Thread: [Mic working only in TS / Facebook etc](#)

??f?g? - December 13, 2015, 4:45 am

Hey! So recently i got a problem.

I think my mic is only working in VoIP.

It doesn't work in Skype, Steam, Games with chat. But it's working with Teamspeak and Facebook.

My mic is also ALWAYS showing FULL greenbars.

But i can still talk in ts.

What's wrong?

Check the settings for each program and make sure you run them as administrator, also double check the microphones app (sometimes it doesn't let third-party apps use the mic for security reasons)

I will check ro run as Admin thanks!

And btw, I'm using an external USB Sound Device thingy and it dosn't coeme with a program. Everything worked perfectly before, but now it doesn't hhaha xD
