Thread: [\[FREE TEACHING\] C/C++ & ASSEMBLY PROGRAMMING](#)

Carr0t - November 29, 2015, 12:18 am

I will teach anybody for 2 hours a day over teamviewer.

I will not help you fix your project's [pay incase you need such work done -bots,exploits,injects etc]

I will teach you from basics till advance programming if you seriously interested .

Not daily but you can reserve your slot by posting in here,once slots get available i will PM you time to connect TV [time,date etc]

I'm a freelancer from 36 years.

NO SKYPE

Jabber +++ONLY USE OTR+++

PHP Code

<?php

carr0t@exploit.im

Mr. Fink - November 29, 2015, 12:20 am

Yeah? Is the executable file you're sending me over Teamviewer absolutely necessary?

Malwarebytes says its a virus. Oh, you think I should turn off Malwarebytes?

Carr0t - November 29, 2015, 12:23 am

(Nov 29, 2015 01:20 AM)Mr. Fink Wrote: [\[CITE\]](#) Yeah? Is the executable file you're sending me over Teamviewer absolutely necessary? Malwarebytes says its a virus. Oh, you think I should turn off Malwarebytes?

I guess you are trolling,we never did TV session ?

TV is available to download on official site,i give you TV id/pass they connect me ?

You don't need't accept any binary from me,do i look fkng idiot to infect members ? I have big jobs to do other than such LQ work

good joke

zaneinsane - November 29, 2015, 7:55 am

im intrested but i cant send a pm :///

tulamba786786 - November 29, 2015, 9:36 am

I am interested too. Please pm me how to join you on teamviewer.

THanks

.Bux - November 29, 2015, 9:50 am

Well does jabber allows voice talking?

Because teaching only by typing, it's gonna take forever

tulamba786786 - November 29, 2015, 11:46 am

I wish experts like G4143 also start teaching c++ online. We want to learn from his years of experience

RISC - November 29, 2015, 11:53 am

g4143 is too cool to teach anyone, anyways.

nosly - November 29, 2015, 8:13 pm

I WANT TO TEACH NE ABOUT C

g4143 - November 29, 2015, 8:36 pm

I dropped C++ years ago. I moved into high level languages like OCaml and Clojure because they are 'extremely' challenging and present the user with some very sophisticated ideas.

RISC - November 29, 2015, 8:36 pm

It must be tough when you can't just achieve everything you want through low level , hackish work arounds, eh?

g4143 - November 29, 2015, 8:50 pm

(Nov 29, 2015 09:36 PM)RISC Wrote: [\[CITE\]](#) It must be tough when you can't just achieve everything you want through low level , hackish work arounds, eh?
You can achieve most things with hacks but you miss-out on all the interesting stuff that the academic types are pursuing. Just take a look at Haskell or OCaml or Clojure/Lisp and you'll uncover a whole different world of programming filled with unusual, brilliant ideas.

Ooops. Forgot to mention Scala too.

Carr0t - November 30, 2015, 3:20 am

thanks all. teaching 3 guys ,it will be a week session then i open slots again and enroll another 3 members

:) cheers & keep posting here

tulamba786786 - November 30, 2015, 8:29 am

G4143, I know what you are talking. You have moved into the world of functional programming which has its own charm. Welcome to the world of callbacks !!! :)

If you want to teach that, you are more than welcome. I think if you could throw some light on the unusual and brilliant ideas, that would be really nice. And why can't these ideas be incorporated in C/C++?

CsGoBot - November 30, 2015, 8:32 am

I will like to learn. SEnd me info when ever mate.

g4143 - November 30, 2015, 9:51 am

Oh these ideas can be incorporated into C++ and C. The question is why would you go to all the trouble(and it would be loads and loads of trouble) of setting up a C or C++ program to behave like a function language when you already have several good functional languages to choose from?

Only3 - November 30, 2015, 1:37 pm

like NET ? good thinking

atifaslam - November 30, 2015, 8:07 pm

Can you just tell me what language I should start with and where to go learn it? I'm a complete newbie at programming with 0 knowledge about it.

Should I get experience from simple language and then come to c++ or can I start c++ directly?

g4143 - November 30, 2015, 10:12 pm

(Nov 30, 2015 09:07 PM)atifaslam Wrote: [\[CITE\]](#) Can you just tell me what language I should start with and where to go learn it? I'm a complete newbie at programming with 0 knowledge about it.

Should I get experience from simple language and then come to c++ or can I start c++ directly?

Do you want a favourite number and colour too?

If you are set to learn C++ then learn C++. The internet is filled with tutorials and books on that very topic and I would venture to say that C++ is one of the most supported languages in that area.

M1K3Y W1N50N - December 1, 2015, 12:30 pm

I have time, I would like to learn it and very happy if you accept me, just pm me the date and time and sure we can go :D

I just got some basics there read about 100 pages of a c++ tutorial book.

georgeziosas - December 11, 2015, 6:20 pm

I am interested, hit me up with a PM when there are free slots.

Carr0t - December 12, 2015, 1:37 am

I have replied all PM's and slots are full for now,already members getting tutored :-) [I ask them to please post here so other come to know]

I will pm members who posted in here after slots are vacant

Pepeillo - December 12, 2015, 3:11 am

I am a c#programmer, I am interested, please PM when there are free slots.
Greetings!!

rezonans651 - December 13, 2015, 3:18 pm

i am program in c# and some c ?if free slot -pm me please

Nick (Name) - December 16, 2015, 4:12 pm

I'm interested. Haven't really had time to crack the book of C++ yet. Just PM me when you have available slots. I am not new to programming, would help if someone showed me the basics to get started :)

Masm4ever - December 16, 2015, 5:59 pm

Now that a dozen people must have passed the course, can we have some feedback, please?

xCh3rx - December 17, 2015, 6:35 am

I'd really like too learn C++. I hope you could give me some help with learning it ;) Thanks

Mouse? - December 17, 2015, 6:44 am

He's been banned. Reasons unknown. Always make sure to look at the user's name. If it's grey or black and has [exiled@HF:] or [closed@HF:] under it, you're never getting a response.

Tonckkk - December 17, 2015, 1:18 pm

Im interested in this i would like to learn basics of programming

juansanchez1993 - December 19, 2015, 7:58 am

You can send me a PM with contact information? I love a lot
