Punctur - December 10, 2015, 5:15 pm

I create high quality sites for any type of niche you are looking for.
From autobuy sites, Madden coin selling sites, and Clothing Apparel sites all the way to local business websites...I do it all!

What is included:

- GoDaddy One Year Hosting (\$100 off)
- GoDaddy One Year Domain Hosting (\$9 off)
- WHOIS protection for your site (\$8 off)
- Multiresponsive Website layouts
- Easy for you to use
- Specialize in e-Commerce and marketplace type sites

I have multiple sites up and running that I have made for customers in the past year. They generate on average around \$1K-\$10K in revenue each month (just this year.)

I can create a site for you that earns money and is just like my other sites where I basically build you a whole brand and leave you in charge to collect the money!

Types of sites I can develop and brand for you:

Spoiler [\(Click to View\)](#)

1.) Currency Exchange Site

- This is for anyone that is looking to become a currency exchanger and get into the market of transferring different currencies.
- I will be selling high quality currency exchanging sites for you to build your brand around. -I will also help you start your own thread and help with advertising etc.
- Control your own rates for yourself and/or users to sell currencies on
- Get a percent of every exchange and rake up the cash

2.) In Game Currency Sites

- Madden Coin Selling Sites (My Top Sellers)
- Easy-To-Use interface for customers
- Responsive fully functional layout with customizable features
- Brand your own coin site or in game currency site

3.) Autobuy Sites

- Easily sell and manage digital or physical items
- Automatically take in money while on autopilot
- Upload files to sell for users to download
- Secure server to ensure protection

4.) Apparel/Clothing Sites

- Owned my own apparel site last year

- Knowledge of drop-shipping
- I know most of the cheap suppliers to profit off of (not reps)
- Easy to purchase interface for customers
- Realtime purchase logs and functional dashboard for tracking orders

5.) File Uploading/Sharing Sites

- Strong admin menu
- In-browser previews
- User friendly interface
- Download/upload limits
- Month to month charges per customer
- Multi-responsive layout

If you are serious about buying a site, please hit me up via PM!

I accept PayPal (Trusted only), BTC, and Amazon GC.

Send me some of your past work am highly interested.

From OP- They generate 1K-10K each month. If you can do that, your 2016 goal seems too less.

I have no control over how much they make...obviously.

Once I sell them the site, they are in control of how much they make since they actually run their site/business.

Others already have sites hosted on the Wordpress servers.

They just want me to revamp their current layout or design new features for them.

Some helpful advice , put some screenshots in the OP , so we can see what sites you make , if they are client sites , remove the logos etc any branding leading back to them

say what you can work with. All you say is you can make amazing sites , with custom features , you don't really go in to detail might help the members get Idea of what you can do like

etc I can work with : Angular , meteor , laravel , and Front-end i can use most css frameworks like : bootstrap , semantic ui , foundation
