I've read probably a couple hundred eBooks in my time on here, and never have I seen anything like this method or remotely near it. It won't make you thousands instantly, but it is a realistic way to make legitimate passive income and even work your way up to making a shitton of money. I am not affiliated with OP at all. I'll be trying the method out, thanks OP!

Information (9/10)

I'm absolutely amazed by how much information he gives about the methods. I've already made my first

Grammar - (10/10)

Didn't saw any mistakes. Good punctuations and grammar.

Details - (9/10)

He explains every step trough the process of completing this method. Tip: You can post the websites/shops at the last page so it's easier for us to navigate.

Originality - (10/10)

I have never seen such an original and private method as this. This is the first method that actually works for me in such a short time.

TL;DR, I would recommend this Ebook to anyone that have basic knowledge about the internet!

This is a guaranteed profit method, if you put the work in! And if you put the work in you can semi auto pilot this method.

On top of making money, you're able to grow your account / a brand new account with no problem at all!

This method has a lot of potential, Be sure to get your copy fast tho because in opinion this niche can get saturated.

It's a very good method tho, put some work in it and you'll be earning money.

Great method !

I have employed similar tactics myself in the past, guess it would be a nice idea to go ahead and get back into the market for this.

Rate: 4/5

Method is simple and easy to grasp, good content.

There are similar "free" methods out there, but none have the same twist as this.

I'm not a fan of calling people out however I am very sure that's a cover up.

He was unable to tell me who did it. Also if you notice all of his threads are completely different in design and are on a wide variety of topics making me think they're all stolen. My threads are all made by me in paint and usually stick to a theme of using social media to make money as that's what I study and am passionate about.

However it's not my problem to deal with as long as my content is not involved.

A few of them is made by HF members though.

Com'on dude.

I bought resales rights from a guy who claimed he was you from Warriorforums, I didn't have an account there so I didn't even think about it.

Why the fuck would I copy an eBook and blindly post it on here without checking. I trusted the guy, and that was a mistake.

It just sucks that Skype for linux (at least the lubuntu version) doesn't save logs or anything.

I would love to have the same theme for all my eBooks btw. but I haven't found a GFX artist who meets all my requirements yet.
