Thread: [\[Free\]\[Tutorial\] Mr. Robots Ultimate Dox Guide](#)

Mr. Robot - December 14, 2015, 3:23 am

Welcome to the official - Mr. Robot - Doxing guide.

This guide is nowhere near complete but it is free so I hope it helps you.

If you are here to learn how to dox once and for all, this guide is for you.

There is a tonne of information I am missing but I will fill it in as I find the time - .

What DOXING means.

Spoiler [\(Click to View\)](#) /d?ks/

verb informal

gerund or present participle: doxing

search for and publish private or identifying information about (a particular individual) on the Internet, typically with malicious intent.

"hackers and online vigilantes routinely dox both public and private figures"

If You have one of the following this is where you start.

An Email/Username/IP/Firstname+lastname/Phone number

Spoiler [\(Click to View\)](#)

First go to [LeakedSource](#) and search

Emails / IP's / Usernames / Passwords / Phone numbers

related to that email - If you don't pull any information - if it's a unique email like

Jhobbs12@gmail.com then try search that as a username with out the @gmail.com log all of the information then lookup each bit of information you pull from that

Log all of that information then head to [Drizzybot](#) or [Spokeo](#)

and enter the emails you now have.

After that head to [Facebook recovery](#)

And enter the emails you have or their first name+last name to find partial information about their email address -

Otherwise if you have a facebook url for them such as

[www.facebook.com/lamafacebookuser](#)

you can take the username at the end "lamafacebookuser" and enter that into the facebook recovery to find partial information on the users email.

Something like [http://www.facebook.com/facebook.user5](#)

would give you a partial email via recovery for "facebook.user5" like F*****5@y***o.c*m.a*

To find out what this is - you open a notepad and first try

F*****5@y***o.c*m.a*

Facebook.user5@yahoo.com.au into the recover section and if it pulls the same account you know it's correct - if it isn't, try

facebook-user5@yahoo.com.au

facebook_user5@yahoo.com.au
Until you get the correct results.

A quick basic example on how I would find someone from a forum styled website.
Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

All of the below steps can be reversed onto each other - using a little bit of thinking and backwards work.

Step 1.

[spoiler]Search through posts and threads - adding to a notepad file any information you can.

Screenshots of desktops with their local time can be helpful - you can compare it to the time when they posted give or take 10 minutes and compare it to the time it says on their forum profile.

Using this we can find out what their real local time is which gives us a where in the world.

We can use this website to find roughly where they are from

<http://www.timeanddate.com/worldclock/full.html?sort=2>

Other information to note -

Language - types spelling they use for example, color and colour are spelt differently in different countries.

Username - Check if they have posted in stuff from a while back, people may have quoted them with their old usernames that you no longer have access too.

Websites - they may have owned a domain name in the past that we can get old who.is information on, that can include addresses/emails/usernames

Bitcoin addresses - Some mistakes in security can be made by people sharing bitcoin addresses elsewhere on the internet

Comments, posts and computer specs - a simple copy paste from one website to another can allow us to search google with quotation marks to find another account for someone.

Pictures they have uploaded - I have seen users share images from imgur that they uploaded while logged into their account and also pictures that can be reverse searched.

When a user joined - This can be helpful using their original username to change googles search engine to only display results from that time.

Date of birth - sometimes this can be useful to confirm results if unsure.

Emails in old posts - Some users have posted free paypal giveaways on websites and you can find your victims email listed as they want the free money.

Skype names - One of the easiest way to find a users skype name is to search known usernames in google with the word skype - make sure to put quotations around the users name such as "Mr. Robot" Skype

This will focus on making sure the spelling is 100% correct for the username

A good place to look for skype details are applications the user has put towards joining groups.

Another use for this is afterwards - search the skype name in quotations and you will often find an email associated with the victim

Step 2.

Spoiler ([Click to View](#))

Once I have gathered all of that information - I head over to google and search each bit of information I can that could be an identifier - emails / skype / usernames, if you are unable to check a page or the information has been removed, there is a green arrow at the end of the url which you can click then click cache to show how that page looked exactly when the words you are looking were there.

Step 3.

Spoiler ([Click to View](#))

Once I have all of this information I head to

<https://www.facebook.com/login/identify?ctx=recover&lwv=111> and enter any names/usernames/emails that I have to see if they pull a profile.

You can also while logged into facebook - search the email address the same as if you were searching for a name - quite often the persons email will be hidden from this.

If you have found a facebook page - and it's something like www.facebook.com/MrRobot

You can put in MrRobot on <https://www.facebook.com/login/identify?ctx=recover&lwv=111> and find partials of the email and cell phone.

Do the same with all names/usernames/emails on skype to pull anything you can.

If you already have a skype -

Go to skypegrab.net and do the following in this order

Skype to IP

Skype DB lookup

IP to skype - for each IP

If you pull multiple IP's go to <https://www.iplocation.net/> and see if any relate to your victims location roughly.

Step 4.

Spoiler ([Click to View](#))

If you have pictures pulled, go to [tinyeye](http://tinyeye.com) or images.google.com

Tinyeye you insert the image or upload the picture

Images.google.com - you click the camera button at the end of the search bar and put in the picture

- This will pull any matching results from the internet and can help in finding profiles

Step 5.

Spoiler ([Click to View](#))

Go to

Site- Can't be mentioned due to HF rules I assume.

#.io

leakedsource - my favorite.

Enter all emails / IP's / Usernames 1by1 and find all passwords/associated accounts with the user.

Extras

Spoiler ([Click to View](#))

Once you have all of that - you can geolocate any IP's pulled and lookup any emails/usernames pulled.

Then go to whitepages.com or what ever directory for the country you are in - search the persons last name and the location of the IP or if you have any other location for the user.

This should narrow down your results -

If your victim has a common last name, you can use the information from above to find their facebook page - go to their friends and search their last name, this should normally give you a parents details.

If it doesn't due to their family having different last names - go to relationships and family and see if they have their parents listed there.

If their profile is completely private, look at their profile picture or any pictures they have shared - look for comments from parents/loved ones or friends.

You can see who liked a picture by clicks the likes button - from their you can see where there friends are from and get more information.

If you need to IP grab someone because you don't have their details you can use

Whatstheirip.com

or

easyvideo.ga - my preference.

Follow the instructions and you will be fine

If you want to get their IP from sending them to a "trusted" tumblr you can follow my tutorial here

<https://hackforums.net/showthread.php?tid=4781904>

Using googles crawling feature - you can do searches such as
site:www.gtaforums12.net "Skype" "Username"

Or alternatives for what you are looking for

List of search engines that help

One last amazing tool

Spoiler ([Click to View](#))

You can use Voxox on android to change your mobile number to anything you want - call each address if you have multiple looking for the target until someone says yes. Write a script according to each target -

Tiny little update to remind myself to add some info about it - if you get a street address for a residential house, check it out on google maps to find a recent picture - if you can see cars, write down the make/model and license plate to look them up too.

Make sure you google the address to find property reports for house value - rented or sold, amount of bedrooms.

FDBMAN - December 14, 2015, 3:50 am

Mad guide, he taught me some stuff on the private and can recommend him to anyone out there, this guy is great at what he does and no matter how hard the target seems to be he will find a

breakthrough

HQ member, and so is his work

VOUCH

Mr. Robot - December 14, 2015, 3:52 am

I honestly forget what I entered into easyvideo, it was some test link. Either way, when I went to go verify that it was working it redirected me to a screamer.

At 2 A.M. in a dark room with headphones on, it was a sight. Knocked my laptop off my lap and it went flying a little ways. Slept with the light on. RIP headphone users, lol.

Update: the screamer was the example link on the top of easyvideo: ****DO NOT CLICK THIS LINK*****<http://akk.li/pics/anne.jpg>****DO NOT CLICK THIS LINK****

Not a malicious link or anything, just don't want people to suffer the same fate I did :p

Mr. Robot - December 23, 2015, 10:42 pm

Go to search and in search by username input their name
Then type in skype and click the search in posts thingie
Some forums this works, great thing about obtaining a unique skype name is you can chuck it in google like

"Rod.Durnham3"

You will find all results with that exactly to find other forum names and from their they may have more personal information listed :)

Aint Giving Up - January 7, 2016, 2:48 am

(Jan 7, 2016 03:43 AM)Mr. Robot Wrote: [\[CITE\]](#) Some forums this works, great thing about obtaining a unique skype name is you can chuck it in google like

"Rod.Durnham3"

You will find all results with that exactly to find other forum names and from their they may have more personal information listed :)

Or search for skype "rod.durnham3"

This can filter some false positives

Or even email "rod.durnham3"

Or resolve ip and look it up in db's

Spider Venom - January 7, 2016, 3:00 am

I've been doing all of this, it's commonsense. But nice tutorial, I'm upset I didn't think to do this first lol.

What I wanna know is how can I find out where someone works in the UK. That's what I wanna know

Mr. Robot - January 7, 2016, 3:36 am

Each person is different sorry, the best way is to get as much information as you can and call up with a survey.

This person knows my voice, can't do that.

Mr. Robot - January 7, 2016, 5:30 am

(Jan 7, 2016 05:26 AM)Spider Venom Wrote: [\[CITE\]](#) This person knows my voice, can't do that. Use a voice changer or have a friend do it.

Otherwise try through emailing or fake accounts on media they use.

fallbackomo - January 7, 2016, 4:07 pm

very well made OP

helped me dox this skid :)

Mr. Robot - January 7, 2016, 4:28 pm

(Jan 7, 2016 05:07 PM)fallbackomo Wrote: [\[CITE\]](#) very well made OP

helped me dox this skid :)

Glad it could help you!

spoof - January 7, 2016, 6:32 pm

HUGE vouch for this guy, he knows what he's doing.

Hello Buddy - January 7, 2016, 6:48 pm

Excellent tutorial! Very HQ user.

skelly76 - January 7, 2016, 8:45 pm

Robot helped me in the past with some security issues. HQ user as well as an HQ tutorial. Easy,

understandable, and a good place to start for beginner doxers.

RootMonkee - January 7, 2016, 11:22 pm

thank for the tutorial! will use in the future. nicely written.

thanks guys ! As I said, anyone who wants to help get some screenshots and reformat it so it's easier to follow, let me know :)

barrass - January 8, 2016, 8:08 am

thanks for the guide, best get reading :-)

Caliban - January 8, 2016, 7:17 pm

Good tutorial. Its nice to know you cant dox me through those methods, since i am not a skid and use the same username/email everywhere. Also im on almost no forums beside HF. My email i use for facebook, i never used it for anything online, i have around 5 other emails for that lmao.

Also i dont live in the USA so i have an advantage aswell.

Oh lordy - January 9, 2016, 2:23 am

I added you on skype, accept me dox god.

Mr. Robot - January 9, 2016, 2:23 am

(Jan 8, 2016 09:08 AM)barrass Wrote: [\[CITE\]](#) thanks for the guide, best get reading :-)
Hope you finished it!

Germany doesn't make it any harder to find someone.

(Jan 9, 2016 03:23 AM)Oh lordy Wrote: [\[CITE\]](#) I added you on skype, accept me dox god.

I don't have a skype sorry - I have had temp skypes in the past for contacting other members.

Take care of who ever you added -

uDes - January 9, 2016, 2:25 am

Hitler did nothing wrong.

Also mr robot can dox well!

Na your an equal to everyone else, just prove you have what it takes to learn and teach!

Jason Stattham - January 22, 2016, 3:18 pm

Vouch for this, nice tutorial you got there!

Calf - January 22, 2016, 7:24 pm

You have such good quality posts Mr. Robot! c:

herrgott - January 22, 2016, 8:42 pm

Your a good man Mr. Robot, Thanks for your time!

Mr. Robot - January 22, 2016, 8:55 pm

Thanks everyone - Keep meaning to update it some more and make it 100x better.

Morchid - January 22, 2016, 11:49 pm

Alterations - January 25, 2016, 8:20 am

Huge vouch for this guy! Great tut!

Skumzy - January 26, 2016, 7:03 pm

Vouch for Mr. Robot, he knows exactly what he's doing. Thanks for sharing!

oui?? - January 26, 2016, 7:10 pm

You should add a note that you need to pay for leakedsource.

?MIN?M - January 26, 2016, 8:17 pm

I know you got good e-books, I'll pm you

w0lfxyz - January 27, 2016, 7:28 pm

thanks for the guide m8. ?

Mr. Robot - January 27, 2016, 7:40 pm

Oh thanks to who ever unlocked this thread - Was thinking I might just leave it locked but people are enjoying it for now.

freeNwild - February 19, 2016, 5:00 pm

very very very nice tut thank you!!

Fraud Detective - February 19, 2016, 5:45 pm

HQ thread! Good job OP ?

Copywriter - February 25, 2016, 1:20 pm

Something people would sell, and he gave it out for free. HQ user, very HQ, Vouch!

Forsen - February 28, 2016, 5:34 am

Posting to remember. Thanks man

Papallion - August 24, 2016, 6:58 pm

Lots of good links in there thanks for posting!

kmz22222 - August 25, 2016, 1:39 am

Till now i think this is the best dox guide on HF.

Spoiler ([Click to View](#)) [Mr.Robot is one of the best doxers i have ever seen. Although he uses DB lookups and shit but that's ok he is still cool asf although he blocked me on discord but nvm back to the shit.]

Idk man, You could have written more and sold out this shiz.

Quote: "If you're good at something, never do it for free." -The Joker

But thanks for making it for free! We appreciate ur work.

This kinda inspired me to write my own guide but i think people won't give a fuck about it.

Anyway,

Vouch for Mr.Robert :)

Troep - August 26, 2016, 1:12 pm

Thanks bro i love it!!!!!!!

skillzforme - August 27, 2016, 6:19 am

wow, that was a HQ post !!

totalrock123 - May 25, 2018, 9:38 am

Any chance you can PM me I have a few questions about this

LinoTheMaster - May 25, 2018, 9:57 am

I would like to get this! Thanks in advance!
