I dont think you understand what actually happened. He hasnt scammed you at all, infact if he gave you a refund itd be you scamming him. Cause his JDB does work, but like all the other ones youll find, it will only work on outdated versions of java.

So does it work? Yes.

Should he have told you its only for outdated versions? Yes, but it is on the thread.

OP sorry to say but ur wrong here, the report is pretty much invalid.

@Everyone else, picking on his english helps nothing but show how fucking immature and lame you guys are. Fucking embarrassments to the human race.
