Hey there,

I am presenting a basic Skype resolver I made for the people who would like to have one.

Download:

no thanks, i do not want your exe file.

code or nothing.

anyway, everyone knows how to download a string

Not to be rude, but you probably didn't make a "Skype Resolver," you probably made a String Downloader that uses an API for Skype resolving.

Nathan's right. Your code is probably downloading a string from a online API, Its not a resolver.

Me.Username.Text = New

WebClient().DownloadString("http://api.predator.wtf/resolver/?arguments=" + Me.Username.Text)

Pretty basic stuff

Jesus.

Closed before it gets any worse.
