Thread: [Code me a Twitter Bot - which gives followers via hashtag tweets and retweets etc](#)

EmailDatabase - December 19, 2015, 11:35 pm

Hello Friends,

I would like u to code a "TWITTER BOT" for me.

I needed the following features on my bot are s follows :-
Overview of All Twitter Features

Write a tweet with all your accounts
Comment on a tweet with all your accounts
Retweet a tweet with all your accounts
Follow a specific profile with all your accounts
Follow profiles that posted recently using a specific word
Follow profiles that are following your profiles
Follow profiles that are following a specific profile
Unfollow a specific profile with all your accounts
Unfollow profiles that are following your profiles
Unfollow profiles you are following
Unfollow profiles that are not following you back
Favorite a specific tweet with all your accounts
Favorite tweets that were recently posted using a specific word
Favorite multiple tweets on a specific profile with all your accounts
Favorite multiple tweets on profiles that recently posted using a specific word
Clear your favorites
Exclude specific profiles from following or unfollowing
Import accounts in the account manager
Test accounts in the account manager
Assign proxies to your accounts in the account manager
Product Description
Features:

- Like by tag
- Follow by tag
- Follow by user's followers
- Follow by user's followings
- Unfollow all
- Unfollow those people who are not following you
- Comment (supports {Spinning|Spintax} and mentioning a user who you are posting to)
- Uses known and reliable clients (Iconosquare, ink361, websta.me, Luxogram)
- Customizable client changes settings
- Customizable limits
- Customizable delays
- Customizable tags settings
- Multiple tags support with looping (to keep the search results fresh)
- Auto-Save already followed people to a .txt file (useful to import to the program later)

- Settings to avoid spamming the same people during the specified session
- Import a blacklist (which works as a whitelist for unfollowing) to avoid following the same people and optionally to avoid liking/commenting their pictures.

Reference Bot , similar to my project :-

<http://monstersocial.net/features/twitter-bot/>

Note:-

1. All the payment would be made on time , only , and if we will be satisfied , we will give 2 more orders of facebook and instagram

Thanks & Regards
