Thread: [Is it worth in the today's world still to learn hacking?](#)

Johny Wingston - December 6, 2015, 9:42 am

I hope for qualified answers. ?

Coordi - December 6, 2015, 9:43 am

Follow your dreams, if you want to do it, do it. Might come useful at some points.

?Alexander - December 6, 2015, 9:52 am

Uh, yes. People design software and as long as people do it, there will be faults that you can exploit.

Zahan - December 6, 2015, 10:15 am

Depends on the persons motives and curiosity.. .

CocoaNut - December 6, 2015, 10:15 am

Just letting you know since I get the vibes that you're fairly new to this whole thing. You are not able to learn just hacking.

You need to learn programming and from there learn how to exploit fuckas.

Coco_Cubana - December 6, 2015, 10:42 am

If you wanna learn boring shit... Yeah it's not as fun as you see in movies but if you want to pursue a career in say.... finding exploits in someones code and you would be the "hacker" some companies pay good \$ for this either by HR/\$ or flat rate by the job.

GL OP, remember whatever you decide what you wanna learn/do in your life is all up to you nobody can tell you what to do (unless you're underage than yes your parents have some or all rights)

Lrrr - December 6, 2015, 10:50 am

What do you mean in today's world?

We are pumping out more electronic devices then we could have ever dreamed of 10 years ago.

The art of hacking is understanding how something works and then exploiting that knowledge to modify the expected behavior of the object.

This is the BEST time to learn how to hack!

Sustainable - December 6, 2015, 11:52 am

There are jobs out there that will pay you to find exploits in their systems so if that's what you're interested in, sure why not

funtela - December 6, 2015, 12:02 pm

This is the BEST time to learn how to hack!
True. This is like the prime time to learn.

mr-rayzor - December 6, 2015, 4:02 pm

Hacking isn't something you can simply 'learn'. It's not one thing you can go and study. It's a mindset, a lifestyle. It will take years and years of honing various skills to become a decent 'hacker'.

It's always worth it to learn hacking, because hacking isn't specific to a certain field or technology. Back in the dark ages, 'hacking' was a big thing. Back when people were living in caves, 'hacking' was a big thing. Hacking is exploiting systems.

If you can't think outside the box, don't bother.

WarOnDrugs - December 6, 2015, 4:16 pm

Why wouldn't it be. It's an Art.

Johnny Wingston - December 7, 2015, 6:33 am

Thanks for the answers..

Do you have any advice with what i could/should start?

Creating a hackerlab at home, learn programming or whut?

GOD OF SARADOMIN - December 7, 2015, 6:41 am

yes m8 i believe that everyday there's something new and need to learn it , if u have time ofc
