Does this bypass the spam filter?

How long would this take to send 5 Million emails?

Would the program crash after loading 2-3Million emails?

Don't know the 2 & 3 question, but the emails I have tested bypass the spam filter, straight to the inbox.

Yes, it BYPASS spam filter 4 OUTLOOK/GMAIL/MAIL.COM

but 4 YANDEX MAIL => NO, it send to "SPAM FOLDER"

u can send such number of emails, because most of email PROVIDER have limited number of email u have the right to send DAILY

as i know GMAIL: 500/DAY

u need to read THE TERMS OF USE of the email providers

or open 3 or 4 acoount inevery companies

like yandex mail/gmail/outlook/mail.com

and ur ready to GO
