Hey guys are you looking for new popular niches that are super HOT right now? Well if you are we at Mgcash just added this awesome Pre Hosted Landing Page for Fifa 17.

With this Landing Page everything is set up and optimized for every device and browser, you only need to promote it and to earn with it.

If you have some special landing pages in mind, leave a comment bellow and we will make sure to

add it to our huge list of Landings that we have. Here are some of the preview of landing page:

Two more big news also:

1) Also we added options to change our Landing Pages as you wish.

Custom HTML header content:

You can put here any valid HTML meta tags(for example og-tags) and HTML title which will override default site header content.

2) Second thing is that we support now CSS/HTML templates from other networks like CPA Grip and Adwork Media so you can just copy and paste it to us and it will work, you would just need to add our locker and that is that.

Again awesome news from Mgcash Media!!!

New Super Option for your content lockers. We are the First Who Developed it! We are again ahead of all competitors in the technology and ideas. We are changing the game and implement innovative ideas in our products. We developed Mgcash together from the ground up and I can confidently say that we have the most superior content locking technology out there!

Soon... In Mgcash - Bitcoin Content Locker !!!

How many times you wanted to pay for something with Bitcoin's but there was no option for that? That is why we added this possibility for all users who surf the net. With Integrating Bitcoin to our locker CR will have BIG BOOST hence you will earn A LOT MORE!

Advantages of Bitcoins in Mgcash Media Locker's:

- Safe, simple and cheap.

The problem with traditional online transactions from the perspective of the seller is that Credit cards, PayPal you and other online payment systems allow buyers to claim their money back. With Bitcoins once you have the money you have it and that's that. Buyers can not in any way take the money back and the seller can safely ship the product or perform the service that the client purchased.

- With Bitcoin it is very possible to be able to send and get money anywhere in the world at any given time.
- Anonymous and Secure.
- Get payments straight to your Mgcash account.
- Easy integration of Bitcoin Content Locker.

Monetize your content and website with Bitcoin Content Locker! Mgcash provides a welcome alternative to the subscription payment model. Once a Mgcash session is established, surfers really do pay as they go - making micropayments each time they unlock content or links. Bitcoin Content Locker is a true on-line micropayment system. Everyone wins.

Let us start earning together and dominate this field.

If you have any questions about this or need help with approving Nem is always available on skype or on email.

I will add few screenshots of them but if you want to see them all you can easily check them in our Pre Hosted Menu. Also our Bit Coin locker is integrated with Pre Hosted Landings and users GET Exactly what is on Lander, so you will not trick or misguide users.

Some of the Landings can be seen here:

Clash Of Clans

Unturned

Pinterest

Bloons TD5

Minecraft

Subway Surfers

Tetris

We implemented another great thing with our content locker to boost your CR.

Here is the example how it looks like:

As you all know, Captcha is very common now on every site, so users will be familiar with this and will do that quickly as they already see captcha everywhere.

This new locker is easy to set up and you can put it almost everywhere you want.

Hello guys, we have again amazing new tools and information that only Mgcash Network have.

As you are all now starting to earn better and building a lot of new websites, sometimes you left old sites behind because there is not much traffic with them or you don't know how to monetize it?

Well for that we have our new tool that will help you to earn while you do ABSOLUTELY nothing.

Our new tool is called: PARKED DOMAIN MONETIZER.

What can you do with our new tool you ask? Well answer is pretty simple:

Submit your URL to our system and we'll serve your pages with relevant CPA offers ads to maximize your domain monetization and achieve higher RPMs!

- 1) We offer the highest alternative monetization to traditional PPC
- 2) Instead of using a standard Error/404 Page that generates no revenue, let us redirect and monetize the traffic.
- 3) Let us generate a country-specific redirect on your page, providing you with an additional source of revenue for your website.

[img]http://mediaepro.com/img/post-item/domain-parking.png[/img]

Now you ask what you need to do so you can use our new tool? Again answer is very simple we will give step by step explanation how to do it:

How to set up Domain Parking with your web hoster:

We offer the easiest and most convenient method to set up Domain Parking: Rerouting by Domain Name Server (DNS).

And it really is this easy: Log into your personal customer account with your web hosting company or domain registrar. Next change the name server entry as follows for domain:

YOUR DOMAIN NAME

And then you will get 2: NS Servers

Important! It might take a while before NS servers are updated, usually updating NS servers takes from 1 to 48 hours.

If you have any questions about this or suggestions you can always contact me here or Nem on his Skype or Email.

If you have traffic but don't know how to monetize it, let me know and I will help you right away with that, so you can start earning as fast as you can and as much as you can.

Hello guys, I hope you started to prepare your niches because as we all know on summer there is a lot more traffic then in winter and because of that we upgraded our system to maximize your CR and EPC with our offers and our new tools that we added.

Do you use some tools to detect how much traffic you had on your site and how much people looked around the offers? Well we added options to know exactly how much traffic you had specified time, how much views how much clicks and to see from what devices people clicked on your offers.

Preview of Device Breakdown:

There is also a lot more new options that you can explore with us, from Custom Landing Pages that you can create in just few minutes to detail preview of your traffic and to keep track of it.

Hello there guys, we have made some special edits just for your needs. As you all know, it is very

popular again to use Movie or Tv Show niches and because of that we have added another High Converting Landing Page with us for Movies that you can EDIT in FULL for anything that you need or want. From Movie title, description, how long it last and many other options that we offer. Here is just a simple preview of it but remember that in this landing page it is also included sound and video for better conversion.

How Landing page looks like:

Also next to this awesome Movie Landing Page we have added a lot of Link and Content lockers templates that you can use for any niche you need.

Here are some previews to check out:

Next to these new things we added, we have also added High Converting Movie offers that can accept high quality traffic with awesome CR combined with or without our Landing Page.

This offer is for every country so you can target world wide and expect to get leads. One more important thing for this offer is that payout is 18\$ and you can promote it everywhere. If you have questions about promotion or anything you can always contact me and I will help you out.

Here is the preview of that offer:

For anything else, feel free to send Nem a message about anything and he will do his best to help you out.

Bitcoin Reminder??

Hello guys, I just wanted to remind you and to show you awesome news that we have at Mgcash Media.

If you all remember we are the first to get Bitcoin as payment system for our offers. If you use our locker you will be able to put Bitcoin payment on them, so users that come on your website will not be forced to fill out the offer but they can just pay it via Bitcoins fast and easy. The good thing about that is that you can put how much you want for your transaction to be. And system will detect the current price of the bitcoin and charge users how much you put on your locker.

Here is the quick preview of how it looks like:?

Also we have added some of the new landing pages and templates for the link lockers that you can use it also. ??

Here is the quick preview of new Link Locker:?

Next to the things we added to our inventory we are also adding daily new offers for all GEO's and verticals.??

Here just some of the offers we added and some of the best performing offers that we have:??

If you have any questions or want to promote any of our offers, feel free to contact Nem on skype or the email. ??
