Thread: [\[RED LIONS\]How to start your own accounts generator/store - Tutorial](#)

SIM-1729678 - November 24, 2015, 9:43 am

Hello everyone. Today I will be guiding you through a step by step tutorial on how to start your own account generator/store.

This tutorial is for educational purposes only. I do not endorse any kind of illegal activity. I am also not responsible for anything that happens when you follow this step by step tutorial.

So you probably got here because you want to learn how to start your own account generator/account shop.
Let's get started.

Setting up the basics
Getting a source/Store
Getting accounts
Maintaining quality
Ending

Step 1 - Setting up the basics

So for a good accounts generator/store you need at least a good business plan. This is not going to be an easy job.

You have to start off by getting some money. There is likely going to be an investment needed during this setup. (The amount depends on the amount you want to spend.)

Get a catchy name. You want a good name that attracts people. Names like: VyprGenerator, AIOgen, AIOStore, Powergen, are nice names.

Don't go with names like: Supercoolgenerator, Ultimatecoolaccountstore, etc.

Step 2 - Getting a source/Store

There are a few sources on the market for a nice generator/store.

Here is a short list:

Looka's Custom generator script

[LINK](#)

Features :

- Secure Account Generation
- Entire licensing system(also known as tokens&licenses)
- Fast
- Manage your clients
- Client Generator made in Java so it works on all computers with Java
- Easy to use API to make your own generator client if wanted.
- Easy to add account types
- Tested and high quality
- Made in PHP and Java <3

Known vulnerabilities: 0

NoName 2.0

This project was abandoned because the owner got banned.
It's a nice source though.

[LINK](#)

Features :

- Secure Account Generation
- Fast
- Manage your clients
- Easy to add account types
- Made in PHP

Cons:

- Public
- Exploits can be fatal
- Can be very buggy when not set up correctly

Known vulnerabilities: 2

Phoenix Generator Source v1.6

[LINK](#)

Features:

- Own Captcha system.
- Free updates for future versions.
- Lightweight source.
- MySQLi connections.Secured, reliable & fast.
- Included payment gateway.
- Manage your generator from your admin panel.
- Remove after X generations.
- Bitcoin & Paypal payment gateways.
- AJAX Account generating.
- Manage each plan, how much accounts it can generate per day, price & expiring.
- A lot more+

Cons:

- Payment system sometimes bugs out.
- Exploits can be fatal
- Source has no protection

Known vulnerabilities: 3

Account Seller with AUTOBUY PP

[LINK](#)

Features:

- Registration
- Login
- Account Bought (List)
- Submit Orders
- Admin Panel
- TOS Editor
- FAQ Editor
- Manage Product
- Easy Setup

Known vulnerabilities: 0

You can also use sites like:

Payco.re
Paylvy.com

If you need help to set these sources up please contact the owners or shoot me a PM and I will be glad to help you.

Step 3 - Getting accounts

There are multiple ways of getting accounts.

1. Cracking them yourself
2. A supplier
3. Dump checking

1. Cracking them yourself

If you are interested in cracking accounts yourself please head over to [THIS](#) thread for a full detailed tutorial.

2. A supplier

There are many people that supply accounts for generators and or stores. I am sadly not going to link any because this market is very flexible. Just make a thread requesting a supplier for your accounts store/generator.

3. Dump checking

Dump checking is a very simple method of getting accounts. Go to PasteBin or any other dump site and search for the most recent account dump of the account type that you want. Get a checker and throw in the list that you found. This is a free and easy alternative but does not work all the time.

Step 4 - Maintaining Quality

This is probably the most easy job in the world.

You have to make sure that there is enough accounts in the store/generator at all times. And you also have to check the accounts every 2/3 days. Why? Because you don't want dead accounts in your store/generator. You also have to get new accounts every 1/2 weeks. This is just to be sure you have a nice fresh list. It also really depends on how many account are still working. But if you have a decent amount of customers the accounts will die very quickly.

A lot of people forget this step and just leave the accounts in for a few weeks.

Step 5 - Ending

This concludes my tutorial on how to start an accounts generator/store. It's pretty easy! isn't it? haha.

Thank you for ready through this quick tutorial. If you have any questions please ask me via PM or post on the thread. Any feedback is welcome.

?MrRoot - November 24, 2015, 9:51 am

Nice, high quality thread.

Narcos - November 24, 2015, 9:52 am

Very informative, Nice thread OP

Wires - November 24, 2015, 9:54 am

Very nice and detailed thread. Relevant to this era of Hack Forums too. Well done.

Aliasllias - November 24, 2015, 11:46 am

Thanks for sharing this HQ tutorial!

Dorrance - November 24, 2015, 11:59 am

This thread is okay, just a quick business plan to running/starting a shop. You should add that I think Regeus did the other day on how to crack SentryMBA for the supplying part.

blocknode - November 24, 2015, 12:04 pm

Goodjob nice and detailed. Guess we'll see tons of new generators soon xd

I expect no less than another generator war

FamousHater - November 24, 2015, 1:31 pm

sad how many people dont know u can check accounts using sentry.
may want to change that op?

I have not noted anything about sentry MBA, neither will I add it sorry.

SIM-1729678 - November 27, 2015, 4:19 am

Any more feedback on what I should add?

Louisveret - November 27, 2015, 5:34 am

Thanks for this brother! I will need it

dLay - November 27, 2015, 5:44 am

very high quality thread, thanks!

SIM-1729678 - November 27, 2015, 6:03 am

Thanks for the support guys.

Heisenberg - November 27, 2015, 8:15 am

Thanks for sharing bro! :)

Delevingne - November 27, 2015, 10:19 am

This teaches you the basics of the basics. Would like to see a part 2 or something where you actually learn on how to start it.

When I get enough replies on this thread I will be sure to make a part 2 going into depth on how to

set up all the SQL stuff etc.
