Thread: [NETGUARD.IO | .NET OBFUSCATOR | ROCK-SOLID | UPDATED | LIVE SUPPORT | 3+ years](#)

Aristocles - December 4, 2015, 8:04 am

Wardow - December 4, 2015, 8:06 am

One of the best .NET Obfuscators for sure! Get protected today and don't regret it!

debug - December 4, 2015, 12:22 pm

Vouch. This obfuscator is pretty amazing. Have tested it myself.

Cecilia - December 16, 2015, 2:27 pm

Lovely obfuscator, nothing more to say.

Made by very experienced users and very stable.

Aristocles - January 28, 2016, 2:26 pm

up ! Prices have been lowered and more and more people use it ! I'm glad to be honest :)

If you have any questions or concern please send me a message !

Aristocles - January 30, 2016, 12:45 pm

Bumping my thread, i've replied to somebody's PM and we agreed on a price for his service, If you have any concern or questions please PM me ! :)

cawkre - February 3, 2016, 1:20 pm

just wanted to say this is a very good obfuscator found your keygenme and has me stumped so far removed native layer thats all ;) but this is certainly one of the best obfuscators on the market and will certainly keep your app protected

Aristocles - February 23, 2016, 4:51 am

BUMP ! New website, new prices, new options, improved Native Shield, everything is ok to protect your file !

Rhez - February 23, 2016, 4:57 am

I vouch for this quality service!

Dreamzje - February 23, 2016, 6:02 am

I can vouch for netguard at first it had a few bugs that I reported to him, but it seems he's fixed them and everything seems to work flawless.

Aristocles - February 24, 2016, 6:30 am

(Feb 23, 2016 07:02 AM)Dreamzje Wrote: [\[CITE\]](#) I can vouch for netguard at first it had a few bugs that I reported to him, but it seems he's fixed them and everything seems to work flawless.

Thanks a lot for your vouches ! :)

Sleek. - February 24, 2016, 6:43 am

Constants, anti dump & anti tamper is free in ConfuserEx, how come it isn't in .NETGuard?

Katarina Du Couteau - February 24, 2016, 6:44 am

What obfuscation rate has it? (° ? °)

Aristocles - February 24, 2016, 9:57 am

(Feb 24, 2016 07:43 AM)strikecarl Wrote: [\[CITE\]](#) Constants, anti dump & anti tamper is free in ConfuserEx, how come it isn't in .NETGuard?

Because it's not a free obfuscator ? You can't compare ConfuserEX and .NETGuard. Especially on constants protection. ConfuserEX can be deobfuscated within a minute thanks to free public tools. .NETGuard has never been fully deobfuscated. And I'm highly active on RE boards.

Sleek. - February 25, 2016, 3:11 pm

(Feb 24, 2016 10:57 AM).NETGuard Wrote: [\[CITE\]](#) I'm highly active on RE boards.

Yeah i saw, seems like a nice service overall.

Kedox - February 25, 2016, 3:22 pm

So it's \$9 for 15 uses? Seems great

Aristocles - February 25, 2016, 3:32 pm

(Feb 25, 2016 04:22 PM)Kedox Wrote: [\[CITE\]](#) So it's \$9 for 15 uses? Seems great

Hello ! :)

15 for \$9

50 for \$29

100 for \$50

AimBRoT - March 9, 2016, 5:41 am

Any cracks so far?

Would love to use it for a commercial project

Sleek. - March 9, 2016, 5:44 am

Alcatraz released a paper on how to remove native shield and some other protections some time ago, these methods have now been patched.

But at the moment no full crack (publicly released atleast).

Wardow - March 9, 2016, 5:56 am

(Mar 9, 2016 06:44 AM)strikecarl Wrote: [\[CITE\]](#) Alcatraz released a paper on how to remove native shield and some other protections some time ago.

Once this paper has been released, it has been made out of the range of even removing any protection of NETGuard.

Cecilia - March 9, 2016, 6:17 am

(Mar 9, 2016 06:56 AM)Wardow Wrote: [\[CITE\]](#) Once this paper has been released, it has been made out of the range of even removing any protection of NETGuard.

I do believe he commented on the 'update' for the native packer.

Either way, its 1 protection out of many.

Aristocles - March 9, 2016, 3:27 pm

(Mar 9, 2016 07:17 AM)LaPanthere Wrote: [\[CITE\]](#) I do believe he commented on the 'update' for the native packer.

Nop, he did a "fix" for the EP trick but then we patched it, 20 minutes after he released his update. I talked with him last week, sent him a bin and no reply yet

Sleek. - March 9, 2016, 9:51 pm

(Mar 9, 2016 04:27 PM).NETGuard Wrote: [\[CITE\]](#) Nop, he did a "fix" for the EP trick but then we patched it, 20 minutes after he released his update. I talked with him last week, sent him a bin and no reply yet

How much does native shield add to the file size?

Cecilia - March 10, 2016, 12:21 am

(Mar 9, 2016 10:51 PM)strikecarl Wrote: [\[CITE\]](#) How much does native shield add to the file size?

Note that this was on an earlier version of NETGuard.

My original exe was 9kb.

The output was 352kb with ONLY native shield on.

Sleek. - March 10, 2016, 3:10 am

(Mar 10, 2016 01:21 AM)LaPanthere Wrote: [\[CITE\]](#) Note that this was on an earlier version of NETGuard.

You didn't send me a PM but thanks that you gave me 10 Extra credits for the waiting time... :)

Aristocles - March 18, 2016, 8:48 am

UP ! Obfuscation at its finest ! :) disguiser is offline for the moment so we are the #1 literally

Sleek. - March 18, 2016, 9:13 am

.NETGuard seems to be overall pretty good. ?

Renaming Renames your variables to legit looking names.

Constants protection didn't do anything for some reason.

Anti Tamper works as intended. But it can be removed pretty much the same way as ConfuserEx's

Anti Tamper.
Method Puzzling works as intended.
Anti Ildasm works as intended.
Proxy Call is a pain in the ass to reverse ?

cawkre - March 29, 2016, 4:09 am

(Mar 18, 2016 09:13 AM)Strikecarl Wrote: [\[CITE\]](#) .NETGuard seems to be overall pretty good. ?

Proxy Call is a pain in the ass to reverse ?
just going to say if native shield is included then anti tamper and constants are extremely different
and anti tamper cant be removed the same way

.Cherry - April 3, 2016, 10:48 am

Looking really good will definitely need this in the future! GLWS

You paid for 1 credit with BTC and sent less than \$2 USD ... but anyway, I gave you 15 credits.

Diamondo - April 28, 2016, 5:22 pm

No. Wtf? I used paypal...

<https://i.imgur.com/xYGLA.png>

I paid all the money which were required for one credit, probably coinpayments or paypal took the

fee.

Wow. Just tested it. ILSpy almost exploded.

Love you .NETGuard and your obfuscator! Big vouch for this service.

Aristocles - May 8, 2016, 1:32 pm

Hello ! :)

We have updated the website, it should be quicker now, let me know it in comments !

Cheers.

P.S : Still working on the Desktop app, and on the next version of the website !

Aristocles - May 12, 2016, 7:37 pm

I'm working on the next update and I've implemented an history feature so you can download the file you obfuscated before.

Those file are stored and encrypted using your account password and are decrypted during the downloading process. You can still remove them. ?

We do not store original test file any more, only protected files, as long as it's informations.

File info includes MD5, stored in the DB inside the user's sub-DB, so if you send a file and the output does not work you can try to protect it again with different options, and since the MD5 is already known, it won't cost you any points.

For Antitamper, we did some tests with decryption-when-called method and it seems to work with .NET 4.5 too now, it's still buggy with reflections and WPF file mainly though...

Anything you would like to see on NETGuard ? ?

I've redesigned the site following an UX/UI based pattern, everything you see is made to either help you to protect your file or to maintain protection. Just obfuscation, no bullshit.

Aristocles - May 20, 2016, 5:58 pm

The new website has been released. We are still working on it but it is now available !

<http://netguard.io>

BoliBerrys - May 30, 2016, 10:14 am

Vouch for NetGuard!

Works flawlessly :D

<https://i.imgur.com/g7lqM1h.png> ;)

(Jun 2, 2016 11:31 AM)McDolands Wrote: [\[CITE\]](#) Come on fam we're waiting on it AAAAAAAAAAAAAAAAAAAAAAAAAAAAAAND its gone. It's all gone.
<https://www.youtube.com/watch?v=-DT7bX-B1Mg>

It's all right everything is up now ! :) ?

Quobi - June 3, 2016, 2:02 am

I've started to used netguard recently and I like it a lot. I also like the idea of not being taxed with another shield if it's the same app.

This service is amazing and worth the money, also it needs more customers because I'm sure there is a lot of hard working behind it.

I've send you an email NetGuard with one question, I can't PM you since I don't have enough posts.

BassBoostOfficial - June 3, 2016, 2:09 am

Do you think this can be de-obfuscated by tools like de4dot in the future? Do you offer private versions for people that can't risk something like that to happen?

Wardow - June 3, 2016, 2:12 am

(Jun 3, 2016 02:09 AM)BassBoostOfficial Wrote: [\[CITE\]](#) Do you think this can be de-obfuscated by tools like de4dot in the future? Do you offer private versions for people that can't risk something like that to happen?

Updates are being pushed nearly every week if not every day when we are on an updates spree, so it's very unlikely to be automatically deobfuscated.

BassBoostOfficial - June 3, 2016, 2:14 am

(Jun 3, 2016 02:12 AM)Wardow Wrote: [\[CITE\]](#) Updates are being pushed nearly every week if not every day when we are on an updates spree, so it's very unlikely to be automatically deobfuscated. Alright. Can you explain this tho? :P

It's an HTML template

BassBoostOfficial - June 3, 2016, 2:17 am

(Jun 3, 2016 02:15 AM)Wardow Wrote: [\[CITE\]](#) It's an HTML template Obviously, but why is it mirrored lol? Can't you just download the template from their official site? Is

this just a webrip?

Wardow - June 3, 2016, 2:28 am

(Jun 3, 2016 02:17 AM)BassBoostOfficial Wrote: [\[CITE\]](#) Obviously, but why is it mirrored lol? Can't you just download the template from their official site? Is this just a webrip?

It's not mirrored, this is an HTML comment because the base template was took from an online template demo.

BassBoostOfficial - June 3, 2016, 2:49 am

(Jun 3, 2016 02:28 AM)Wardow Wrote: [\[CITE\]](#) It's not mirrored, this is an HTML comment because the base template was took from an online template demo.

But you have mirrored the signin html page from freakpixels using HTTrack Website Copier..

Wardow - June 3, 2016, 3:27 am

(Jun 3, 2016 02:49 AM)BassBoostOfficial Wrote: [\[CITE\]](#) But you have mirrored the signin html page from freakpixels using HTTrack Website Copier..

Your point?

CloudCrypter and most of sites being built here uses copied templates, comments have just been forgotten here and not removed, wanna teach me how to work?

BassBoostOfficial - June 3, 2016, 3:31 am

(Jun 3, 2016 03:27 AM)Wardow Wrote: [\[CITE\]](#) Your point?

CloudCrypter and most of sites being built here uses copied templates, comments have just been forgotten here and not removed, wanna teach me how to work?

Just saying if you want to seem professional ripped sites are not the way to go

Wardow - June 3, 2016, 3:39 am

(Jun 3, 2016 03:31 AM)BassBoostOfficial Wrote: [\[CITE\]](#) Just saying if you want to seem professional ripped sites are not the way to go

You can tell that to every cracked account seller websites, cloud crypters, and just almost any website that's built here, none of them use purchased templates unless it's just straight public bootstrap css, but it's quite overused.

Closed User - June 3, 2016, 6:30 am

what are you niggas doing

the file doesn't get protected at all, just renamed

great service regardless

Aristocles - June 3, 2016, 7:50 am

(Jun 3, 2016 06:30 AM)The Thrill Wrote: [\[CITE\]](#) what are you niggas doing

Thank you, I realise what the problem was

It redirects to login.html not signin.php

PhantomCode - June 7, 2016, 2:25 pm

Will be needing this soon , great project

Aristocles - June 8, 2016, 10:49 am

.NETGuard v5.5.1

Added Error Reporter : Every error is now handled and a fully report is prompted.

Fix Proxy Call and Method Puzzling for .NET 4.6.1 and for some WPF

Website has been updated (again) ! <http://netguard.io>

Working on a Constant2Pointer feature <#>

NativeShield is being re-coded in C++, expect a huge size gain

Thanks your for using .NETGuard !

<http://netguard.io/>

Added the Error Reporter Feature !

Every error will be handled and a user-friendly WinForm will appear, giving you full information about the stack and the current process of your software ! :)

The prompted message is Read-Only for contacting purpose but you can copy-paste it as you wish.

Evolved ® - June 13, 2016, 1:55 pm

Login does not work and has 500 error

Aristocles - June 29, 2016, 7:14 am

(Jun 29, 2016 06:32 AM)????? Wrote: [\[CITE\]](#) Login does not work and has 500 error Everything is working here ?????, would you mind ctrl+F5 ? ?

eCoLoGy - July 1, 2016, 9:07 pm

This is a great obfuscator and .NETGuard knows what he is doing!
If you need to protect your APP, go with it. ?

Riyu - July 1, 2016, 9:10 pm

This product is so amazing, Has my vouch

squatZ1 - July 1, 2016, 9:15 pm

Vouch for this guy, awesome dude with an awesome product.

TopKekeroni - July 1, 2016, 9:15 pm

Vouch for this amazing service! :)

Aristocles - July 3, 2016, 7:44 am

Thank you everybody for these vouch ! :) I really appreciate that !

I'm currently working on the website, writting the documentation and the FAQ, hit me up if you would like to ask something so I can put it on the website

Aristocles - July 11, 2016, 6:31 pm

Hello everybody ! :)

Tell us what you think about NETGuard, what shall we improve, what could we make to make it better etc ?

You may be rewarded as always !

Cheers

Codefuser - July 13, 2016, 4:11 pm

I think you should post a crackme in the original post so we can all take a look at it.

Aristocles - July 14, 2016, 9:13 am

(Jul 13, 2016 04:11 PM)Codefuser Wrote: [\[CITE\]](#) I think you should post a crackme in the original post so we can all take a look at it.

There are dozen of them on tuts4you ?

Aristocles - July 22, 2016, 5:40 am

Hello :)

The next person who reply will have a 5 extra credits for free ! We are working on some very nice features for the future !

Cheers

?etro - July 22, 2016, 7:58 am

This is nice. Good luck with sales, may buy myself.

Aristocles - July 24, 2016, 6:13 pm

The panel has been updated and a fuly written documentation is now available ! Check it now at <http://netguard.io/>

Aristocles - July 31, 2016, 7:46 am

I'm away untill 7th of August ! So if you have questions or complain please be patient, I'll read each case / each message you send me.

Have a nice week :) !

Aristocles - August 5, 2016, 5:42 am

We are back ! :) Plans are time-based now, we converted your points to days and from now you can protect your file an unlimited number of time without being charged :)

Aristocles - August 14, 2016, 7:12 am

Hey ! The next person to reply here will have a fully access to all of our premium features for 24h for free !

Closed User - August 14, 2016, 7:18 am

Did you fix the anti-debug? :)

Aristocles - August 14, 2016, 12:43 pm

(Aug 14, 2016 07:18 AM)The Thrill Wrote: [\[CITE\]](#) Did you fix the anti-debug? :)

Yes and we also updated other features such as Encryption of Constant and also Antitamper

send me your NETGuard username so i can make you premium for 24h

HackandBot - August 14, 2016, 1:14 pm

(Aug 14, 2016 12:43 PM).NETGuard Wrote: [\[CITE\]](#) Yes and we also updated other features such as Encryption of Constant and also Antitamper

This is not a support thread, but a sale thread as a matter of fact. We offer support via mail 24-7 if you need help, it's written everywhere on the website :)

You were charged of one credit because you forgot to select external .dll even thought it's written everywhere on the website to upload them too. We don't refund points for people who don't abide the rules. Nor for ignorant people.

Your file is not compatible with 'Var Melting' and 'Hide Access'. The first one because of the way you play with HWID, the second one because you somehow merged a file with your file and it leads to corrupted address unfortunately.

No need to worry, if you go to your profile and see your obfuscation history, you will be able to download your former obfuscated file. Our tech' team has successfully obfuscated your file with the optimal solution as far as you last obfuscation task is concerned. This way, you will not be charged. You can now freely download the obfuscated file.

We are going to release new updates soon ! :)

gotoel - November 17, 2016, 7:27 pm

Have not had a good experience with the obfuscator. Wasted around 27 credits trying to figure out good settings and ended up not even using it in the end. I wouldn't recommend it for people with complex software like myself.

I cannot take the time E-Mailing and waiting for replies (especially with a product to ship), I had E-Mailed them initially asking them some questions and have not heard back. A live support chat on the site would help a LOT.

All-in-all had high hopes, but ended up being a waste of \$50 sadly.

I could see it being useful for people with smaller and less complex software/systems.

cawkre - November 17, 2016, 10:46 pm

I will contact you as soon as I can, but it seems you got an error from my E-Mail provider, which is hotmail.com? So I can try GMail I guess and see if that helps.

(Nov 18, 2016 09:58 AM).NETGuard Wrote: [\[CITE\]](#) If you cannot take the time to e-mail our support, then you should not use our services,

I slightly disagree with this and feel that there should be more work done in instruction on which settings to use. The actual documentation about each obfuscation method is pretty thorough.

All-in-all I don't think it will work for me, as I have a Fody merged 64bit application. But I will go ahead and send you a message when I get the chance.

cawkre - November 18, 2016, 1:53 pm

Baitable - March 6, 2017, 8:29 am

Huge vouch for this obfuscator!

Turns out very hard to read, when I had issues I contacted support and got a very quick reply, will be using this quite a lot :)

Aristocles - March 19, 2017, 9:47 am

Very soon : NETGuard API !

We proudly announce that during the next days you will be able to use NETGuard through its public PHP - dotNET API. It runs smoothly and allows you to protect your file without going to the website. This is a little step closer to what will come as a Desktop App (preview <https://i.imgur.com/lfROPVw.png>) later in 2017.

Such news come also with a little change : this API will be delivered

with Time-Based Plan !

This API was requested by some of our users to deploy unique built file at runtime, but may be used for other various scenario !
Prices are still under debate, if you have ideas please MP me.

Goldmouth - March 19, 2017, 12:46 pm

WOW i cant wait for this. Good job man.

Aristocles - March 21, 2017, 7:39 am

FIX V5.6.1

FIX : Encryption of Constant

FIX : Var Melting

FIX : Anti debug

FIX : Hide Calls

__->All the app that weren't supported by the above feature should be now ; if not, PM me.

NEW : Starting to work on NETGuard Licencing System.

Aristocles - March 22, 2017, 8:43 am

NEW V5.6.2

NEW : Improved constant mutation complexity (as you can see above).

NEW : Improved Hide Call (as you can see above).

FIX : Compatibility problem between Hide Call and Constants Protection.

Aristocles - March 24, 2017, 2:14 am

NEW V5.6.3

NEW : Added String Splitter feature (by default temporary with Encryption of Constant)

NEW : Improved Anti Debug to crash OllyDBG

NEW : Started to work on a new feature <https://i.imgur.com/Uo3Gryg.png>

If you have any trouble or complain about NETGuard, please PM me and I'll resolve your issue.

Cecilia - March 24, 2017, 3:10 am

I'm so very glad to see this project still being developed.

New feature reminds me of something ;D

Aristocles - March 24, 2017, 5:21 am

You will be able to migrate in time ! :) I designed a netseal importer so you can switch smoothly from a licensing system to another. I include cheap prices and strong close support.

@New:

Website is fully operational and is able to protect both EXE and DLL files ! :)

ToUpper - April 20, 2017, 6:37 am

Naywyn - April 20, 2017, 1:11 pm

Hey, I've tried to obfuscate my application: I selected both my application & dll's but the website keeps telling me I need to add dependencies.

I've lost 2 points trying now.

SoccerBet - April 20, 2017, 1:15 pm

Hey ldk a shit about that but it look cool so its like a AV? But best then a AV?

Aristocles - April 20, 2017, 3:45 pm

It should be resolved now :) If you still haven't contacted support, please do, they will give you extra

points

Oxfd - April 20, 2017, 3:48 pm

I tested now and worked perfectly. Thanks for support.

Naywyn - April 21, 2017, 12:59 am

(Apr 20, 2017 03:45 PM).NETGuard Wrote: [\[CITE\]](#) It should be resolved now :) If you still haven't contacted support, please do, they will give you extra points

The issue is still not fixed, I mean, I could download my application this time but it still said I need to add dependencies. Just so you know.

And when I try to obfuscate the dll itself, I can't download it. Lost another 2 points, rip

Aristocles - April 21, 2017, 9:54 am

Allright received your Mail, I'll dig on it soon, about your points, I've sent you them back before ! (:

Vouch for him all works fine! Great obfuscater, coded with tons of knowledge!

Aristocles - April 26, 2017, 10:59 am

NETGuard.IO Desktop App has been released.

Waiting for your feedback.

Goldmouth - April 26, 2017, 11:30 am

This looks great! good to see dev is very active. Lic system coming soon?

BoliBerrys - April 26, 2017, 12:43 pm

Oh good. Desktop App.

This is just amazing!

Aristocles - April 27, 2017, 3:56 am

You can now buy API token to use our public API right from your .NET file !

API token are not point-based but time-based ! Get unlimited obfuscation for one week or one month.

Aristocles - May 1, 2017, 8:17 am

a little bump to let you know that I'm constantly working on new updates !

CoderEX - May 1, 2017, 9:11 am

Does the API have all features? Is it an alternative to your point based system?

In other words, is this the new system that is meant for users that are looking for a subscription based package?

Magna imperium - May 1, 2017, 9:34 am

or if you want to resell,idk, you can do a lot with the api lol

fulcrumbot - May 9, 2017, 9:52 pm

I am interested in this product, but it seems to be crackable by some French individuals as of Jan 13, 2017.

<http://hackandmodz.net/threads/crackme-netguard.19850/>

I am guessing the person did a lot of manual work, but it was still cracked.

Any plans on improving the security/obfuscation?

I am starting to think .NET is a really shitty language to code in if you want it to be protected.

Aristocles - May 10, 2017, 4:12 am

I am starting to think .NET is a really shitty language to code in if you want it to be protected.

Post creation date is October 2016, reply is January 2017, so took 4 months to crack a program protected by an 8 month-old version of NETGuard.IO.

As you may have seen on this thread, I'm coding on NETGuard.IO every day or so ?

as stated by some users on tuts4you, its useless to deob a file protected by NETGuard, as we react instantly

cawkre - May 12, 2017, 6:50 am

Hello I am cawk on that site the one who unpacked the file

What you also have to take into consideration at the time I worked closely with netguard and had some inside information which did also help me solve it and as stated in the post it was a very old version

When it was completed I was sent a new version and without even seeing my code he broke it anyway rendering my tool useless and this is one of the best things about this protector apart from its strength is that there are so many updates it doesn't matter if a person has a unpacker the odds of it working on many other files is slim

Ninja - May 23, 2017, 8:06 am

In how much does this degrade performance in my application?

And can this be paired with reflection (ie. remote assembly invoking)?

If you don't mind, could you also PM me the answer? I am highly interested.

Rhez - June 2, 2017, 6:20 am

I have pmed you regarding with product.
Thanks in advance. ?

TrackPro+ - June 2, 2017, 8:28 am

Used this obfuscator in the past, works very well but there is some lag when making connections to the internet ranging from 2 secs to 10 seconds.
Ovwrall, great product. Keep up the good work!

Aristocles - June 13, 2017, 12:17 pm

Little bump up to let you know that JITHooking will be soon available

Aristocles - June 14, 2017, 9:06 pm

NETGuard Desktop App v 1.3.0.0

Added smart compatibility mode.Avoid using specific features not compatible with .dll files [#link](#).

Added a warning sign for beta features.

Get notified if latest file is not the same as current to avoid wasting credits.

New UI.

Complete tour for beginners [#link](#).

Full description of features [#link](#).

if you have any recommendations please do so ?

Regards

Saixo - June 18, 2017, 2:32 pm

This obfuscator is great. The best thing is this personal and great support if you have any problems. It's worth his price. No need to buy expensive obfuscators anymore

Aristocles - June 18, 2017, 7:09 pm

NEW V5.6.7

NEW : Added a new Core Engine based on Accord-Framework, in other word, NETGuard is using Machine Learning. The more we will use it, the smarter it will become.

NEW : Added new Decomposition for Integers.

FIX : Compatibility problem between Native Shield and x64 applications.

FIX : Compatibility problem between Hide Call and x64 applications.

FIX : Compatibility problem between Renaming and Serialized data.

If you have any trouble or complain about NETGuard, please PM me and I'll resolve your issue.

Aristocles - June 20, 2017, 7:39 am

NEW V5.6.8

FIX : Compatibility problem between Native Shield and Settings property.

If you have any trouble or complain about NETGuard, please PM me and I'll resolve your issue.

Aristocles - June 23, 2017, 3:48 pm

NEW V5.6.9

NEW : Added Library Renaming to handle Library (.dll) and renaming in a proper way

NEW : Our team have been working on a new feature that will appear in v5.7 to protect your method from modification by excluding them from the file

Sickness - July 25, 2017, 4:38 am

Super Mega fucking vouch, he helped me a lot with my issues and gave me FREE points LMAO.
VOUCH VOUCH.

th3Mistery - August 23, 2017, 2:31 am

bullshit, paid my money and only got error and support doesn't answer they don't care I won't advice anyone

(Aug 23, 2017 02:31 AM)eyasma Wrote: [\[CITE\]](#) bullshit, paid my money and only got error and support doesn't answer they don't care I won't advice anyone
Hello

Like all support, sometimes we sleep, especially since I can bet I'm not in the same timezone.
Not to mention nobody in the tech team support received any report from user 'eyasma'.
And of course the support care about its customer, it's our way to earn money, not having a good support would be counter productive. We are not dumb. And NETGuard is not "bullshit".
We offer a really good support service, I'm really offended by your words

(Aug 23, 2017 04:29 PM)Allego Wrote: [\[CITE\]](#) This obfuscator makes my app flagged as malicious by some AV's

If your file is not illegal there is no reason to be scared : simply mail the av vendors or browse their false virus detection reporter service and send them your protected file.

Aristocles - August 25, 2017, 7:01 am

NEW V5.6.10

NEW : [Constants Protection] improved security strength with Native Code Protection.
NEW : [Constants Protection] Inject new type in global type.
NEW : [Code Flow] improved security strength with Native Code Protection.
FIX : [Hide Call] protect extension method, but avoid those that has parameter with default value.
FIX : [Error Report] don't add error report if the entrypoint is null.
FIX : [Code Flow] Fix control flow obfuscation for C# 6 null-propagation operator.
FIX : [Rename] Wpf Renamer support more pattern.
FIX : [Constants Protection] avoid integers that can cause an overflow.
FIX : [Variable Melting] Improve the check condition before removing a local.
FIX : [Native Code Protection] Fix condition to check IsLargeAddressAware.

If you have any trouble or complain about NETGuard, please PM me and I'll resolve your issue.

gdfg78fsd - October 4, 2017, 3:06 am

Does it work on .NET Core projects where the published result is a dll file?

HansSarpei - October 6, 2017, 6:15 am

I registered on your service site. I have a question regarding the plans.

If I buy the 5\$ plan, does 2 tasks mean that only 2 files can be obfuscated so it's a one time crypt? Or does it mean that you can do unlimited crypts of your files but only 2 at the same time?

Hope for your response.

Cyber Parasite - October 6, 2017, 12:03 pm

(Jun 18, 2017 07:09 PM)Martin Heidegger Wrote: [\[CITE\]](#) NEW : Added a new Core Engine based on Accord-Framework, in other words, NETGuard is using Machine Learning. The more we will use it, the smarter it will become.

What type of machine learning are you using and what is the exact purpose of AI in your obfuscator?

It's an interesting concept and I wish you best of luck with it.

Aristocles - October 23, 2017, 2:51 pm

(Oct 4, 2017 03:06 AM)gdfg78fsd Wrote: [\[CITE\]](#) Does it work on .NET Core projects where the published result is a dll file?

NETGuard fully handles .NET Core library projects.

(Oct 6, 2017 06:15 AM)HansSarpei Wrote: [\[CITE\]](#) I registered on your service site. I have a question regarding the plans.

If I buy the 5\$ plan, does 2 tasks mean that only 2 files can be obfuscated so it's a one time crypt? Or does it mean that you can do unlimited crypts of your files but only 2 at the same time?

Hope for your response.

NETGuard is a pay-per-use service, that means every action asks for a token, a point needed for the obfuscator to run the obfuscation task ; 1 token worth 1 obfuscation task, no matter how many features you select.

(Oct 6, 2017 12:03 PM)Cyber Parasite Wrote: [\[CITE\]](#) What type of machine learning are you using and what is the exact purpose of AI in your obfuscator?

It's an interesting concept and I wish you best of luck with it.

I replied to this question on the tuts4you thread (a must know website for such details in general) so I'll allow myself only a few minor additions to my previous answer, hope you don't mind.

'NETGuard core' has access to different data

- full obfuscation process log (e.g. : what has been applied, what went wrong)
 - saved informations about input file (generic categories following neuronal network's categories)
 - saved informations about output file (same as above)
 - full back-end database (all saved informations about former obfuscation process)
- ^_last point means also reports or support tickets's database

every report is linked to a non-working file, and 'NETGuard core' accesses the data of the non-working file to find the data related to the original file,

once it's done it will apply different static analysis on the file to find possible issues, relying on a set of entries we give it to search for, and output is tested by the customer, presumably working, now.

if the output is working as the customer wants, I let the core know it was a good solution and it learns from that.

As you can see I'm using Accord-Framework for compatibility solving process, as NETGuard is often said to have compatibility issue, which is true to some extent, since obfuscators are unfinished program by their nature.

Aristocles - February 28, 2018, 4:06 pm

NEW V5.7.1

NEW : [AntiDebug] protection is now prior thread and is running continuously in background.

NEW : [AntiDebug] protection includes more blacklisted software. and comes along with an anti VirtualMachine protection.

NEW : [AntiDebug] protection comes along with an anti VirtualMachine protection.

FIX : [Error Reporter] features to be compatible with EZLib Licensing System.

If you have any trouble or complain about NETGuard, please PM me and I'll resolve your issue.

FryPan - August 21, 2018, 6:03 pm

I just ordered 2 tokens lets see how it goes ?
