Limited to Ub3r only. I don't want to be making 30 sites in one day lol.

Just reply to this thread with what type of site and if you want anything special and I'll add it in. I'll send you the source files. If you want hosting I do that too for free.

Sites in-progress:

Vancouver.

/riptide

Arctic Wolf

Dragon.

Scymo

Sure, but you didn't provide what you want. If you want to keep it private PM me the details.

Paathurnax - December 14, 2015, 3:10 pm

Nah I'm not too fussed about the details. I'd just like a basic minimalist looking site. Not entirely sure what I'm going to use it for yet.

I realise that's not much to go on hahaha but idk what else to say.

Responded. if you want a fully working site with PHP that may take extra time. I'm doing website themes and templates for free. So you can go from there. I can do a little bit of PHP for free ofc. Like register and login. But more complex processes take more time thus making it not free. But I'll try my best to keep everything free.

Why not? Kind of like a personal type of site correct? I can make it based on that type of theme.
Any other requirements?

Ofc. I also provide free DDoS protected hosting if you would like that.

Update. Not taking anymore sites. Thread paused for now until I finish current requested sites.
