Nice looking theme buddy ;)

**Hawk HF** - December 13, 2015, 10:42 am

Looks alright, but there's nothing new or unique.  
Also, it appears your math for handling the groupbox borders is a little off.

This looks like a very professional design. Did you design it or did you use someone else's design?

Either way, it is still a very nice theme. Nice work OP. ?

Thanks for your feedback, no, I didn't 'design' it, I used a picture from the web.

By the way, all the controls are now inheriting from the correct control in this theme. I didn't show it in the preview but you can set checkboxes checkstates to "indeterminate" as well.
