Thread: [\[Collection\] DDoS Script Lists\(Layer4\)](#)

Sta.ze - December 18, 2015, 12:46 pm

I do not own any of these scripts. They are gathered from around the web.

Layer 4

UDP (Python): <http://pastebin.com/raw/888rAPmL>

UDP (Perl): <http://pastebin.com/raw/BxTjYkzb>

UDP (C): <http://pastebin.com/raw/7dpWwkqw>

The Following requires a server that can spoof.

Chargen (C): <http://pastebin.com/raw/2DmWG0QD>

DNS AMP (C): <http://pastebin.com/raw/pSFvnmpE>

NTP AMP (Python): <http://pastebin.com/raw/ty4Lzhho>

NTP AMP (Perl): <http://pastebin.com/raw/2W6mi5X9>

Spoofed ESSYN (C): <http://pastebin.com/raw/S3i71CLg>

Spoofed UDP (C): <http://pastebin.com/raw/2e4WYYLw>

SYN (C): <http://pastebin.com/raw/YE2wq9YY>

XSYN (C): <http://pastebin.com/raw/Ny8duU4E>

I can do a layer7 thread too, if you'd like.

this old script ?? bro

J?son - December 18, 2015, 1:00 pm

the UDP © script does not spoof. fair warning

SIM-2223238 - December 18, 2015, 1:02 pm

<http://pastebin.com/u/wtfbbq>

(Dec 18, 2015 02:00 PM)Zoom? Wrote: [\[CITE\]](#) the UDP © script does not spoof. fair warning
The first UDP isn't supposed to spoof, the second one is.

Ah..Well I didn't get them from there. Looks like a good source though.

darkscale - December 18, 2015, 2:35 pm

Sorry but can you give a brief explanation on how to use these? And how do you get a server that spoofs?

You must buy one that spoofs. Has to have IP Header modification enabled.

Also you need to compile the ones in C.
gcc file.c -o file
