wanted those rims myself. Think they'll go nice on my car.

UTRONEX - November 24, 2015, 5:36 pm

(Nov 24, 2015 05:28 PM)MonEy Wrote: [\[CITE\]](#) Nice car man, I wanted those rims myself. Think they'll go nice on my RX8.

Yeah man the rims look sick on any car. Gotta watch out for fakes though, I went through a shit tonne of checks when I got this car to check they were legit.

Who Soup - November 25, 2015, 12:16 am

I've never heard of that brand or car, seems awesome though!

Darkwin - November 25, 2015, 12:18 am

Man i wish we had those cars in the US, It sucks seeing the same old models - Honda, Toyota, Nissan etc.

UTRONEX - November 25, 2015, 12:59 am

Yeah before I was offered this id never really considered one. They're owned by VW now and every part under the bonnet had an Audi stamp on it. Mainly used as taxis in the UK as they're bulletproof but some (like this one) have been turned into big boost weapons.

Fish_a - November 25, 2015, 5:52 am

Hey not bad. Nice car and good price for it

Tough Luck - November 11, 2016, 3:31 am

How you getting 320bhp out of that? My VRS is almost the exact same spec but no way will it remap beyond 220bhp.

UTRONEX - November 20, 2016, 11:05 am

Haha sorry dude numbers were the wrong way around. It was meant to be 230 lol.

I'm a member on briskoda, PM me your username. I haven't got this car anymore but would love to see who and what is being done to it now. Can you link me the thread when you get time, thanks.

Lrrr - November 20, 2016, 11:16 am

Nice looking whip, You should tint your windows for sure.

pnda - November 20, 2016, 4:54 pm

Thats a dope looking car! I've never seen or heard of it before.
