Thread: ['Rep User' link next to reputation count on threads](#)

Cammy - December 10, 2015, 12:41 pm

Read known problems below before proceeding

The link works the same as the Rate User button on the View Reputation page.

Downlaod: Click [here](#) to install the script.

Before:

After:

Use the appropriate browser extensions to use this script.

Known problems

None for me, but the code is shitty and may break at any given moment.

The problems below were for the jQuery version of this script, which I have removed from this page.

Check out my other userscripts:

[Closed Account Color Changer](#)

['View Last Post' link on 'Your Posts' page](#)

Meowth - December 10, 2015, 12:42 pm

This is a brilliant idea. I will be installing this. Thank you!

TRAUMA - December 10, 2015, 1:04 pm

Nice idea bro, thanks! Will be using it.

Cammy - December 10, 2015, 1:05 pm

(Dec 10, 2015 02:02 PM)xadamxk Wrote: [\[CITE\]](#) Can you rename it to Rep User? I'm anal man
I prefer it to be a + sign.

You can adjust the code yourself on line 22:

Cammy - December 10, 2015, 3:12 pm

(Dec 10, 2015 04:00 PM)xadamxk Wrote: [\[CITE\]](#) Plus sign and what I said aren't related.

I mean this [\[Userscript\] 'Rate User' link next to reputation count on threads](#)

I understand

Fixed it for you, nitpicker

?

Ninetales. - December 10, 2015, 3:13 pm

Fucking stellar.

Downloaded!

For some odd reason, I can't seem to click the post or edit button.

Lucy91 - December 10, 2015, 3:19 pm

Just installed this thanks OP

Cammy - December 10, 2015, 3:22 pm

Do you use any other userscripts that may conflict? I don't have this problem and am currently not in a position to reproduce and fix it

MD5 - December 10, 2015, 3:23 pm

Ayy jawe my man bringing some HQ stuff, installed that shit.

Btw it fucks up all the buttons, try to fix that.

Formant - December 10, 2015, 3:32 pm

Dude, yes. I was just thinking of this the other day lol!
Thanks

Cammy - December 10, 2015, 3:33 pm

As in experienced as I am if anyone knows how to solve that problem kindly inform me while I try to work out a solution on my own

Code is indeed messy (even has a line of unrelated code) lmao

It occurred to me I had not tested cross-browser compatibility I will look into this tomorrow now I will rest my eyes

Ninetales. - December 10, 2015, 3:33 pm

I have turned off all other scripts but this, and it still doesn't work for me. :(

!?! ?z? ???? - December 10, 2015, 3:41 pm

I cannot post a post with this on for some reason.

Formant - December 10, 2015, 3:45 pm

(Dec 10, 2015 04:41 PM)R?v3n Wrote: [\[CITE\]](#) I cannot post a post with this on for some reason. Weird. I have a bunch of other scripts running and I'm not getting this problem with this on as well.

Here is what I currently have:

Spoiler [\(Click to View\)](#)

Brendan - December 10, 2015, 10:07 pm

Script works fine for me, able to post and everything.

If you do update this, can you also make it work for classic post view?

Cammy - December 11, 2015, 1:57 pm

I've rewritten the userscript without JQuery since that seemed to be the cause of the BitButtons

messing up for some reason

It was absolute pain in the ass but I got the hang of it somewhat

Instead of a + sign it now says Rate User to be more noticable (I had to change the position where I appended the link, for some reason I couldn't append it next to the reputation count)

But, but... I liked the plus sign! Guess I'll run the "old" script ?

Brendan - December 11, 2015, 4:00 pm

You could just edit the code of the userscript back to a plus.

@OP: Any word about getting this script to work with the classic post view?

Cammy - December 12, 2015, 2:56 am

I worked on getting the initial script working all day yesterday (lol) so I didn't think of your classic mode just yet

Can you elaborate? Archive mode or do you mean the thread view mode where the user information is all put on the left side? Perhaps take a screenshot that will be of great help

If you go to your UserCP and click Edit Options, under Thread View there is an option for "Display Posts in Classic View"

Normal: <https://i.imgur.com/P4NXKTV.png>

Classic: <https://i.imgur.com/hGAl2V6.png>

Damn I can't get it to work properly for classic mode, the class name I loop through isn't the same and in classic mode it's the same class name used for alot of other stuff on the page such as the post date

Someone better fork this and fix/improve this mess, shouldn't be too hard. I can't believe an userscript like this wasn't made earlier either

Vobe - December 12, 2015, 1:02 pm

Call me a noob but how do I run this script with google chrome?

Cammy - December 12, 2015, 1:03 pm

(Dec 12, 2015 02:02 PM)Vobe Wrote: [\[CITE\]](#) Call me a noob but how do I run this script with google chrome?

Install TamperMonkey extension

Equip - December 12, 2015, 1:04 pm

Problem on your end (Chrome's part)

Cammy - *March 21, 2016, 2:21 am*

WebExtender is fucked and so are the userscripts, closed.
