Thread: [Easy method to make \\$100 per day. Even noobs can easily do it Black Hat Money Making](#)

deekshith - November 28, 2015, 7:59 am

I decided to share one working method with every one of you. Noobs who read this forum in search of working methods can take this method and apply it TODAY and start making money this evening. I am sharing because I am tired of all this shit methods that tell you what you already know such as join the affiliate network and make people sign up under you.

Okay, enough preaching! In a nutshell we will be using a spam who pays you every time someone is visiting your link.

1. Register at spam .com If you appreciate my method then I ask you to use my referral link For all others its spam . com
- 2.Register on youtube.com. If you have your google account you can already use a youtube.
- 3.Find 10 popular videos on home page and make a note of those video links.
- 4.Go to keephd.com and paste one link at a time, downloading the videos to your hard drive.
- 5.Go back to youtube and upload the videos you downloaded but in description add [HQ] [high quality] [1080] or [HD]... you get the gist! We want to make visitors start watching your videos. Soon after you are done uploading your videos start being watched. Don't copy my method word for word, just improvise. For example add a different music if you know how or add sub titles at the end or splash screen if you know how. It's optional though.
6. Head back to spam and create a link for the video that you uploaded in step 3 (do 1 at a time)
- 7.In a couple of days after you uploaded the videos you will start seeing 500-800 or even 1000 views. At this time you add the video description where you describe the video and state that there is a better quality video available. And post the spam link that points back to the video that you uploaded.
- 8.Rinse and repeat.
9. Optional step. Promote your videos on relative forums by placing the links in signature and blog comments. You can use automated software to do the promotion.

If you do this method and post 10 videos you should get about 5-10.000 views per day out of those views at least 50% (usually more) will click the HD video spam link. So you could easily make \$8-12/day. Which is only a start. It doesn't seems that much BUT it will be hands off once you complete the video uploading. And 12\$/day will yield \$360/month in addition to your other methods that you do

If you like my method please REP me and hit THANKS button

If anybody got any questions feel free to post here or via private message. And stay tuned for other methods.

I don't see this making me loads of money but can work.

Bad things are that you will have to make alot of channels.

And what about copyright videos?

Actual content owner will not report you?

Queen Cin - November 28, 2015, 8:08 am

I don't see this making \$100/day..

Red_Ryder - November 28, 2015, 8:08 am

No thought about copyrights? I might just be speaking for myself, but the thought of stealing other peoples videos and posting online is pretty saturated. Youtube is pretty good with taking them down as well. But thank you for the attempt to contribute to the HF community!

I don't get the spam .com, they sell spam (meat) :|

Thanks for the contribution but I don't see this method take you anywhere. It requires a lot of time for a very little outcome. You won't ever get 50 % clicks on your link. Plus, the copy video content is pretty saturated and risky.
