Thread: [Email Recovery Service | Email Hacking Service](#)

Subliminalz - December 8, 2015, 8:15 pm

As the title says, I will be Hacking Emails for a reliable price.

I use a variety of several methods to successfully jack the provided email.

If you want to hack a Facebook account, there are tutorials here on Hackforums showing you how to get the email address of a person from Facebook and you can proceed to sending me their email and then I will get access to it and you can request a password change on Facebook.

Notes:

Please note that It's not 100% guaranteed that I will successfully jack the email.

If I do NOT get access to the email you get a full refund, no questions asked.

Do not PM me to jack OG emails, you will get ignored.

Price: \$45

Private message me or post here If you are interested.

25% off for the first 3 buyers!
