Thread: [Configure burpsuite in windows-By spirit](#)

spirited_wolf™ - November 27, 2015, 5:21 pm

So hello guys

Welcome back, My name is Spirit and today i am going to show you how you can configure your burpsuite in your windows Os.

After my last tutorial i got alot of message from many of my friends that they are using windows and they wants to configure burp in windows . so, i made this beautiful tutorial for my friends <3

Tutorial link::

https://youtu.be/kLUK_iKCfLs

Java Download link::

Burp Suite is an integrated platform for performing security testing of web applications. Its various tools work seamlessly together to support the entire testing process, from initial mapping and analysis of an application's attack surface, through to finding and exploiting security vulnerabilities.

Burp gives you full control, letting you combine advanced manual techniques with state-of-the-art automation, to make your work faster, more effective, and more fun.

Steps :-

- 1)Install the java toolkit in your windows. Link in the description above this check it out :D
- 2)Open your BurpSuite in your windows by right click on it and select run as java.
- 3)Click on Intruder.
- 4)Fill fourm like this

Host:127.0.0.1

Port:8080

5)Then open your browser in your windows (firefox here) and then click on Prefrences.

6)Then Go To last session that is Advanced.

7)Then click on Network, then click on connection settings.

8)Then fill the fourm like this

Select Manual proxy Configuration

HTTP Proxy:127.0.0.1 || Port: 8080

Then click on ok

- 9)Then in new tab of your browser just type:: http://burp
- 10)Then click on CA Certificates.
- 11)Download it and move it to your desktop.
- 12)Now again go to Prefrences->Advanced-> but this time click on certificates .
- 13)Now click on view certificates.
- 14)Now just click on import and select the certificate file that u have moved to your desktop.
- 15)Select all 3 option's and click ok ,ok, ok , close ->

So, we have Done :D We have sucessfully Configured our burp suit in windows ;)
