How to get DASH / LTC / DOGECOIN Awards with SHAPESHIFT.io

Hello, I've decided to present a mighty useful tool for swapping crypto currencies instead of walking through exchanges, waiting for confirmations, and most importantly OWNING A WALLET to cashout to, and send to your payment address.

ShapeShift.io is an instant currency converter that allows you to swap over 30 different currencies back and forth for the going market rate, I am going to teach you how to purchase the LTC, DASH, and DOGE award with this tool!

1. Visit <https://shapeshift.io>
2. Go back to HF, select the award, fill in all info and make your way to the payment page.
3. Copy the address, copy the amount, and head over to shapeshift.
4. Paste the amount and payout address into these fields:

5. Click start, it will provide you with a address to send your BTC to and the EXACT amount you need to send. Once you send, after one confirmation the coins will be sent to CoinPayments and you will get your award.

This process is to prevent anyone going through the currency exchange section, and potentially getting ripped off (it happens, we all know it) and for those who are L33T who can't make exchange threads there.

I hope this helps you all, good luck and thank you for donating to HF for those who buy the awards!

I've been using this website for a long time, for any kind of crypto currency trade I needed. I always loved how it was pretty much instant and smooth.

wtf, it is exploting hf?
how is it exploting hf...
you are possibly the dumbest person i've ever seen on this forum

This is what this guide shows you....

How to buy the crypto (dash, ltc or doge) with btc, instantly, without dealing with members or risking funds.

This is not exploiting at all.
