Thread: [Might be infected, downloaded some stuff from a malicious fake website](#)

Brian Williams - December 6, 2015, 4:02 pm

Just went to a super malicious website, ended up downloading 2 things from there. Deleted the downloads however I'm still paranoid. Please check up on me, willing to do something in return if you do! I also haven't had a scan for a either, so I might as well check.

FRST - <http://pastebin.com/kc5fN7TK>

Addition - <http://pastebin.com/s6SbEGRz>

Please try and check thoroughly and carefully, if you help I'll be willing to do any favors, I'm not trying to mooch off of you guys.

Junkware Removal ToolPlease download [Junkware Removal Tool](#) to your desktop.

Shut down your protection software now to avoid potential conflicts.

Run the tool by double-clicking it. If you are using Windows Vista, 7, or 8; instead of double-clicking, right-mouse click JRT.exe and select "Run as Administrator".

The tool will open and start scanning your system.

Please be patient as this can take a while to complete depending on your system's specifications.

On completion, a log (JRT.txt) is saved to your desktop and will automatically open.

Post the contents of JRT.txt into your next message.

You want me to scan my system again and post those logs?
