Thread: [\[Guide\] Rat Spreading 2.0](#)

Niko - December 13, 2015, 12:54 am

Rat Spreading Guide 2.0

A while ago, I made a similar Rat Spreading Guide. This time, I'm here to bring a more Updated, and Better version.

Method 0

* Tumblr Blogs

This new spreading method is sure to get you Tons of slaves

<https://hackforums.net/showthread.php?tid=5131328>

Shoutout to [The Watcher](#) For this amazing method.

Method 1

* USB Drop

What you are going to want to do, is buy a bunch of cheap USB's from your local store, the cheaper the better, you can also order them in bulk online. Once you have a bunch of USB's, label each one with something that sounds interesting, such as "Private" "Pics" "Work". For each usb, you are going to want to name your stub "(Name Of Label) Client.exe" That will give you the best chance of infection. To spread this, you are going to want to place them on benches, seats in shops, floor of school and your schools lost and found.

Method 2

* Youtube

This method is very saturated, but still works great! Make a youtube video about a hacktool that people may want, make sure to include a demonstration of it in the video. Bind your stub to it, and upload to a file hosting site. In the description, make sure to include a brief description of the tool and the link.

Method 3

* Yahoo Answers

This method is Semi-Saturated, but still works good. What you want to do, is go to the computer help section and look for someone that needs help finding a program. Once you find a suitable question, rename your rat to the program that person is looking for, and also put a relative Icon on it too. Reply with the link to the download.

Method 4

* Blog/Site

Make a website/blog on a new upcoming game, and convince people that it is a pre release/leaked beta version of it. Make sure to use a file Pumper to make the file 30-200Mb so it looks legit.

Method 5

* Gaming Forums

One thing you can do is spread on forums. You will want to go to a gaming forum (Cant list any I remember) and make a post about a bot/cheat/hack for that game containing your rat.

Method 6

* Minecraft

A Good way to spread on minecraft, is with "External" hacked clients. You will want to go to a minecraft forum, and post about your "External Ghost Client". At this point and time, everyone is looking for a good ghost client. Tell them, "To install it, make sure to put it in a place that nobody else would find it, and minecraft Has to be on the launcher screen when ran."

Method 7

* PasteBin

Pastebin is a great place to spread because of how many people are on it. Your best bet would be to upload a java rat to a file hosting site, then on pastebin, explain a bunch of stuff about it, such as features etc. Such as a minecraft cracker or Account gen.

Method 8

* Torrents

A Great way to spread is by using torents. You can upload a video with some random extension suck as "wmx" or something of the such, and include your rat as the "Codec Installer" which would be something like wmxCodecInstaller.exe

Method 9

* Java Drive By

Though Java driveby's are Mostly patched, you can still pick up a few slaves with them. If using JDB's It is best to spread to places like South America or the Middle East for best results. If you look around, you can find a link for this.

Method 10

* SilverLight Exploit

There is Currently a Silverlight exploit out, and can help get some slaves with outdated browsers. If you look around you should be able to find a link for this.

Method 11

* SE Exploit

A good way to spread is by Social Engineering on hacked websites. You can convince people that their FlashPlayer, Java or any other Program is out of date, and provide a Download link to it.

Ever had someone who doesn't want to click your sketchy looking exe? Well you can do plenty more than just exe's!

More Executable Extensions

.exe
.com
.cmd
.scr
.pif

Tips

USB: Make sure not to be seen when doing this

Youtube: Make sure to delete negative comments on your download
Yahoo: If someone says not to trust the download, tell them to try it for themselves
Pastebin: If you run out of pastes for the day, simply use a proxy
Torrents: Don't make too many torrents too fast to avoid being banned from the network.
Make sure your stub is FUD

File Hosting Sites

<http://nevergreen.net/>
<https://www.google.com/drive/>
<http://directexe.com/>
<http://rghost.net/> (May Distribute)
<http://ge.tt/> (May Distribute)

Feel Free to Contribute your spreading Ideas As well!

Hopefully this helps get some people on track with spreading. ?

Changelog

Code 12/13/2015: Added List Of Executable File Extensions
12/13/2015: Added <http://nevergreen.net/> to hosting sites

Emotional Patrick - December 13, 2015, 1:01 am

Quality thread, all that blue though...cheers, can't wait to see people spread with these methods!

?? ???p? - December 13, 2015, 1:02 am

Nice guide man looks like you put a lot of effort

Wings of Redemption - December 13, 2015, 1:03 am

Woah, I did not know of some of these methods!

I have never even heard of the first method. Seems pretty simple.

Niko - December 13, 2015, 1:04 am

(Dec 13, 2015 02:01 AM)Emotional Patrick Wrote: [\[CITE\]](#) Quality thread, all that blue though...cheers, can't wait to see people spread with these methods!
Thanks! And yes I like blue :)

(Dec 13, 2015 02:02 AM)?? ???p? Wrote: [\[CITE\]](#) Nice guide man looks like you put a lot of effort
Thanks!

aion86 - December 13, 2015, 1:14 am

I always use method 1 and 2. Btw, thanks for your guide. :)

Niko - December 13, 2015, 1:46 am

(Dec 13, 2015 02:14 AM)aion86 Wrote: [\[CITE\]](#) I always use method 1 and 2. Btw, thanks for your guide. :)

If I lived in the city, I would be doing method 1 all day.

And your welcome

#Skyline - December 13, 2015, 2:48 am

Very nice informational tutorial.

Aur3xis - December 13, 2015, 3:00 am

USB dropping is good if you targeted a specific group of people or place.
EG. Library's or School's.

hack.boy - December 13, 2015, 3:02 am

Good thread.

Spreading is a pain in the ass.

If only would say don't spend too much time spreading but spend some time on knowing your audience (who you want to infect) if you don't wanna get access to some old people PC's who still play Solitaire :D

BITCHLESS - December 13, 2015, 3:04 am

Good job! Really helpful for beginners

Aur3xis - December 13, 2015, 3:04 am

(Dec 13, 2015 04:02 AM)hack.boy Wrote: [\[CITE\]](#) Good thread.

Even those are usefull if you can use your imagination.

They're even the easiest to get money off

Documentary - December 13, 2015, 4:24 am

I'm the one who came up with the pastebin spreading ;(
<https://hackforums.net/showthread.php?tid=5054164>

Incendiary. - December 13, 2015, 4:38 am

No one came up with such an obvious method.

If you didn't post that thread, someone else would a week later.

Armada - December 13, 2015, 6:09 am

(Dec 13, 2015 01:54 AM)LegitBytes Wrote: [\[CITE\]](#) * USB Drop

To spread this, you are going to want to place them on benches, seats in shops, floor of school and your schools lost and found.

To add to this, although only an option to people in heavily populated central cities. Look in to "Ghost drop USB".

Its a fad thats been popular for a couple years now, people setup either an open wifi connection or leave a USB drive sticking around in a public area. people hook up or connect to the wifi people

and there is a either the storage device or a file share drive, where people can drop and leave random files for others. This method is fantastic for distribution of viral binaries, just name your binary something INTERESTING or hard to come across online (Facebook Hacker 2016.exe anyone?)

Some of the machines that pop up from this method is interesting to say the least.

Example:

I put out a pedo trap last year using this method, and infected a cop. ?

\\Edit

Final note on article.

Very well written bro, glad to see a contribution like this put forward, we both know spreading is a constant struggle for people and many methods are heavily guarded, glad to see someone put this out in the open instead of selling yet another BS ebook spread guide. Respect.

Transcendental - December 13, 2015, 6:12 am

This is one of the best spreading guides I've seen in awhile. It's short and gets to the point and you also made it realistic.

GanGBanGeR - December 13, 2015, 7:30 am

nice thread, i will likely try to infect those minecraft 4K HD Gamers xD

Dumbo_ - December 13, 2015, 9:15 am

Nice and easy methods! Thanks!

-Droizz

Aur3xis - December 13, 2015, 9:40 am

Armada on dat Pedo Hunt shit ?

LilHackers - December 13, 2015, 10:34 am

Nice thread mate!

Might finally get rid of the "How to spread" Threads in this section!

10/10 VOOUCH

EDIT: Also nevergreen.net Doesn't distribute.

Niko - December 13, 2015, 11:52 am

(Dec 13, 2015 11:34 AM)LilHackers Wrote: [\[CITE\]](#) Nice thread mate!

Thanks! Will also add that site to the list of file sites.

Also added List Of Executable File Extensions!

ron3y - December 14, 2015, 4:46 am

Nice and easy methods! Thanks!

Niko - December 14, 2015, 5:56 pm

(Dec 14, 2015 05:46 AM)ron3y Wrote: [\[CITE\]](#) Nice and easy methods! Thanks!

Thanks for the feedback ?

?Dark Psychosis - December 15, 2015, 1:37 am

Thanks for the tutorial! :)

Excursive - December 15, 2015, 9:40 am

Anyone know where I could find some really cheap USBs? The cheapest I could find was like \$5 each, and \$5 per slave is pretty expensive!

Niko - December 16, 2015, 1:12 am

(Dec 15, 2015 10:40 AM)Excursive Wrote: [\[CITE\]](#) Anyone know where I could find some really cheap USBs? The cheapest I could find was like \$5 each, and \$5 per slave is pretty expensive!

There should be some bulk (100-1000) on ebay for like 10\$

Skyrim Modding - December 17, 2015, 9:06 am

Let's guess you have this scenario, where you leave your USB at a big shopping mall, a very traffical shop and the employee uses the USB on a work PC, could you that way get into the POS system and steal cards info? Or similar, kind of interesting.

Brutal Chaos - December 17, 2015, 10:31 am

You're not allowed to talk about such things on this forum.

????!!?? - December 17, 2015, 1:34 pm

gonna try some of these out my friend ;)

thank you OP for sharing

HFZhyonn - December 22, 2015, 8:31 am

Hey OP what thread/place would I bind my stub to the hack pack?

Niko - January 4, 2016, 6:48 pm

(Dec 22, 2015 09:31 AM)HFZhyonn Wrote: [\[CITE\]](#) Hey OP what thread/place would I bind my stub to the hack pack?

You would bind it to any executables inside.

Hello Buddy - January 4, 2016, 6:52 pm

Nice thread man! Can't wait to try the USB drop and see how many people I can infect.

1x1x1 - January 4, 2016, 7:43 pm

Quality thread, but all these methods (except that USB one) are HIGHLY saturated unfortunately.

Niko - January 10, 2016, 1:24 am

(Jan 4, 2016 08:43 PM)1x1x1 Wrote: [\[CITE\]](#) Quality thread, but all these methods (except that USB one) are HIGHLY saturated unfortunately.

I wouldn't say all are.

The pastebin, Silverlight, and Flash SE methods still work pretty good.

Niko - January 12, 2016, 12:42 pm

Just Added Method 0

* Tumblr Blogs

Thanks to [The Watcher](#) for this method.

???? - January 12, 2016, 6:53 pm

Very nice thread, sure this is going to help a lot of nubs.

Niko - January 19, 2016, 1:53 pm

(Jan 12, 2016 07:53 PM)ScorpiOn Wrote: [\[CITE\]](#) Very nice thread, sure this is going to help a lot of nubs.

Thanks for the feedback on the guide.

xLabx - January 19, 2016, 3:50 pm

Deathskully66 - January 20, 2016, 2:22 pm

Oh wow i had by USB at school, And i was wondering how to spread easily ?

S Malkiq Sam - January 20, 2016, 2:23 pm

Awesome thread. Writing here so I have saved it for later :D

Vu47K - January 20, 2016, 11:54 pm

HQ thread mate

Very informative and Amazing Guideline

Much Appreciated

?Synapse - January 21, 2016, 12:58 pm

Nice thread very helpful. Never heard of the first method but sounds cool :)

justanotherandrew - January 21, 2016, 2:32 pm

Great methods man! I've been out of ratting for a while now and it's nice to see quality posts like this.

0MasterBlaster0 - January 21, 2016, 8:33 pm

Awesome methods! I have tried the usb method by tossing some usbs in front of my local store :P
I think the tumblr method is patched because now it doesnt show the html index it did before.. I got like 10 clients from just doing it once with that method :((uninstalled all ofc)

Anyways hq thread, keep up the good work :D

Jarno - January 21, 2016, 8:38 pm

Great guide dude, also, you should add adrive.com to the website list.

Niko - January 24, 2016, 2:22 pm

(Jan 21, 2016 09:38 PM)Jarno Wrote: [\[CITE\]](#) Great guide dude, also, you should add adrive.com to the website list.

Never heard of that Site before. I'll check it out, thanks.

SourMan - January 24, 2016, 5:38 pm

"Method 1

* USB Drop

What you are going to want to do, is buy a bunch of cheap USB's from your local store, the cheaper the better, you can also order them in bulk online. Once you have a bunch of USB's, label each one with something that sounds interesting, such as "Private" "Pics" "Work". For each usb, you are going to want to name your stub "(Name Of Label) Client.exe" That will give you the best chance of infection. To spread this, you are going to want to place them on benches, seats in shops, floor of school and your schools lost and found."

This was inspired by Mr.Robot... wasn't it lol
