Thread: [AirFox Theme \[12 controls\]](#)

Naywyn - November 29, 2015, 3:29 am

First of all, I created a new thread because I did an huge update of my old Firefox theme, well, it's not really an update but a complete re-creation. I wanted to update it because this theme had a lot of success. It contains 12 controls, more is coming with future updates, this theme is called AirFox.

List of controls:

Button

Checkbox

Header1

Header2

MainTabControl

NumericUpDown

SubTabControl

OnOffBox

RadioButton

TextBox

AlertBox

Redirect

You can disable pretty much every controls, you can turn Checkboxes and Radiobuttons texts to bold etc...

N3oNight - November 29, 2015, 3:35 am

theme is really good like all of your old work
also you thinking to add group box to this?

SaketSaket - November 29, 2015, 3:54 am

Nice work as usual... ;) Keep coding & keep sharing ;)

iLogic™ - November 29, 2015, 9:32 am

Nice work :) Hope there will be more themes like this ?

Vrekt - November 29, 2015, 11:06 am

Damn nice theme once again! Great job!

Adderall - November 29, 2015, 11:22 am

Nice theme, nice controls & nice work!

cCode - November 29, 2015, 11:33 am

Looks great (like all your themes :P)

Dreamzje - November 29, 2015, 12:19 pm

Nice work mate ill be sure to use the updated version. Keep the good work coming.

MeltyNet - November 29, 2015, 12:39 pm

Looks really good AeroRev9, keep up the high quality themes :)

Nyan_Meow - November 29, 2015, 12:44 pm

Great theme bro! Keep up the good work

Kaz'jin - November 29, 2015, 1:57 pm

My tab control icons does not look even near as crisp as yours does. What's your trick?

Nyan_Meow - November 29, 2015, 4:26 pm

(Nov 29, 2015 02:57 PM)Misaya Wrote: [\[CITE\]](#) My tab control icons does not look even near as crisp as yours does. What's your trick?

Did you turn your ImgList to 32bit ?

Kaz'jin - November 30, 2015, 9:01 am

Yup, 32 bit. using this image <https://i.imgur.com/pSFYe3h.png> - whether I choose 16 bit or 32 bit, does not make a difference they look the same. :/

eCoLoGy - November 30, 2015, 12:11 pm

Great job as always mate.

Wanted to point out something, maybe I did something wrong but here is my question:

I was trying to Disable a TextBox, right?

In the TextBox properties it contains 2 Enable fields. Turned both of them to False but still I can type in the TextBox even though they are set to Disable.

Edit: another thing I wanted to point out so you might fix it is the lack of scrollbars in textbox.

Try manually resizing that to the required size. It could be the resizing method.

nuk - December 1, 2015, 8:55 am

I like this theme.... I didn't see a groupbox though - which I would hope you would add one... if not, I can always add it to your source ;) Thanks for sharing your amazing themes homie... I wish I could +rep you more than I already have ;)

UniveX - December 1, 2015, 10:44 pm

If someone is looking for a C# version, this should do the trick: [pastebin](#). Hopefully it's all working as supposed to, seemed fine to me when I was trying it.

Great theme by the way, keep up the good work. :)

nazist - December 2, 2015, 4:33 pm

Nothing To say

Just Bravo

spudiod - December 5, 2015, 5:54 pm

Beautiful! :) Can you add maybe a custom combo box?

Offa_Rex - December 6, 2015, 11:39 pm

amazing work dude , if u can add group box it will be fantastic

Fein - December 7, 2015, 6:01 pm

Solid theme, enjoying the simplicity and modernization.

AspectModding - December 8, 2015, 5:39 am

This is the theme I only use, it really clean and extremely professional looking, in the next update I would love to see if you include a form design so I don't have to keep using another theme for it, a option so you can a tab category and this theme will be perfect.

Titan1998 - December 10, 2015, 2:25 am

its a nice theme but i can use your alert box in your Aether Theme ? can u fix it for me ?

Josh? - December 10, 2015, 6:53 am

If you always use the same theme for the form, you could edit this one to add just the base from the other one.

mrnikbobjeff - February 10, 2016, 1:13 pm

I found a bug in the theme. When you select a custom Cursor it does not actually show the selected cursor. Furthermore the Enabled property is not displayed in any way, tricking the viewer into thinking that the control is active

Oscura - February 10, 2016, 1:36 pm

Very nice theme, looks very modern and professional!

bluntly - February 12, 2016, 1:10 am

Nice :) Keep up and improve - There is potential :D

Lexus™ - February 17, 2016, 3:58 am

such a piece of art ! thanks man

i love u XD

thanks so much.

HiT-Man - October 21, 2016, 2:16 pm

SUPER NICE MATE ! THANKS A LOT...

THIS IS A PROFESSIONAL'S JOB !

Icoderz - November 21, 2016, 1:52 am

Nice work mate ill be sure to use the updated version.

Saixo - November 7, 2017, 3:35 pm

Thanks alot. Was searching for something like this :)

SLIDERzz - *December 18, 2017, 10:26 am*

This Theme looks fresh af, Good work bud

Hopsin - *December 20, 2017, 2:48 pm*

Although this is old thread, its very nice. Thanks for your contribution, buddy !

Dyrr - *January 11, 2018, 9:56 pm*

It's always pleasant to browse this section, amazing designs !
