Thread: [\(UPDATED: Booter access\) Api Access to my booter \(2 Spots\)](#)

Good kid mad city - December 7, 2015, 10:05 am

New edit:

So i got many members joining the giveaway so i made some updates to allow people to access the api. Updates: One of the hf trusted members decided to help me out with the api thing and he suggested that we can make a booter. So now instead of 2 there are 5 lucky members who are gonna get a free lifetime access to the booter. Btw i will add 3 more 1gbps server to the booter to make it more powerful to start with. What you need to get the acc is to be (UB3R).

- For now (i still didn't decide yet) I wont be selling any spots in the booter its a private for me and for the 5 winners of the giveaway.

OLD POST:

To enter the giveaway post on the thread. I will only choose 2 Ub3r members.

-Api connected to my Dedicated Server (1 GBPS Port).

-It only allows UDP attacks, IF you have your own api which you want me to install on my server for you its okay.

-Server downs all home connection easily with no problem. If you get your own api you can also down some medium servers and websites.

-Server bandwidth is unlimited, So you have unlimited attack times.

The api which i have :

Sure sir, U got your own API?

Kyriall - December 7, 2015, 11:24 am

Thanks for doing this! Would be great to have

Casads - December 7, 2015, 1:07 pm

This looks great, thanks for the giveawayop

SIM-2223238 - December 7, 2015, 1:08 pm

Why not just give me access to your server because this is just shit.

Ill do some improvement for you.

Balding - December 7, 2015, 1:24 pm

I got my spot, so there's one spot left.
