Thread: [Cracking school.](#)

problems.x - December 17, 2015, 8:58 pm

I am starting a service to teach members on how to crack and how to get the resources to start cracking.

What this course will include -

Learning to find SQLI Vulnerable websites

Finding proxies

How to SQLI websites in order to gain combo lists or anything from the website.

How to crack

Private configs that are working, approximately 25 (Loads of different types, netflix, origin, etc)

I'll include all safe versions of the programs that you will need to start that.

You can come to me for advice about anything.

This will give you the chance to open up your own account generator or shop, and you will be able to get thousands of accounts per day.

Price: 15\$ BTC for regular members, 15\$ paypal for members who i deem trustworthy.

Thanks mate, hoping some people will take interest in this!

EL BB - December 18, 2015, 2:38 pm

Is this a pdf/ebook or teaching?

problems.x - December 18, 2015, 2:41 pm

It's me personally teaching you through team viewer and skype messaging, and if you ever have problems I'll be online on skype for full support. To be honest i think it would be quite hard to learn this sorta stuff via ebook.

McDolands - December 18, 2015, 2:44 pm

aye, you mind if I take a vouch copy if ur giving one out? Wanna see if you can teach me more then I already know.

I really don't think i need to give out a vouch copy, if anyone needs to know mmy knowledge and how well this works they can PM me for proof that i can do this, i've been in the cracking game for a long time and i was quite known a while back for getting certain accounts.

Still could be useful to let people know if you have anything special they won't find on youtube and random forums.

Those two you have stated are public and have been public for a very long time.

Villezzai - December 18, 2015, 2:52 pm

So you will teach how to use SQLi Dumper and Sentry MBA? Guys, there is tons of tutorials on youtube etc.

problems.x - December 18, 2015, 3:15 pm

^^ yes but i teach them personally, the configs i have got aren't known to everyone either.

What would make the difference between your configs you stated and the ones that are already public and still work?

You maybe better off just offering a service for "custom" configs, not listing configs as private when they most certainly are not.

Most of the configs people want to pay for aren't even possible like amazon and shit like that. Well amazon is possible but i can't do that, i can only make configs for basic websites.

Amazon is disallowed here on Hackforums anyway so you wouldn't have to offer a service to create an Amazon config.

Many people have many different needs, even for those sites that are so simple. But stating configs that are public, private that's the wrong way to go.

Just giving you a heads up before you get trolled for doing it.

SIM-1567847 - December 18, 2015, 3:30 pm

So after buying this service how long would it take us to be good enough at cracking to the point where we can open an account shop for Netflix, Spotify, etc?

If you were to buy a cracked RDP with good bandwidth to leave a combolist on all night i could say you could start one after about a week or two.

masterme - December 18, 2015, 9:55 pm

you guys are wrong there are private configs to sites with public configs trust me i know i have a proxyless 40 bot origin with all cap and i get over 1300 tests a min that is not public but is a config for a public site and also each config is made a little different so dont judge without first knowing if what he is selling is actually a public config or not cuz you dont know and glws i personally have helped out a few ppl and if u want i can try and help you with making configs with cap and more XD

FkN Alex - December 19, 2015, 2:32 pm

I'm not sure why people are giving the OP crap, sure the configs are more than likely public but the whole OP's service isn't need cause there are tutorials available elsewhere is stupid. People have different learning styles and the OP is offering to walk them thru things and offering them the resources they may have trouble getting so they are mainly paying for the OP's time and help and the price in my opinion is reasonable. Just remember some people have issues learning from videos and need interaction to learn things. Plus a human to ask about confusing things instead of becoming frustrated is also nice.

Thanks for this man i really appreciate it! The funny thing is the configs aren't even public, they're

shared between a small group of people where one guy codes loads of configs just for fun.

Rapierz - December 19, 2015, 3:39 pm

Well it doesn't even matter if the configs are public or not

The thing that OP is selling here is his guidance. I prefer being taught by someone than watching some youtube video crap

GLWS

masterme - December 19, 2015, 4:53 pm

i pmd you my skype all though tbh i sell a similar service on another forum il help if you want though XD

Looking to get some people into this service within the next few days! Let me know if you are interested.

EmailDatabase - December 21, 2015, 11:39 pm

I am Pretty Much interested in SQLI , What i wanna learn is how to make private dorks for finding vulnerable websites, not public dorks but private dorks.
If u can help me with this kindly drop me a site PM
