OnlyQubes Web Checker!

[Checker](#)

<http://onlyqubes.tk>

Hi guys, this is a checker that anybody can use for free to check their alts and test combo lists, it is proxyless (we provide our own proxies) and it takes just a few minutes to scan hundreds of alts!

To provide proof of authenticity and as an excitement, i will provide some alts for people to use on the checker or for their own enjoyment!

And does this log what alts go in? I'm wondering.

The only thing this bot logs is ip addresses (for premium user purposes and to combat malicious users)

Duk. - December 17, 2015, 8:57 am

So wait, this logs in or does this just check if it's premium? If it logs in and cracks or w/e it'd be cool if you made it open source (the checking/cracking piece)

You don't need to register, but you will be limited to checking 250 alts a time (premium get 1000 alts checked at a time) this also checks if the logins works, not premium.

It's private, we can't really share it. But if you really want it contact me, i do sell it...

zzirgly - December 20, 2015, 7:21 pm

Doesn't seem to be working. I put in 2 working accounts and it said they were not working. Then I tried again with another 2 and it still didn't work. Then I checked the accounts myself and they all worked.

Hopefully you can fix it, sounds like a good site.

Bine - December 21, 2015, 4:48 am

Nice job, looks nice.. didn't know you could do this in web. Do you use PHP or is there a locally run script on a VPS that does the checking?

SIM-2059193 - December 21, 2015, 7:28 am

Are they formatted email:pass?

It doesn't work well with unmigrated so if it wasn't that then the server might of been down at the time

Everything is written in c# (except the display(webpages) are in html).

mkenny2 - December 21, 2015, 11:27 am

After I scan them you are keeping the working alts I scanned and using them somewhere else I am assuming correct?

Sadistic - December 22, 2015, 10:15 pm

As Jordan Said, Only the ips are logged.

(Dec 17, 2015 09:56 AM)Jordan Bel°Fort Wrote: [\[CITE\]](#) The only thing this bot logs is ip addresses (for premium user purposes and to combat malicious users)

Okey, how many?

al5ina5 - December 25, 2015, 4:15 am

If you are interested in a web-page redesign for free hmu. :)

PaddyWagonPlays - December 25, 2015, 9:13 pm

eh, I've seen older programs that work better
