No problems, I loved cracking in the past, hopefully you're bringing a good tool.

Good luck with sales.

Got my vouch copy and I got to say that this works like a charm.

Speed an accuracy-10/10

Theme-8/10(could go for a more brighter theme)

Layout-10/10

As this program is well written and themed so it is very easy to use. I deem a lot of time and effort was put into the program and I got to say I am loving it. GLWS

The sales of this pentesting software are still open!

McDolands - December 20, 2015, 2:51 pm

Alright, I have received a vouch copy of this and it pretty much works just as explained, you will get exactly what is stated in the thread and nothing besides that. Just make sure not to use a vpn while cracking because a lot of them are blocked.

All together a pretty easy and simple to use cracker that is 100% beginner friendly and can help you acquire mass amounts of emails.

Very good gui and great program all together, don't hesitate to buy this.

SIM-2908357 - December 20, 2015, 4:44 pm

You don't need proxies or death by captcha or a similar Service because this is a smtp cracker.

I can't tell if it's better, because I don't own SanMao SMTP Mail cracker. And yes, you can use the results for SMTP purposes.
