Thread: [\[30% OFF\] Steelseries 350\\$/350 coupon \(Worldwide\)](#)

Ascent - December 7, 2015, 6:44 am

Hey guys, I have a few coupon codes for steelseries that will take off a certain amount off of the order and add free shipping.

Need proof that they work? Here is a order from a few days ago, that shipped out!

Spoiler [\(Click to View\)](#)

Yes, they were obtained legitimately, dont even ask.

Currently, this is my stock:

1x 350\$/350€ Coupon

[Autobuy Here](#)

I am getting more by the day, so check back every once in a while.

Prices for the coupons are 70% of their value.

For example, the 350\$ coupon will cost 250\$.

I ONLY ACCEPT BTC.

By purchasing the item, you agree to this T.O.S.:

1. I will not refund you in any way possible. The reason is that the coupon is only 1 use, and since it is digital, there is no way to be sure it wasnt used.

The only way I could refund you is if you show me on teamviewer that it doesnt work Right after purchasing, but this needs to be arranged.

2. You will not make a case dispute.

3. I reserve the right to change the terms of service at any given time.

I thought these linked to the account that they are given to?

There might be a delay to adding more stock, sorry about that.
