-===SFX File Binder and Compressor===-

Hey guys, i wanted to share a file binder and compressor i made just now!
no fancy design for this one, just download it, use it, appreciate and don't regret it!

Features:
Binding any file with any extension.
Icon Changer for binded file.
Easy to use program.
Always FUD.

Download Link: <https://www.sendspace.com/file/0wm8vk>

Scan: (Fud only while binding fud files)

(The executable isnt obfuscated, this doesnt mean you can use my source code without asking, i will make a community alert if anyone use this source code for a paid or free product without my permissions and without leaving credits.)

Thank you very much for advertising :)

xRaiders - December 18, 2015, 6:08 am

Thank wardow, keep up the good work

somenormalguy - December 18, 2015, 9:44 am

Good works perfect.

your awesome bro

Shadow Reign - December 18, 2015, 4:03 pm

Looks pretty great but how is it FUD forever? Are you consistently updating it or is it using polymorphism?

Good job either way! ?

Nobilma - December 18, 2015, 4:28 pm

Good job on this program! Thanks for providing us with a direct link too!

This is using SFX which is a part of WinRAR, at when is the detection on WinRAR? :D

Wardow - December 22, 2015, 10:46 am

This binder is still fud and does work like charm!

Copywriter - December 22, 2015, 5:49 pm

Thanks for this, I've been needing one that is FUD. Been using a different kind. :P

infern0g0d - January 1, 2016, 10:28 pm

thx for this but avast detects this =/

anon404acab - February 4, 2016, 11:45 am

My file doesn't get FUD. I selected my RAT, choosed saving destination and icon but it isnt FUD? Can you please help me? ?

RIP avast detects.

Evo Gen 32, C:\Sandboxed\

Anyway i will still probably use, thanks a lot for the program and PLEASE do not use virustotal everyone!

edit \ Its also widely undetected!

It wont get detected scantime, Avast-DeepScreen is only detection cause of your binded files.

First of all thanks for this free program

but i am having some issue.... i binded .jpg with .exe it didn't open image?? and it opened .exe

Semp1ternal - June 20, 2016, 7:35 pm

^ OP is banned m80, you should try and find a similar program whose owner isn't banned.

Iconic-One - June 20, 2016, 9:52 pm

Very good program, Thanks for sharing.

And now Wardow's account is closed... it's sad to see three of my largest HF friends removed from the site in the past 8 months :/

(Jun 28, 2016 06:05 PM)samaki91 Wrote: [\[CITE\]](#) Looks pretty great but how is it FUD forever? Are you consistently updating it or is it using polymorphism?No, because of the way it is coded it won't become detected because it doesn't perform any malicious actions, or actions that would be considered malicious/suspicious. But saying it is FUD forever is ridiculous because it would be easy enough for an AV company to download it, RE it and flag it.
