Ryan Reynold's Social Media Helpdesk

I get dozens of PMs daily from people needing some advice when it comes to social media. "I want to grow a page". "I want to make money". Don't get me wrong, I love answering them. But I think it's better that I open up a help desk where people can post their question and I can just reply to them there. That way other people can learn as well!

Any questions you guys have regarding social media, just post it below. Whether it's Instagram, Twitter, FB, etc. I'll answer it as best as I can :)

What's the best way to make money off an Instagram with tons of active followers?

How do you monetize an IG with OGMobi?

There's a few ways to monetize IG. How many followers do you currently have?

Ayahuasca - November 26, 2015, 6:53 pm

How much do you have to invest to see a good profit? Facebook and Insta.

Great idea & thanks for this help desk.

Well I have a Twitter, I get some good activity every now & then but I would like more. My Twitter is basically a comedy page (no chill type Twitter). How can I get more followers & activity?

If they are all active, you can earn a lot. You can either do PPI, CPA, or even get paid to promote real products. Do you have an email in your bio?

(Nov 26, 2015 07:53 PM)Ayahuasca Wrote: [\[CITE\]](#) How much do you have to invest to see a good profit? Facebook and Insta.

Honestly, a lot. Real money starts coming in after about 150k followers. If you really want to invest in IG, I suggest buying an account with that amount of followers. It'll be a lot cheaper than growing one from scratch. Be careful though. Make sure you buy from a trustworthy person.

You should consider buying into a Tweetdeck. I can link you to one on HF that's pretty good. A good friend of mine is selling access for a pretty cheap price.

Yes, they're all active. I tried using OGMobi, but I'm not entirely sure what to do. I'm not sure how to create a landing page on OGMobi (if they even offer that), but I do know how to use their content locker.

No, no email in my bio. Just another form of contact.

Well, OGMobi has a landing page request page.

<http://members.ogmobi.com/landingpagerequest.php>

I recommend either the free followers niche or the emoji hacks one.

Also, I suggest putting your email in your bio. Hundreds of companies are always looking for big pages to promote their products. And they pay good money. Some people make the mistake of not putting their email and only putting their kik. Those big companies don't use kik lol. They'll just skip your account if they don't see an email. It's more professional through email.

Manually building you can use Instagress.com. It's the safest botting service out there. I've never had an issue with them and I've been using them for years.

Or, you can buy some promos for around \$40 per 1k.

About 3 weeks, taking like 5 minutes to post once a day using hootsuite. I usually keep my instagress on for 4 hours, then wait an hour or so, then do another 4, etc but I'm not sure if I can do more without getting banned. What are your igress settings?

A good \$1k-\$2k if it's active. An account like that should get at least 10k+ likes.

Great!

One thing that I think could help us all a LOT:

Can you go out and find an example of an instagram account that has a lot of followers and (it doesn't have to be yours obviously) that you can tell is doing PPI and making good \$\$ and post the username here so we can see it as an example?

Pretty much I think it would be great to see a "Golden" example to see an account that we should model ours after

Also, in Instagress, there are two options: Followers of Usernames and Followings of usernames.

I know what followers of usernames are, but what would a "following of usernames" be?

thanks

For instagram, find like 10 or so pictures for your niche, and either schedule them or send them all at once (it doesn't actually post the picture when you send, just sends a notification to your device to post it) with the same copy pasted popular tags.

More here:

<https://hootsuite.com/resources/hoot-tip/how-to-add-instagram-to-your-hootsuite-dashboard>

It basically allows me to never actually go inside the instagram app - all I do is go into the hootsuite app, hit post, and paste in the tags that it copied for me from whenever I scheduled the post

You can buy shoutouts from other big channels. Or pay them to post your Youtube Channel Link on the description of their next upload.

I would recommend doing following then unfollowing it sucks but it works.

Chuck Wagon - November 30, 2015, 2:04 am

I know this is a subjective question, but what are some average earnings you make in, say a month, on a social media account with: 1000, 10,000, 100,000 followers?

Which social media site is the best to begin with and branch out from? Im thinking Instagram.

What would you say is a feasible growth rate for a page that I develop with an automated bot that follows/unfollows/likes?

Would these accounts serve as useful tools to generate traffic long term to websites/other pages that you develop?

So I want to start a Twitter/Instagram page and I'm quite new in all this social media stuff.

I want to start it out as a hobby because I enjoy my niche but at the same time I want to build it progressively.

My goal is perhaps 20k Followers for maybe the first 6 months (Not sure if that's a good amount for 6 months)

Any tips for more active followers? (like hastags and stuff)

bobayconner - December 2, 2015, 1:34 pm

im interested in this tweet deck.

You should consider buying into a Tweetdeck. I can link you to one on HF that's pretty good. A good friend of mine is selling access for a pretty cheap price.

Use Instagress bro. Don't use any of those #follow4follow hashtags though. It'll get you inactive followers.

You don't really need a TOS. You can't monetize a video with music that is copyrighted. You'll get a strike on your channel. You need to watermark them before you upload. Aaaaaaaaand people can't find your videos if they are private.

That's one big problem, I haven't learned how to watermark video. I only learned how to watermark

pictures only so far.

Any free software that can waterwark video easily, I need one thats userfriendly, not so complicated, a simple waterwark will do. Thanks.

Almost forgot, youtube did offer some music in youtube video setting, are those copyrighted, can I use those music on my videos?

And howcome youtube didnt offer any watermark feature in youtube setting? It would made my job watermarking easier.

I believe PicPlayPost is really easy to use and has a watermark feature. But it's mainly for IG videos. You can just add a text logo to any video using a free video editing software.

And yes, you can use the free music offered by Youtube.

You can easily watermark your videos on any video editing software. Create text/logo/whatever you want to use. Add the image to the timeline and choose how long you want to show the watermark.

If you need more help with that send me a pm :)

(Dec 3, 2015 04:46 AM)The Hated One Wrote: [\[CITE\]](#) Could you share your/good instagress settings for beginners? Thank you!

Try using the tag + tag filter setting. Add tags related to your niche (the kinds of pictures you are posting). So if you are posting cars, add tags like: #cars #luxury #fast

Things like that that are popular with your niche. This way Instagress will use these tags and like other pictures, accounts and comment on things with these tags! They will hopefully have the same interest as you and follow you back and be an active user on your list :)

I heard something about tumblr/blogspot redirections, but I cant depend on that(still getting banned). Im using churn and burn method on IG, but my accs dont 'live' for so long? I heard sth about freudbuster but they are so expensive(bad ROI). Is there any options to redirect this muthefuckin ig crawlers from my cpa landing. Maybe some prelanders(redirecting ig bots to safe page), but ive heard they still go through this anyway. Thanks in advance.
