This is awesome, very glad to see you made it.

Any way to make it open the new reply page as opposed to the quick reply? Or at least scroll down to the quick reply.

Either way, thanks for this :) ?

I'll try to see how I can tweak it to make this.

Yeeeeeee! Ought to make proofreading news posts faster for everyone. Thanks for doing this, Hash.

Wires - December 2, 2015, 9:28 am

Posted on the other thread too, but thanks a bunch for this.

Edit: Seems to be a problem. Can't quote more than once without reloading the page.

Indeed, I saw that but couldn't think of a way to fix it; I'll look into it.

I'm glad I could help you guys. :)

Installed, this is a brilliant plugin, and I know because Hash G. is amazing, and bae.

Trenchguns - December 2, 2015, 10:43 am

Well this certainly came out very quickly. Gj!

Raymond Reddington - December 2, 2015, 10:58 am

You sir are brilliant. Thank you for the script.

Hash G. - December 2, 2015, 1:24 pm

Thanks guys for your kind words. ?

Done. To show the settings, just click on the button with nothing selected.

Legend ?

Small bug I can live with as it only happens once: When you change the settings you need to load a different page for them to take effect.

Can I request one more setting to open full reply in new tab? <3

Fixed, and I would but currently I'm not sure if it is possible. I'll have to look into MyBB source code hoping Omni has not edited it.

Fiber - December 3, 2015, 10:31 am

Good job. Very nice as always Hash!

From a quick look it's just a POST request with a form. Might be possible to replicate in a new window

Indeed, it was quite easy, should of thought about this before. Enjoy!

It looks like it's not working for custom font size, I'll push an update probably tomorrow.
